Introduction

The package of Farm Household Allowance (FHA) assistance is designed to focus a farmer's attention on making improvements to their finances. In addition to a fortnightly payment, there is practical help to make changes. FHA will not solve all the problems, but it will connect farmers with the specialists to help them to succeed, plan their succession, or make the difficult decision to sell.

The purpose of this guide is to assist farmers and their financial assessor to accurately complete a comprehensive assessment of the financial position of a farm enterprise and any associated businesses – this is called a Farm Financial Assessment (FFA). At its most basic, the FFA is an objective professional assessment to help the move the farmer out of hardship.

The FFA:

- collects the farm's gross and net position using the last three financial years
- shows how funds flow through the business by organising the data into tables
- demonstrates the size and scale of the business, including the capital and labour inputs
- captures the farmer's wishes for their future
- reflect drivers of hardship and show if they are entrenched or transitory
- give the farmer an indication of the measures that would be required to overcome the hardship/s and move the business to on-going financial self-sufficiency.

The guide takes a stepped approach to give users an end-to-end view of the process. It gives context to each section, with explanations about the request, and how it links to the assessment.

The FFA is one of the foundations of case management. It allows the farmer and their partner (either domestic and/or business) to quickly understand which overheads are absorbing the greatest amount of income, and which commodities are showing the strongest return for the investment.

The role of the financial assessor is to use their financial expertise to convert the raw information into suggested pathways to financial self-reliance. The farmer can use this information (combined with any other data or material) to make decisions about their short, medium and long-term future.

Although the FFA must be completed, it is not the Australian Government's intention for the FHA recipient to be out of pocket. This is why a commercial financial assessor may be reimbursed up to \$1,500 for their time. A Rural Financial Counsellor may also be used, at no cost to the farmer. Previous FFAs have required an estimate of the current financial year. This made the process longer and greatly contributed to costs. Using completed financial year information gives greater accuracy to the forward-looking work in Part C, than a combination of prior and current estimate.

A key feature of the FFA is to present each portion of information in logical summaries to use the past to project future pathways. Therefore, the information a person has prepared for their taxation lodgement is transferred to the FFA parts. Limitations with data exchange mean it is not possible to automatically update an FFA from the Australian Taxation Office. Also much of the detail is prepared for lodgement, but is not required to be lodged and therefore is unavailable for a data exchange.

The farmer uses the forward projections and ideas to develop an activity plan called a Financial Improvement Agreement (FIA) with a Services Australia Farm Household Case Officer (FHCO). Each FIA has activities aim to improve the farmer's circumstances. This may be by acquiring new skills, undertaking training or education, or seeking guidance from a professional a solicitor, financial advisor, agronomist, or a farm consultant (this list is not exhaustive). The strengths, weaknesses, opportunities and threats analysis in the FFA, plus the free text area where the financial assessor outlines possible pathways are key to defining the activities.

FFAs need to be accurate, relevant and meaningful. A key focus of FFAs is to ensure:

- farm business details are recorded accurately
- all financial tables are completed accurately
- answers in the qualitative analysis provided by the financial assessor are comprehensive and relevant to the individual farm business.

The Australian Government may not pay for an FFA that does not provide adequate analysis and advice to enable an applicant to negotiate a useful FIA with their FHCO. Services Australia may withhold payment until the adviser submits a satisfactory assessment with recommendations.

This guide explains each question in the FFA and provides a guide to answering them. A farmer's continuing eligibility for FHA depends on the submission of a completed FFA to Services Australia generally within 28 days of being requested. For further assistance, including the online system, please contact the Farmer Assistance Hotline on 132 316.

Financial assessor

An FFA can be conducted by a person who:

- is independent from the FHA recipient and their partner
- does not have any right or interest in the farm or any asset that is owned by the recipient, the partner or the relevant farm enterprise
- has appropriate qualifications or expertise to conduct the assessment.

For example, a qualification from a tertiary institution in a field that is relevant to giving financial advice. Extra weight would be given to a qualification that is recognised by a professional body.

Occupations that give a person experiences in financial matters include:

- financial advisors
- farm consultants
- accountants
- rural financial counsellors.

If a farmer or FHCO has any questions on the suitability of their preferred assessor, they can contact the Department of Agriculture, Fisheries & Forestry at FHA@aff.gov.au.

Accessing your FFA

To complete FFA Parts A to D, access can be made via the Services Australia website. Follow these steps to access the FFA: [Centrelink](#).

- Use the search option on the homepage and type in **Farm Financial Assessment** (Figure 1).

Figure 1 Screenshot of Services Australia homepage - search function

- Select the **Farm Financial Assessment** hyperlink (Figure 2).

Figure 2 Screenshot of Farm Financial Assessment hyperlink

- Select **Sign in to myGov** (Figure 3). This must be complete prior to accessing Centrelink account.

Figure 3 Screenshot of where to sign in to myGov

To access the FFA dashboard from your Centrelink account, follow these instructions:

- Click on **Payments and Claims** tab (Figure 4)
- In the **Claims** list, select the **Farm Financial Assessment** link (Figure 4)

Figure 4 Screenshot of accessing FFA through Centrelink online account.

- The FFA dashboard will appear, and you can begin the assessment by starting with Part A – About you (Figure 5).

Figure 5 Screenshot of FFA dashboard Parts A to D

Accuracy of information

To ensure that the assessor can provide meaningful advice and options for improving the farmer's financial situation, the farmer must provide accurate numerical estimates of farm operations (e.g. hectares sowed, wages and hours worked). The farmer is not expected to individually measure or count each feature. However, the FFA provides a financial baseline, so the better the accuracy the better overall assessment.

Please also note, when referring to production, many questions ask, 'for the current year' and by this it is meant 'production in the relevant financial year', rather than the calendar year. This means that the answers about production will be aligned with the financial information.

Information requirements

We recommend that you have the following resources on hand to ensure your responses are timely and reliable:

- tax documents from previous 3 years
- up-to-date information on personal assets and debts
- accurate measure of your farming commodity or commodities (e.g. head of livestock, tonnage of crops, hectares used)
- your farm business plan – if applicable.

You may also find it helpful to access your FHA profile for previously included information that will be relevant to this assessment. For example, personal details or farm business details.

FFA overview

The FFA is a dynamic online form. Its principal structure is four parts, Parts A to D, stepped out using a number of questions for each part. Answers to individual questions will determine subsequent questions needing to be answered by users. Therefore, not all FFA questions in this guide may be required to be completed. However, all possible questions are included in this guide for completeness. Each part follows this structure:

- **Step 1** – Guidance for you to keep on track with assessment.

