

The Land use of Australia 2010–11 to 2020–21 version 7.1 provides improved spatial data on the prime use of the Australian landscape for 2010–11, 2015–16, 2020–21 and the change between these years.

## Latest products

- 14 Aug 2026
- 13 Aug 2026

This paper examines change in the sheep industry over recent decades and provides an important demonstration of market-driven change in the output mix of farms over time.

- 30 Jun 2026

This report presents the latest estimates of farm labour use and workforce characteristics drawn from the ABARES Horticulture Survey.

- 30 Jun 2026

This release contains updated productivity statistics for broadacre and dairy farming. It also includes climate-adjusted productivity measure for broadacre farming.

- 25 Jun 2026

This report provides detailed economic analysis of broadacre and dairy farm financial performance during the 2024–25 financial year. It examines the impact of seasonal conditions and price changes and provides longer-term context for current farm performance.

- 18 Jun 2026

This report presents data collected from surveys of public and private plantation growers and managers on the size and changes to the commercial plantation estate.

- 18 Jun 2026

This biannual report presents historic statistical information for Australia's forest and wood products industries. This issue includes the latest data for key domestic indicators of forestry sector activity including Australia's commercial plantation estate, volume and value of logs harvested as well as data on production and trade of wood products.

- 2 Jun 2026

The gross value of agricultural production is forecast to fall by 5% to \$98.3 billion in 2026–27 (\$104.5 billion including fisheries and forestry), with agricultural export values also expected to decline.

- 2 Jun 2026

Total crop production value is forecast to fall in 2026–27 (\$4.5 billion lower), reaching \$50.9 billion, still above the five-year average to 2024–25. The fall in value reflects an expected fall in production volume due to less favourable seasonal conditions.

- 28 May 2026

This Insights paper sets out Australia's plantation sector log availability over the next 40 years. Understanding future log availability enables growers, processors and policymakers plan investment, manage risk and supports the sector's competitiveness and resilience.
