This report contains ABARES forecasts for the value, volume and price of Australia's agricultural production and exports to 2025–26.

- Gross value of agricultural production to rise by 6% to a record \$99.5 billion.
- Livestock and livestock product values to rise as global demand and restocking drive higher prices.
- Value of crop production to remain relatively stable as higher volumes are offset by falling prices.
- Agricultural export value to rise by 4% to \$78.9 billion driven by rising livestock product export prices.
- Average farm business profit to rise to \$227,000 driven by livestock and livestock product prices.

- Total global grains and oilseeds production is expected to reach a new record high for the 2025–26.
- Variable winter/spring rainfall has limited crop and pasture production prospects across parts of south-eastern Australia.
- Despite this, national crop production in 2025–26 is expected to be higher than forecast in the [September 2025 Agricultural Commodities Report](#).
- Australia is expected to have close to average climatic condition during summer 2025–26.

- Total value of Australian crop production to increase marginally in 2025–26 to \$53.4 billion.
- Mixed production outlook across states and crop types in 2025–26.
- Value and volume of crop exports to increase, remaining well above the 10-year average.
- World grain crop prices to fall in 2025–26, reflecting record global supply.

- Gross value of livestock and livestock product production to increase by 14% to \$46 billion in 2025–26.
- Saleyards prices to rise for cattle and sheep, along with farmgate milk and wool prices in 2025–26.
- Domestic production to fall for all major meat and livestock products except pig and poultry meat.
- Value of livestock and livestock product exports to increase by 8% to \$37 billion in 2025–26.
- Strong demand in key global markets supporting Australian export shipments and prices.