- **Explanation** – the policy description for you to understand the reasoning behind the questions.
- **Question overview** – A list of all possible questions is provided.
- **Example** – Screenshots of each question and helpful tips.

A screenshot from the online assessment will accompany the description to each question. These are included as a visual guide and include extra detail to help work through the questions.

Important

If your screen is inactive for 10 minutes, a pop-up message (Figure 6) will appear which requires you to select '**Stay logged in**'. You will have 60 seconds to select this button, or you will lose unsaved work.

Your answers will only be saved once you select '**Continue**' at the end of each step (Figure 7). Selecting 'next' after each question **will not** save your progress and if timed out or exited you will need to re-answer the questions.

Figure 6 Screenshot of session time out notification

Figure 7 Screenshot of where to select continue at end of each step to save progress

Part A – About you

The details collected in part A relate to the type of farm business you operate, including commodity/commodities, size of the operation and some basic financial information required. Figure 8 shows a screenshot of each step for part A and the progress made. Although you may have provided some of this information in your application, we are unable to pre-populate your answers. Please ensure the answers are the same as your application. This is used to populate critical tables and pre-requisite information for parts B to D. The financial assessor will use the information gathered in part A to assist you to complete parts B to D.

Collecting this information is a good conversation starter between you and your FHC. In addition, when aggregated with all FFA responses, it gives the Australian Government useful information on the size and scale of farming operation accessing FFA, the types of incidents that are likely to drive uptake and allows resources to be activated in response.

Important

- After 10 minutes of inactivity, you will have 60 seconds to stay logged in.
- To save your progress you must select **continue** at the end of each step – it does not autosave progress after each question.
- The time taken to complete each step is indicated before you start.

Figure 8 Screenshot of part A steps

Your Farm Financial Assessment Part A

Each of the steps below will guide you through the process of completing your assessment.
 You will have a chance to review and change your answers.
 To support your assessment, we may ask you to provide information about your partner. You can review your personal and relationship details using [My profile](#).

Step 1	<u>Your circumstances</u>	Start About 5 minutes	
Step 2	Farm details	About 15 minutes	
Step 3	Farm labour input	About 5 minutes	
Step 4	Financial management	About 15 minutes	
Step 5	Farming future	About 5 minutes	
Step 6	Review and submit	About 5 minutes	

Step 1: Your circumstances

Step 1 contains questions on the circumstances that led you to apply for FHA.

Questions

These are the questions that you will be presented with for this step:

- What were the factors contributing to your decision to apply for farm household allowance?
- Did any of the following contribute to the low yield or failure of your crops and/or low livestock numbers or sales?
- What other factors contributed to the low yield or failure of your crops and/or low livestock numbers or sales?

Your circumstances examples

What were the factors contributing to your decision to apply for farm household allowance? (Figure 9)

Select from the options listed:

- Loss of contracts/export market
- Decline in commodity price
- Increase in input costs
- Crop failure/low yield
- Low livestock/sales

Note: if **crop failure/low yield** or **low livestock/sales** is selected, the next question will be displayed.

Figure 9 Screenshot asking what were the factors contributing to your decision to apply for Farm Household Allowance?

What were the factors contributing to your decision to apply for Farm Household Allowance?

Select the options that apply to you.

☐ Loss of contracts/export market
☐ Decline in commodity price
☐ Increase in input costs
☐ Crop failure/low yield
☐ Low livestock/sales

Next

Did any of the following contribute to the low yield or failure of your crops and/or low livestock numbers or sales? (Figure 10)

Select from the options listed:

- Drought
- Flood
- Bushfire
- Biosecurity outbreak
- Other natural impact
- Breakdown of financial partnership
- Breakdown of personal relationship
- Debt
- Health or mobility
- Other

Note: if no options apply to your circumstances, select **other** for the following question set to appear.

Figure 10 Screenshot asking did any of the following contribute to the low livestock numbers or sales?

Did any of the following contribute to the low livestock numbers or sales?

Select the options that apply to you.

☐	Drought
☐	Flood
☐	Bushfire
☐	Biosecurity outbreak
☐	Other natural impact
☐	Breakdown of financial partnership
☐	Breakdown of personal relationship
☐	Debt
☐	Health or mobility
☐	Other

Step 2: Farm details

This section gathers information about your farm business operations, including size and scale. This allows you, your financial assessor or your FHCO to identify and consider changes and improvements to your operations to put it on a better financial footing.

Questions

These are the questions that you will be presented with for this step:

- What is the registered business name of this farm business?
- What is the structure of the farming business?
- In addition to your farm business activities, are you involved in other related business?
- Provide description of this activity or indicate if there is no other related business.
- Of the total area of land currently operated by this farm business, how much, in hectares, is owned by this farm business, rented or leased from others, rented or leased to others, or owned by others and operated by agreement?
- What group best describes this activity?
- What class best describes this activity?
- How many hectares are currently under crop?
- How many hectares, in an average year, would be under crop?
- How many tonnes, per hectare, will this yield for the current year?
- How many tonnes, per hectare, would this yield in an average year?
- What is the current head of livestock on this farm?
- What is the average (year in year out) head of livestock on the farm?
- What is the yield you expect in the current year?
- What is the yield in an average year?

Farm details examples

By selecting the **Add farm business** option (Figure 12) the user will be asked up to 5 questions on the details of the business entity associated with the farm. It is mandatory to include your farm business.

Figure 12 Screenshot of where to add details of each farm business

What is the registered business name of this farm business? (Figure 13)

[Provide details]

Figure 13 Screenshot asking what is the registered business name of this farm business?

What is the structure of the farming business? (Figure 14)

Select from the options listed:

- Sole trader
- Partnership – domestic partner
- Partnership – business partner
- Partnership – 3 way – domestic partner and business partner
- Partnership – 4 way – domestic partner and 2 business partners
- Company – you are the director
- Company – you are not the director
- Trust – you are the controller
- Trust – you are the beneficiary

Figure 14 Screenshot asking what is the structure of the farming business?

What is the structure of the farming business?

Select the options that apply to you.

