This report contains ABARES forecasts for the value, volume and price of Australia's agricultural production and exports to 2030–31.

- Gross value of agricultural production expected to reach \$101 billion in 2025–26.
- Gross value of agricultural production to fall by 6% to \$95 billion in 2026–27.
- Livestock and livestock product value to fall 8% to \$43 billion, reflecting lower prices and volumes.
- Value of crop production to fall 5% to \$52 billion reflecting lower production volume.
- Agricultural export value to fall by 9% to \$73 billion driven by lower livestock product and grain exports.

- Average farm business profit to fall in 2026-27 driven by lower crop and livestock receipts.

Download this report: [Overview \(PDF - 4.9 MB\)](#)

- Total global grains and oilseeds production is expected to reach a new record high for 2025–26.
- Late spring rainfall has boosted winter crop and pasture production across parts of southern Australia.
- National winter crop production in 2025–26 is expected to be the second highest on record.
- Much of Australia is expected to receive below average rainfall during autumn 2026.

- The gross value of wheat production to fall by 13% to \$9.5 billion in 2026–27.
- High global carry in stocks are expected to place downward pressure on wheat prices in 2026–27.
- The value of exports to fall by 13% to \$8.6 billion 2026–27.
- Production forecast to fall in 2026–27 due to reduced area planted and lower wheat yields.
- The value of production projected to fall \$8.6 billion in real terms by 2030–31.

Download this report: [Wheat \(PDF - 4.9 MB\)](#)

- The value of barley production to decrease by 12% to \$4.3 billion in 2026–27.
- Barley export value to decrease by 10% to \$3.1 billion in 2026–27 but remain above 10-year average.
- The value of sorghum production to fall by 8% to \$844 million in 2026–27.
- Sorghum export value to increase by 1% to \$900 million in 2026–27.

Download this report: [Coarse grains \(PDF - 4.9 MB\)](#)

- Value of canola production to fall by 8% to \$5.4 billion in 2026–27.
- Value of canola exports forecast to fall by 16% to \$4.1 billion in 2026–27.
- Australian canola production is forecast to fall by 9% to 7.0 million tonnes in 2026–27.
- Global oilseed prices are set to rise over the medium term outlook.

- Value of Australian wine grape production to fall by 2% to \$644 million in 2026–27.
- Value of Australian wine exports to fall by 5% to \$2.3 billion in 2026–27.
- Average wine grape prices to continue falling into 2026–27 and remain below long-term average levels.
- Real value of wine grape production and exports to moderate over the medium term to 2030–31.

Download this report: [Wine grapes \(PDF - 4.9 MB\)](#)

- Value of horticulture production to increase by 3% to \$19.3 billion in 2026–27.
- Value of horticulture exports to increase by 1% to \$4.4 billion in 2026–27.
- Horticulture export prices to fall in 2026–27, reflecting strong global supply.

- Real value of horticulture production and exports to rise modestly over the medium-term outlook.

Download this report: [Horticulture \(PDF - 4.9 MB\)](#)

- The gross value of cotton production to fall by 6% to \$2.2 billion in 2026–27.
- Cotlook A Index to rise by 4% to average 79 US cents per pound in 2026–27.
- Cotton production to fall by 7% in 2026–27 due to reduced area planted to cotton.
- The value of cotton exports to decline by 13% to \$2.8 billion in 2026–27.
- Rising global cotton demand to drive higher production and export values over the medium term.

Download this report: [Cotton \(PDF - 4.9 MB\)](#)

- The gross value of cattle slaughter and live exports to fall by 14% to \$19.6 billion in 2026–27.
- ABARES Saleyard Indicator Price to decline 9% to average 705 cents per kilogram in 2026–27.
- Beef production to fall by 6% to 2.6 million tonnes (carcase weight) due to lower cattle availability.
- The value of beef and live cattle exports to decline by 18% to \$16.3 billion in 2026–27.
- Firm global demand for beef to drive higher production and export values over the medium term.

Download this report: [Beef and cattle \(PDF - 4.9 MB\)](#)

- Value of sheep slaughter, wool and live sheep production to fall by 3% to \$9.4 billion in 2026–27.
- Lamb and mutton saleyard prices to ease but remain elevated on average across 2026–27.
- Wool prices to maintain recent strength in 2026–27 with robust demand from China.
- Value of sheep meat, wool and live sheep exports to fall by 2% to \$8.9 billion in 2026–27.
- Firm global demand for lamb and mutton to drive higher production values over the medium term.

Download this report: [Lamb, sheep and wool \(PDF - 4.9 MB\)](#)

- The gross value of milk production to fall by 4% to \$5.7 billion in 2026–27.
- The value of dairy exports to fall by 5% to \$3.4 billion in 2026–27 reflecting lower export volumes.
- Dairy product export prices to rise in 2026–27, reflecting lower global production compared to 2025–26.
- Australian milk production to fall with lower cow numbers outweighing higher yields in 2026–27.
- Farmgate milk prices to rise over the medium term with lower production and strong global dairy demand.

Download this report: [Dairy \(PDF - 4.9 MB\)](#)

- The gross value of pig and poultry slaughter to rise by 2% to \$6.6 billion in 2026–27.
- Pig and poultry meat export value to increase by 3% to \$365 million in 2026–27.
- Value of egg production to decline by 1% in 2026–27, as elevated prices expected to stabilise further.

- Consumer substitution due to high red meat prices to keep pig and poultry meat demand elevated.
- Pig, poultry and egg production projected to grow over the medium term, driven by demand growth.

Download this report: [Pigs, poultry and eggs \(PDF - 4.9 MB\)](#)

- Value of fisheries and aquaculture production to increase by 3% in 2026–27 to \$4.0 billion, driven by higher production values of wild-caught rock lobster and aquaculture salmonids.
- Over the medium term, a strengthening Australian dollar is expected to ease seafood prices.
- Medium term production growth of salmonids to keep fishery and aquaculture production value stable.

Download this report: [Fisheries and aquaculture \(PDF - 4.9 MB\)](#)

- Value of Australian forestry production to increase by 3% to \$2.23 billion in 2026-27.
- Movements in hardwood and softwood markets are expected to offset one another.
- Value of softwood production to increase slightly, affected by domestic construction markets.
- Value of hardwood plantation production to decrease, affected by easing global woodchip markets.
- Native forestry GVP to maintain historically low levels following 20 years of contraction in the industry.