☐	Sole trader
☐	Partnership - domestic partner
☐	Partnership - business partner
☐	Partnership - 2 way - domestic partner and business partner
☐	Partnership - 4 way - domestic partner and 2 business partners
☐	Company - you are the director
☐	Company - you are not the director
☐	Trust - you are the controller
☐	Trust - you are a beneficiary

Next

In addition to your farm business activities, are you involved in other related business? (Figure 15)

Select from the options listed:

- Agistment
- Contracting
- Cartage
- Bailing
- Shearing
- Fencing
- Processing or adding value to farm products (e.g. Wine/olive oil)
- Transport
- Leasing/rental
- Other activity or no other related business

Note: if **other activity or no other related business** is selected, you will be asked to provide details in the next question.

Figure 15 Screenshot asking in addition to your farm business activities, are you involved in other related business?

In addition to your farm business activities, are you involved in other related business?

Select the options that apply to you.

☐	Agistment
☐	Contracting
☐	Cartage
☐	Baling
☐	Shearing
☐	Fencing
☐	Processing or adding value to farm products (e.g. wine/olive oil)
☐	Transport
☐	Leasing/rental
☐	Other activity or no other related business

[Next](#)

Provide description of this activity or indicate if there is no other related business (Figure 16).

[Provide details]

Of the total area of land currently operated by this farm business, how much, in hectares, is (Figure 17):

- Owned by this farm business
- Rented or leased from others
- Rented or leased to others
- Owned by others and operated by agreement

To help you with inputting the data:

- An entry is required in each box (must not leave box blank or input N/A – use 0)
- Answers must be whole numbers (no decimal points)
- Minimum value of 0 and maximum number of 9999999.

Figure 17 Screenshot asking the total area of land currently operated by this farm business, how much, in hectares, is – provide answer

Of the total area of land currently operated by this farm business, how much, in hectares, is:

Owned by this farm business

Rented or leased from others

Rented or leased to others

Owned by others and operated by agreement

[Next](#)

When all questions are answered, a summary table will be shown of each farm business that is included as part of the FFA (Figure 18). You will have a chance to review these details later and make changes if needed.

Figure 18 Screenshot of where to add details of each farm business summary table

Provide details of each farm business you are involved in.

Registered business name	Structure	Actions
Mandatory Farms	Sole trader	Edit Delete

[+ Add farm business](#)

To add what farm activities the business undertakes (Figure 19) you will be required to complete the below section which includes:

- 4 questions if your farm activity is livestock or aquaculture, or
- 6 questions if your farm activity is cropping

Note: the commodity groups are drawn from the Australian and New Zealand Standard Industrial Classification - [ANZSIC](#).

Figure 19 Screenshot asking where to add details of livestock, crops or aquaculture activities on the farm

Select from the options listed:

Nursery and floriculture production:

- 1) Nursery production (under cover)
- 2) Nursery production (outdoor)
- 3) Turf growing
- 4) Floriculture production (under cover)
- 5) Floriculture production (outdoors)

If **mushroom and vegetable growing** has been selected in Figure 20.

What class best describes this activity? (Figure 21)

Select from the options listed:

Mushroom and vegetable growing:

- 1) Mushroom growing
- 2) Vegetable growing (under cover)
- 3) Vegetable growing (outdoors)

If **fruit and tree nut growing** has been selected in Figure 20.

What class best describes this activity? (Figure 21)

Select from the options listed:

Fruit and tree nut growing:

- 1) Grape growing
- 2) Kiwifruit growing
- 3) Berry fruit growing
- 4) Apple and pear growing
- 5) Stone fruit growing
- 6) Citrus fruit growing
- 7) Olive growing
- 8) Other fruit and tree nut growing

If **sheep, beef cattle and grain farming** has been selected in Figure 20.

What class best describes this activity? (Figure 21)

Select from the options listed:

Sheep, Beef cattle and grain farming:

- 1) Sheep farming (specialised)
- 2) Beef cattle farming (specialised)
- 3) Beef cattle feedlots (specialised)
- 4) Sheep-Beef cattle farming
- 5) Grain-sheep or grain-beef cattle farming
- 6) Rice growing
- 7) Other grain growing

If **other crop growing** has been selected in Figure 20.

What class best describes this activity? (Figure 21)

Select from the options listed:

Other crop growing:

- 1) Sugar cane growing
- 2) Cotton growing
- 3) Other crop growing

If **dairy cattle farming** has been selected in Figure 20.

What class best describes this activity? (Figure 21)

Select from the options listed:

Dairy cattle farming:

- 1) Dairy cattle farming

If **poultry farming** has been selected in Figure 20.

What class best describes this activity? (Figure 21)

Select from the options listed:

Poultry farming:

- 1) Poultry farming (eggs)
- 2) Poultry farming (meat)

If **deer farming** has been selected in Figure 20.

What class best describes this activity? (Figure 21)

Select from the options listed:

Deer farming:

- 1) Deer farming

If **other livestock farming** has been selected in Figure 20.

What class best describes this activity? (Figure 21)

Select from the options listed:

Other livestock farming:

- 1) Horse farming
- 2) Pig farming
- 3) Beekeeping
- 4) Other livestock farming

If **aquaculture** has been selected in Figure 20.

What class best describes this activity? (Figure 21)

Select from the options listed:

Aquaculture:

- 1) Offshore longline and rack aquaculture
- 2) Offshore caged aquaculture
- 3) Onshore aquaculture

Group	Class	Actions
Fruit and tree nut growing	Apple and pear growing	Edit Delete

Step 3: Farm labour input

This section identifies the current labour commitments to the farm business.

Questions

- On average, how many hours do you work on the farm business per week?
- On average, how many hours of vacation do you take each year?

Farm labour examples

On average, how many hours do you work on the farm business per week? (Figure 31)

[Enter number]

Note: numbers can only be whole with a minimum of 0 and maximum of 168. The number should represent the average number of hours worked over the course of the year, considering the differing number of hours worked between seasons.

Figure 31 Screenshot asking on average, how many hours do you work on the farm business per week?

A screenshot of a survey interface. At the top, the text reads "On average, how many hours do you work on the farm business per week?". Below this text is a rectangular input field. At the bottom left of the form is a blue button with the word "Next" in white text.

On average, how many hours of vacation do you take each year? (Figure 32)

[Enter number]

Note: this includes time spent on holidays on or off the farm. Numbers can only be whole with a minimum of 0 and maximum of 52.

A screenshot of a survey interface. At the top, the text reads "On average, how many weeks' of vacation do you take each year?". Below this text is a rectangular input field. At the bottom left of the form is a blue button with the word "Next" in white text.

Step 4: Financial management

This section is a snapshot of your financial management and gathers details to identify key issues which may impact your farm and household. An in-depth assessment will be completed in Part B with your financial assessor. When compared to the size and scale of the business the following sets of questions also indicate how much pressure is on the business to perform well. It is important to see the amount on which one or more households depend on it, or whether pressure is relieved by other sources of income.

This section is designed to inform opportunities for your financial and personal goals. You will be asked for details in the current financial year, and the question set will update automatically each financial year.

Question

- How many households are supported by your farm income?
- Is your household supported by off farm income?
- How much gross income from off farm wages or salaries will they receive for current financial year?
- How many hours per week, on average, is the work?
- How much net income from other businesses will they receive for the current financial year?
- How many hours per week, on average, is the work?
- How much net income from other investments will they receive for the current financial year?
- How much gross income from off-farm wages or salaries do they receive in an average year?
- How many hours per week, on average, is the work?
- How much net income from other businesses do they receive in an average year?
- How many hours per week, on average, is the work?
- How much net income from other investments do they receive in an average year?
- Have you received any income from the government in the last 5 years?
- What is the type of income received?
- What is the name of this income?
- Who is the provider of this income?
- Who has received this income?
- How much did you receive?
- Does your farm have a business plan?
- When was this plan developed?
- How regularly is the business plan reviewed?
- Do you use the business plan in your decision making about the farm business?

Step 6: Review and submit

This section displays a summary of all answers you have submitted for part A and allows the opportunity to review, edit or delete any input. There is also the opportunity for you to print the summary screen to keep on hand for the financial assessor when answering parts B to D. Once you have reviewed the input and submitted you will be directed to the FFA home screen where you can enter part B with your financial assessor.

Once you have reviewed the details you will be displayed a declaration requiring your agreement prior to submitting (Figure 61).

Figure 61 Screenshot of declaration and agreement to submit Part A assessment

Submit your assessment

I declare that:

- The information I have given is correct.
- Giving false or misleading information is a serious offence.
- I need to advise Centrelink of any [changes to my circumstances](#) as soon as the change occurs.
- I have read and accept the [privacy statement](#).

☒ I have read and agree with the above conditions.

Submit

Part B – Farm Information

The financial assessor will rely on the previous 3 years of financials (business & personal) to complete part B. Therefore, it is important that the financial assessor understands the content supplied in part A. The more accurate the information in part A the better overall outcome will be achieved for parts B, C & D.

The FFA builds a detailed connection between the farm operations through exploring the farm and personal financials to help build a view of how effectively the farm business is managed. It uses the last 3 years of completed financials to show any uncharacteristic occurrences (i.e. natural disasters, commodity crashes) that will help the financial assessor to understand how the business is operated. Completing the questions on production impacts, farm & personal assets and debts, farm profitability, personal finances and other business finances will enable the overall financial position to be displayed in multiple consolidated tables.

Part B will link into part C – Performance Indicators – by prepopulating tables that will assist the financial assessor in completing the ideal financial thresholds for the farm business and the Strengths, Weaknesses, Opportunities, and Threats (SWOT) analysis.

Multiple questions relate to personal and business financial information which can be sensitive. The Services Australia [Privacy Policy](#) details how personal information will be handled.

Important

- After 10 minutes of inactivity, you will have 60 seconds to stay logged in.
- To save your progress you must select **continue** at the end of each step – it does not autosave progress after each question.
- The time taken to complete each step is indicated before you start.

Financial Assessor Access

To access the FFA as the financial assessor the following steps are to be taken:

- Navigate to the Farm information section and complete the following steps:
 - Access the [Farm Financial Assessment portal](#).
 - Enter your Customer Reference Number (Figure 62).
 - Enter your One Time Access Code.
 - Select Log In.
 - Enter Part B from the FFA dashboard and begin answering questions.

Figure 62 Screenshot of one-time access code log in

The screenshot shows the Centrelink 'One Time Access Code Log In' page for the 'Farm Financial Assessment'. It features two input fields: 'Customer Reference Number (CRN)' and 'Temporary Access Code (TAC)'. Below these fields is a blue 'Log In' button and a link that says 'Return to Services Australia?'. The Centrelink logo is at the top left.

Before completing Part B, it is important to recognise the requirements that you and the FHA recipient must meet (Figure 63).

Figure 63 Screenshot of production impacts - financial assessor requirements

Production impacts

Part B must be completed by the applicant and a financial assessor who:

- has appropriate qualifications, (e.g. one from a tertiary institution in a field relevant to giving financial advice), or
- relevant expertise (e.g. experience in a relevant field such as agronomy, accounting, financial planning, farm consultancy and rural financial counselling).

Financial assessor cannot be:

- an immediate family member, or
- have a right or interest in:
 - the farm,
 - the farm business, or
 - any asset owned by the farmer or their partner

Note: This assessment needs to be completed and submitted by the due date.

You must answer all questions unless they are marked optional.

[Begin](#)

Each step in part B contains a set of questions and as shown in Figure 64 the estimated time to complete.

Figure 64 Screenshot of part B steps

Your Farm Financial Assessment Part B

Each of the steps below will guide you through the process of completing your assessment.

You will have a chance to review and change your answers.

This is to be completed by the financial assessor.

Step 1	Production Impacts	Completed Edit
Step 2	Assets and Debt	Start About 20 minutes
Step 3	Farm Profitability	About 20 minutes
Step 4	Personal Finances	About 20 minutes
Step 5	Other Business Finances	About 20 minutes
Step 6	Financial Position	About 5 minutes
Step 7	Review and submit	All previous sections required

Step 1: Production impacts

This section asks you about impacts that relate to any production changes you have implemented, environmental issues, climate and weather conditions and management practices.

Questions

- Have you applied changes to your production to try and improve your profitability?
- What changes have you applied to try and improve your profitability?
- How did you try to improve your profitability?
- If you have previously received Farm Household Allowance, did you use the activity supplement to support these changes?
- How important has the activity supplement been to support the changes?
- What was the farm adversely affected by?
- In hectares, what size was affected?
- Was the remediation successful?
- Reflecting on each of the last 10 years (or since you started farming, if within the last 10 years), what best describes the climate and weather conditions?
- Select the years the climate and weather conditions were impacted.
- What event in the last 10 years (or since you started farming, if within the last 10 years) was the farm affected by?
- Select the years the event impacted the farm.
- What practices did you apply to your farmland to help you improve your drought or other natural disaster resilience?
- What is the total number of hectares affected?
- Select the year(s) the practice was applied.
- What natural resource management technique(s) or practice(s) did you apply to your farmland to improve your sustainability outcomes?
- What is the total number of hectares affected?
- Select the year(s) the practice was applied.

Production impacts examples

Have you applied changes to your production to try and improve your profitability? (Figure 65)

[Provide details]

Note: if the answer is **yes**, the next set of questions will be displayed.

Step 2: Assets and debts

This section helps gain information on the various assets and debts of the farm business. This will be important for populating the consolidated tables which will be used in the Part C SWOT analysis.

Questions

- What is the type of asset?
- What is the type of livestock?
- How many of this livestock are there?
- Provide a description of this asset.
- What is the current market value of this asset?
- What is the category of debt?
- Provide details of the liabilities.
- What is the total balance of the debt owing?
- What is the next minimum repayment due?
- What is the total repayment amount due in the next 12 months?
- Is the debt secured?
- What is the interest rate?
- What is the repayment and interest type?
- What is the category of debt?
- Provide details of the liabilities.
- What is the total balance of the debt owing?
- What is the next minimum repayment due?
- What is the debt secured?
- What is the interest rate?
- What is the repayment and interest type?

Assets and debt examples

This table (Figure 93) provides you the opportunity to input the value of the farm business assets, and your additional personal assets and/ or business assets that are owned by a separate business (for example if you also operate a contracting business under a separate ABN and machinery or other assets belong to that business, and/ or you have a business that is unrelated to the farm, such as a retail business).

Tips

- Use the gross value when entering – **do not include money owing.**
- **Estimates should be based on the resale value** of the asset (as it is with no improvements, or what you would expect to receive at a clearing sale).
- Do not use insurance value or land tax value.
- If the asset is used for both business and personal, select the one that is used most frequently.

Personal debt				
Add or edit any personal debt that you and/or your partner have:				
Type of debt	Total balance of debt owing	Next minimum payment due	Debt secured	Actions
New Credit/debit cards	\$2,500	\$2,500	Yes	Edit Delete
+ Add new item				
Debt balance total:				\$2,500
Minimum repayment total:				\$2,500

Step 3: Farm Profitability

This section collects information about the farm business's on-farm income and expenditure. As mentioned in the Part B introduction, this information collected here will be important for populating the consolidated tables which will be used in Part C.

Where accurate or credible financial information cannot be found, the financial assessor is to provide an estimation of the approximate value based on information provided by the applicant.

Questions

- What is the type of farm income?
- What was the full amount for the <YYYY-YY-3> financial year for this income type?
- What was the full amount for the <YYYY-YY-2> financial year for this income type?
- What was the full amount for the <YYYY-YY-1> financial year for this income type?
- What is the type of administrative expense?
- What is the full amount for the < YYYY-YY-3> financial year for this administrative expense type?
- What is the full amount for the < YYYY-YY-2> financial year for this administrative expense type?
- What is the full amount for the < YYYY-YY-1> financial year for this administrative expense type?
- What is the type of production expense?
- What was the full amount for the < YYYY-YY-3> financial year for this production expense type?
- What was the full amount for the <YYYY-YY-2> financial year for this production expense type?
- What was the full amount for the <YYYY-YY-1> financial year for this production expense type?
- What is the category of debt?
- What was the full amount for the <YYYY-YY-3> financial year for this debt type?
- What was the full amount for the <YYYY-YY-2> financial year for this debt type?
- What was the full amount for the <YYYY-YY-1> financial year for this debt type?

Farm profitability examples

Farm income

This table (Figure 120) allows you to input all farm income sources. This is a mandatory section.

Figure 120 Screenshot of farm income sources

Income type	2021/2022	2022/2023	2023/2024
Subtotal - primary production income	\$0	\$0	\$0

What is the type of farm income? (Figure 121)

Select from the options listed:

- Accommodation, agritourism, food service
- Agistment
- Commodity – aquaculture
- Commodity – cattle/beef
- Commodity – cattle/milk and dairy produce
- Commodity – cotton
- Commodity – fodder (hay and silage)
- Commodity – fruit/apples and pears
- Commodity – fruit/berry
- Commodity – fruit/citrus
- Commodity – fruit/grapes, table
- Commodity – fruit/grapes, wine
- Commodity – fruit/stone
- Commodity – fruit/tropical
- Commodity – grain, oilseed and pulses
- Commodity – honey or bee products
- Commodity – nursery and floriculture
- Commodity – other crops
- Commodity – other farm income
- Commodity – other horticultural crops
- Commodity – other livestock
- Commodity – pigs
- Commodity – poultry and eggs
- Commodity – sheep, sheep and lambs
- Commodity – wool
- Commodity – sugar cane
- Commodity – vegetables
- Contracting income
- Dividends and other investment income
- Government payments
- Interest earned

Step 4: Personal Finances

This section collects information about you and your partner's (if applicable) non-farm income and expenditure sources.

Where accurate financial information is unavailable, the financial assessor is to provide an estimate of the value based on information provided by the applicant.

Questions

- What is the type of personal income?
- What was the full amount for the <YYYY-YY-3> financial year for this income type?
- What was the full amount for the <YYYY-YY-2> financial year for this income type?
- What was the full amount for the <YYYY-YY-1> financial year for this income type?
- What is the type of personal expenditure?
- What was the full amount for the <YYYY-YY-3> financial year for this expenditure type?
- What was the full amount for the <YYYY-YY-2> financial year for this expenditure type?
- What was the full amount for the <YYYY-YY-1> financial year for this expenditure type?
- What is the category of debt?
- What was the full amount for the <YYYY-YY-3> financial year for this debt type?
- What was the full amount for the <YYYY-YY-2> financial year for this debt type?
- What was the full amount for the <YYYY-YY-1> financial year for this debt type?

Step 5: Other business finances

This section will ask questions based on whether you have any other business as previously answered in Part A (e.g. Contracting, retail, marketing). Questions relate to the type of other business income, expenditure or any debt that is associated with the business. This will all be from the previous 3 financial years and will help populate the consolidated tables at the end of Part B.

Questions

- What is the type of other business income?
- What was the full amount for the <YYYY-YY-3> financial year for this income type?
- What was the full amount for the <YYYY-YY-2> financial year for this income type?
- What was the full amount for the <YYYY-YY-1> financial year for this income type?
- What is the type of other business expenditure?
- What was the full amount for the <YYYY-YY-3> financial year for this expenditure type?
- What was the full amount for the <YYYY-YY-2> financial year for this expenditure type?
- What was the full amount for the <YYYY-YY-1> financial year for this expenditure type?
- What is the category of debt?
- What was the full amount for the <YYYY-YY-3> financial year for this debt type?
- What was the full amount for the <YYYY-YY-2> financial year for this debt type?
- What was the full amount for the <YYYY-YY-1> financial year for this debt type?

Other business finances example

This table (Figure 162) allows you to input all other business income sources that you and/or your partner have.

Step 6: Financial position

The financial section is presented in three parts:

- the source of farm business receipts,
- the consolidated farm income/operating costs/debts, and
- the consolidated personal income/operating costs/debt of the applicant.

The consolidated table provides an estimate of the financial position over the next year which is an average of the 3 years of income, assets and debts already provided.

Strategic planning allows the farmer to take stock of where the business is and establish a clear course to follow. Regular planning also helps the business deal with change. The information from these tables will indicate whether the farm business will generate enough cash to pay debts and to expand operations.

Questions

- Source of farm business receipts.
- Consolidated farm income, operating costs and debt.
- Consolidated personal income, operating costs and debt of applicant and partner.
- Consolidated other business income, operating costs and debt of applicant and partner.

Financial position examples

Source of farm business receipts (Figure 180).

Approximate proportion of your farm business receipts have been derived from the following.

Figure 180 Screenshot of the source of farm business receipts

Receipt item	Portion
Sugar cane	100.00%

Consolidated farm income, operating costs and debt (Figure 181).

The following table displays the consolidated table for the last 3 years which will be generated depending on the year the FFA is completed. A 1 year estimated projection will also display based on the average income, assets and debts information and the baseline assumption that conditions (seasonal, economic and personal) remain the same.

Figure 181 Screenshot of the consolidated farm income, operating costs and debt

Consolidated farm income, operating costs and debt				
The following table shows the financial position of the farm and the applicant over the last three financial years based on the income, assets and debt information provided above.				
Income, costs, debt	2021/2022	2022/2023	2023/2024	Next year
Opening farm balance		\$0	\$0	\$0
Total primary production income	\$0	\$0	\$0	\$0
Administrative expenses	\$0	\$0	\$0	\$0
Production expenses	\$0	\$0	\$0	\$0
Total primary production expenditure	\$0	\$0	\$0	\$0

Step 7: Review and submit

This section displays a summary of all answers you have submitted for part B and allows the opportunity to review, edit or delete any input. To submit the input to Part B the financial assessor will be required to make a declaration (Figure 184).

Figure 184 Screenshot of the financial assessor declaration statement for Part B

Financial assessor statement

I declare that:

- I am independent from the applicant, their farm and assets.
- I have the appropriate qualifications or expertise to conduct the assessment and am therefore qualified to provide this advice.

I certify that:

- The information supplied in this assessment is a fair and accurate report of my understanding of the applicant's operational activities.
- I have informed the applicant of their farm enterprise's financial position and the options available to improve their long-term financial prospects.
- I have provided this service.
- I have read and accept the [privacy statement](#) of.

☐ I have read and agree with the above conditions.

[Submit](#)

Part C – Farm Performance

This part is an assessment of your financial position with a review and update of the ideal thresholds, prepopulated from the content supplied in parts A & B followed by a SWOT analysis. This will be completed by the financial assessor and the more accurate the information in part A & B the better overall outcome will be achieved for parts C & D.

Performance indicators

The use of performance indicators in the financial analysis of farm businesses is a beneficial tool for assisting effective decision making aimed at improving business performance.

Financial indicators will provide an objective measure of farm performance and/or financial security. They transform dollar values into ratios or percentages that are relatively consistent across agricultural industries and geographical regions. Financial assessors will use their professional expertise to set appropriate indicator benchmarks for each applicant depending on their objectives, farm business model, commodities and financial situation. Financial assessors will also comment on this selection of financial indicators as part of their assessment of the farm business.

This table will be automatically populated from data supplied in Part B **with the exception of the 'Ideal Threshold' column**, which will need to be completed by the financial assessor based on their experience as a financial professional and their understanding of this business and the measures needed to achieve medium and long-term profitability and sustainability.

Help text

More information about performance indicators can be found in Table 1 below. Click the hyperlink online to view these performance indicators as a web page.

Table 1 - Performance Indicators Help Text

Performance indicator	Description	Interpretation
Short term viability ratio = (Primary production profit + liquid assets) ÷ (total farm expenditure [excluding depreciation] + total personal expenditure)	Measures the applicants or partners ability to meet household and farm business financial obligations from available funds over the course of the year. This assumes that no major changes in the allocation of farm resources occur over this time. Farm business depreciation is not included in this ratio. Liquid Assets: Primary production – cash at bank Primary production – farm management deposits Primary production – managed investments Primary production – other Primary production – outstanding crop or produce payments	A measure of liquidity that indicates how well a farm business can meet its financial obligations. A result of less than 1 (or 100% when expressed as a percentage) shows that funds on hand are insufficient to meet farm and household expenses.

Performance indicator	Description	Interpretation
Primary production - shares		
Total disposable income = Primary production profit + Total 'other business profit' + 'net personal income <i>Note:</i> Net personal income = personal income – personal expenditure	Total net income earned both on-farm and off-farm by the applicant and their partner.	A measure of financial stability of the total income available to the owner and partners household for the repayment of debt, tax and personal expenditure and investment off-farm and further investment on-farm (in addition to capital replacement). It is a useful bottom-line indicator of the disposable income of farm households.
Farm income margin = primary production profit ÷ primary production income	Measures the margin of income over costs for the farm business. It is a very useful way of measuring the net cash flow generated by the farm. This value includes business depreciation	A measure of profitability. Businesses with a negative farm income margin must draw on off-farm income, draw down liquid assets or increase borrowing to meet the cash shortfall. A result greater than 0 indicates that farm income exceeds farm costs. The higher the number, the greater the positive margin between income and costs. A result less than 0 indicates that a farms costs are higher than its income and indicate these costs had to be covered by income produced elsewhere. <i>Note:</i> if there is no primary production income, the indicator will show as N/A as you cannot divide by 0.
Farm debt to farm income ratio = Total Finance charges ÷ Total primary Production income	This ratio compares the farm business debt to the total income that the farm generates. Finance charges include: Interest paid on business loans Bank fees/charges Principal repayments on business loans	A measure of financial stability that is an indicator of farm business debt carried relative to the capacity of the farm business to service that debt. At some point debt must be repaid if the business is to remain without selling assets and payments and will need to be made out of profits or from non-farm assets. A result of less than 1 (or 100% when expressed as a percentage) indicates that farm debt for that financial year is lower than total farm income. A result greater than 1 (or 100% when expressed as a percentage) indicates that farm debt for that financial year is higher than total farm income. This result cannot be less than 0. <i>Note:</i> if there is no primary production income, this indicator will show as N/A.
Administrative expenses as a percentage of farm income = (total primary production 'administrative expenses' ÷ total primary production income) x 100	The proportion of farm revenue consumed by costs that must be met over the short term regardless of whether or not any production	A measure of profitability that is an indicator of what percentage of annual income is used to cover the administrative expenses fixed costs of the farm business.

Performance indicator	Description	Interpretation
	activity is undertaken i.e. administrative expenses.	<i>Note:</i> If there is no primary production income, this indicator will show as N/A.
Production expenses as a percentage of farm income = (total primary production 'production expenses' ÷ total primary production income) x 100	The proportion of farm revenue consumed by costs that varies as a production output changes.	A measure of profitability that is an indicator of what percentage of annual income is used to cover the production expenses of the farm business in a particular year. <i>Note:</i> If there is no primary production income, this indicator will show as N/A
Return on assets = ((primary production profit – [value of a week's unpaid labour x weeks unpaid labour] + interest paid on primary production loans + primary production leasing costs ÷ (current market value of farmland)) x 100 <i>Note:</i> Average Weekly Ordinary Time Earnings (AWOTE) will be updated in December 2025. Some calculations may differ slightly due to the use of previous years ABS data.	A measure of the efficiency with which the farm's existing mix of inputs to the farm business are being used. It is a good measure of relative business performance available. This value includes farm business depreciation. This value is calculated at full equity to remove the impact of the financing arrangement currently in place. Market value of farm assets includes: Value of farmland operated by this business	A measure of profitability that calculates the return on all resources used in farm business (capital, labour and management). This is a relatively complete economic measure of business performance valuing all outputs and inputs to the farm business. <i>Note:</i> If the farm enterprise does not own farmland (e.g. Apiarists, sharefarmers) this indicator will show as N/A.
Quick ratio = Primary production liquid assets ÷ current liabilities	The quick ratio shows the relationship between the total value of a farms liquid assets (cash) and the farms total current liabilities across the current financial year. Liquid Assets: Primary production – cash at bank Primary production – farm management deposits Primary production – managed investments Primary production – other Primary production – outstanding crop or produce payments Primary production - shares	A measure of liquidity that measures the ability of a farmer to meet his/her debt obligations due in the next 12 months with its most liquid assets. For example, if quick ratio is 50%, can the customer meet debt obligations for 6 months using primary production liquid assets. A result of less than 1 (or 100% when expressed as a percentage) indicates that annual debt repayments (interest and principal) in the current financial year is higher than the value of liquid assets. A result of greater than 1 (or 100% when expressed as a percentage) indicates that annual debt repayments (interest and principal) in the current financial year is less than the value of liquid assets. This result cannot be less than 0. <i>Note:</i> If there are no liabilities, this indicator will show as N/A.
Loan to value ratio = Loan ÷ Value <i>Note:</i> Loan values derive from: Credit – overdraft Finance loan	This ratio is used to express the ratio of a loan to the value of an asset (physical farmland).	A measure of financial stability. The higher the percentage, the higher the debt. This result cannot be less than 0. <i>Note:</i> If the farm enterprise does not own farmland (e.g. Apiarists, sharefarmers), this indicator will show as N/A.

Performance Indicator display

The performance indicator display (Figure 185) allows the financial assessor to review and update with the ideal threshold based on the data input to this point and your professional advice.

Note: calculated percentages will round up to the nearest second decimal place e.g. 35.039% will round to 35.04%. If any indicator calculation divides by 0, N/A is displayed.

Figure 185 Screenshot of the performance indicators - ideal thresholds

Performance indicators

You must answer all questions unless they are marked optional.

The following farm performance indicators measure aspects of the farm's financial position.

1 More information about performance indicators can be found [here](#).
Provide the ideal threshold based on the individual farm business' financial situation and your professional assessment.

Performance indicator	2021-2022 financial year	2022-2023 financial year	2023-2024 financial year	Ideal threshold
Update Required Short term viability ratio ⓘ Ideal threshold (in percentages) = Short term viability ratio x 100	N/A	N/A	N/A	%
Update Required Total disposable income	\$0	\$0	\$0	\$
Update Required Farm income margin ⓘ Ideal threshold (in percentages) = Farm income margin x 100	N/A	N/A	N/A	%
Update Required Farm debt to farm income ratio ⓘ Ideal threshold (in percentages) = Farm debt to farm income ratio x 100	N/A	N/A	N/A	%
Update Required Administrative expenses as a percentage of farm income	N/A	N/A	N/A	%
Update Required Production expenses as a percentage of farm income	N/A	N/A	N/A	%
Update Required Return on assets	N/A	N/A	N/A	%
Current year indicators 2024-2025 financial year				
Update Required Quick ratio ⓘ Ideal threshold (in percentages) = Quick ratio x 100	N/A			%
Update Required Loan to value ratio	N/A			%

Continue

Ideal threshold rules

The below rules will apply to each of the indicators above:

- Mandatory input
- Numerical input allowing for 2 decimal places except for total disposable income
- Total disposable income max threshold \$9,999,999,999 – whole numbers only
- Max threshold for percentage indicators is 9999.99%

SWOT Analysis

Strengths, Weaknesses, Opportunities, and Threats (SWOT) analyses enable you as the financial assessor to better understand and communicate the farm business' strengths and weaknesses and assess what threats and opportunities exist in both the environment that they operate in and the external environment. It can be used to identify training needs and to take advantage of the talents, abilities and opportunities that are available.

Providing quality information as part of the SWOT analysis is very important because the FFA will assist FHCs to facilitate the recipient's decision-making about what actions they need to undertake to improve their short and long-term financial self-reliance. This means that the information in the SWOT analysis needs to be accurate, relevant and as comprehensive as possible.

Question

- Considering the applicants overall financial situation, including on-farm and off-farm activities, what are their strengths.
- Considering the applicants overall financial situation, including on-farm and off-farm activities, what are their weaknesses.
- Considering the applicants overall financial situation, including on-farm and off-farm activities, what are their opportunities.
- Considering the applicants overall financial situation, including on-farm and off-farm activities, what are their threats.

SWOT analysis examples

Considering the applicants overall financial situation, including on-farm and off-farm activities, what are their strengths (Figure 186).

[Provide details]

Factor 4 (Figure 193)

[Provide details on factors affecting the FHA recipient's financial situation]

Figure 193 Screenshot of Factor 4

A screenshot of a web form titled 'Factor 4'. It features a large, empty rectangular text input area. At the bottom left of the input area, it says '1000 characters left'. The entire form is enclosed in a thin black border.

Factor 5 (Figure 194)

[Provide details on factors affecting the FHA recipient's financial situation]

Figure 194 Screenshot of Factor 5

A screenshot of a web form titled 'Factor 5'. It features a large, empty rectangular text input area. At the bottom left of the input area, it says '1000 characters left'. The entire form is enclosed in a thin black border.

Review and submit

Please ensure you have entered all your details correctly before submitting. There will be a chance to review the input prior to selecting the **submit** button.

The financial assessor is required to declare the following statement (Figure 195) before submitting the Part C answers.

Figure 195 Screenshot of the financial assessor Part C declaration and submission

A screenshot of a web form titled 'Financial assessor statement'. The form contains the following text and elements:

- I declare that:**
 - I am independent from the applicant, their farm and assets.
 - I have the appropriate qualifications or expertise to conduct the assessment and am therefore qualified to provide this advice.
- I certify that:**
 - The information supplied in this assessment is a fair and accurate report of my understanding of the applicant's operational activities.
 - I have informed the applicant of their farm enterprise's financial position and the options available to improve their long-term financial prospects.
 - I have provided this service.
 - I have read and accept the [privacy statement](#) or.
- ☐ I have read and agree with the above conditions.
- A blue 'Submit' button is located at the bottom left of the form.

Part D: Assessment

This part is a report on the potential position of the farm business and represents the financial assessor's professional opinion based on the financial information provided – completed by the financial assessor. It should be carefully framed to avoid giving advice (unless the financial assessor has the appropriate financial qualifications and insurances to do so). As a result, the questions are worded to give the recipient and the FHCO points to discuss about the observations about the factors that have contributed to the farm business' current difficulties, and potential pathways forward.

Important

ICT limitations have imposed a character limit of 1,000 characters per question. Some financial assessors may find it easier to use this guide to transfer the questions to a word processing document, craft their messages, and then transfer them to the FFA.

Part 1 – Financial assessor's assessment

Based on the information available, provide a report of the potential position of the farm, taking into account the following questions. All questions are mandatory unless they are marked optional.

Questions

- What trends in income, profit or expenditure have contributed to the farm's financial situation?
- Using your financial expertise and the information from parts B and C, discuss the profitability issues of the farm business and opportunities for improvement. If there are none, please explain why.

Part 3 – Financial Assessor’s assessment

Based on the information available, provide a report of the potential position of the farm, taking into account the following questions.

Questions

- Would the business benefit from changes to the business lines (commodities)? Please explain the reason for your answer.
- Considering any limitations the applicant may face in improving farm profit in the next 3 years, does the applicant need to obtain additional income from outside the farm to achieve financial security?

Financial assessor’s assessment examples

Would the business benefit from changes to the business lines (commodities)? Please explain the reason for your answer (Figure 200).

At the bottom left of the text area, it says "1000 characters left". At the bottom right of the form, there is a blue button labeled "Next".

Further assistance

Provide options for additional professional training, advice or support.

Questions

- What type of additional professional training, advice or support do you think may improve the FHA recipient's ability to make business decisions based on their financial situation, goals and prospects?
- Provide further details on the other professional advice or training.

Further assistance examples

What type of additional professional training, advice or support do you think may improve the FHA recipient's ability to make business decisions based on their financial situation, goals and prospects? (Figure 204)

Select from the options listed:

- Services of agronomists/farm consultant
- Product research/development
- Farm analysis
- Diversification options/analysis
- Financial planning
- Budgeting – twelve-month budgets
- Legal advice
- Succession planning
- Retirement options
- Business management training (e.g. property management planning)
- Farm skills development/training (e.g. wool classing, chemical handling, pasture management)
- Retraining to obtain off-farm income
- Computer training
- Career counselling including a skills assessment
- Other professional advice or training

Note: if **other professional advice or training** is selected then the following question will be displayed.

Figure 211 Financial assessor declaration statement.

Financial assessor statement

I declare that:

- I am independent from the applicant, their farm and assets.
- I have the appropriate qualifications or expertise to conduct the assessment and am therefore qualified to provide this advice.

I certify that:

- The information supplied in this assessment is a fair and accurate report of my understanding of the applicant's operational activities.
- I have informed the applicant of their farm enterprise's financial position and the options available to improve their long-term financial prospects.
- I have provided this service.
- I have read and accept the [privacy statement](#).

☐ I have read and agree with the above conditions.

Glossary

Term	Definition
Sole trader	An individual trading on their own.
Partnership	An association of people or entities running a business together, but not as a company.
Trust	A legal structure where a trustee manages assets and conducts business operations on behalf of beneficiaries, as defined in a trust deed.
Company	A separate legal entity or person, owned by shareholders and run by directors. It has reporting and accounting requirements.
Agistment	The taking in and feeding of livestock from another business for payment.
Contracting	Is a contractual arrangement where a farmer (the producer) agrees to supply a specific quantity and quality of agricultural products to a buyer (e.g., a processing company, a retailer, or a marketing firm) under terms agreed upon in advance.
Cartage	Involves the movement of agricultural products, inputs, and equipment using vehicles, often trailers or smaller trucks, for short-distance transportation.
Baling	Involves cutting, collecting and compacting crops into bails which can be transported and fed to livestock.
Shearing	Process by which the woollen fleece of a sheep is cut off.
Fencing	The user of fences on farms and rural properties to control livestock, protect crops, and manage land, often using materials like wire, steel posts, wood, or electrified fencing.
Leasing/rental	A contract where a property owner (lessor) grants another party (lessee) the right to use land for farming activities, such as crop production, grazing, or horticulture, for a specified period in exchange for rent.
Contract income	Income you get from leasing out your equipment or your labour to another person or business.
Grant	A sum of money given by a government or other organization for a particular purpose.
Subsidy	A government payment or support given to farmers and agribusinesses to supplement their income, manage the supply of agricultural products, and influence the cost and supply of commodities.
Rebate	Money owed to the farmer, their partner or farm business as a partial refund or return on moneys already paid or contributed – for example, a cash-back on new equipment purchases.
