

Overview

ABARES Australian forest and wood products statistics (AFWPS) is a collection of data on key indicators of activity in the Australian forest and wood products sector.

AFWPS has two components - a production and trade focussed report released in June, and a separate trade only edition focussed on newly released trade data from the ABS in November.

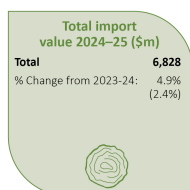

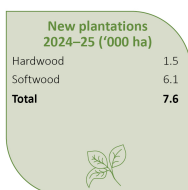

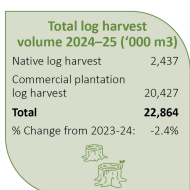

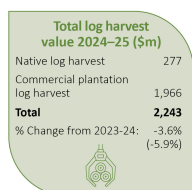

As a whole, AFWPS is supported by summary tables in Excel format and a Power BI data visualisation that provides users with an interactive dashboard to interrogate the data.

The current edition of AFWPS covers production and trade data to 2024–25.

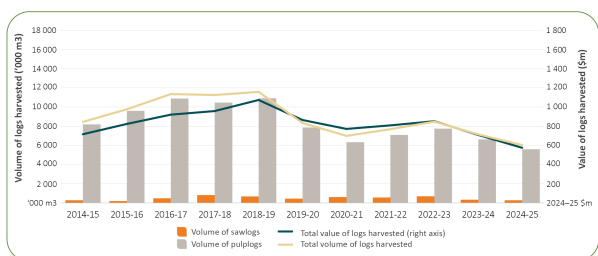

To access the previous edition of the AFWPS click the download links in the dropdown below.

Time series charts are expressed in real terms (adjusted for inflation).

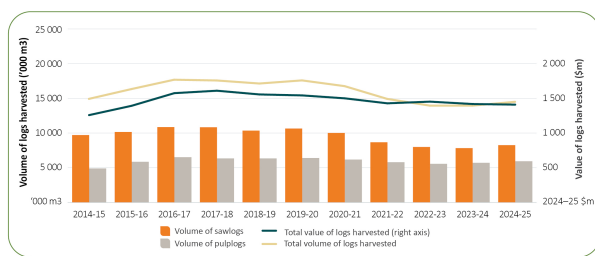

Australian Forest and Wood Products Statistics, Production and trade to 2024–25

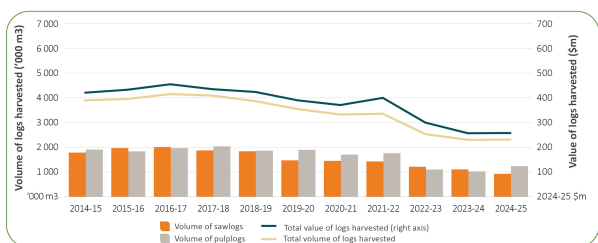

Hardwood plantation sector continues to decline from peak in 2018–19

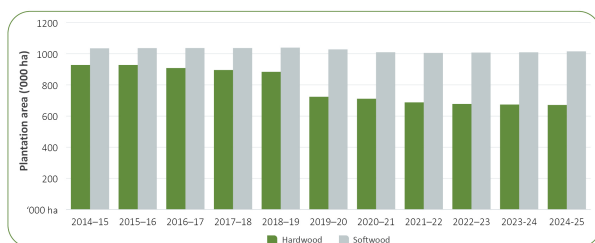

Higher softwood plantation harvest drives value increase

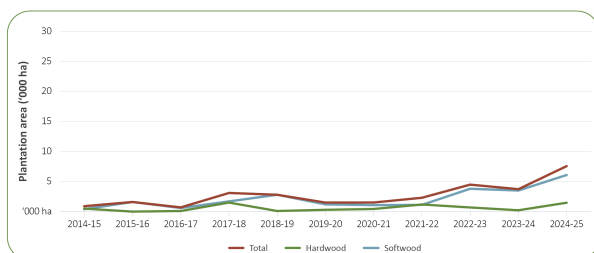

Native hardwood harvest stable among state level shifts

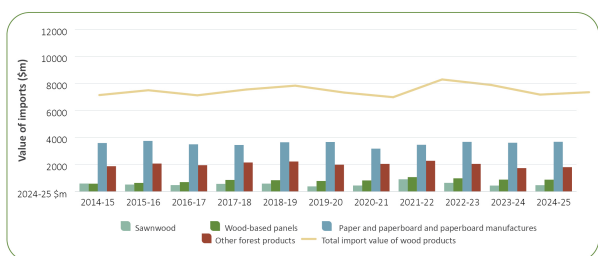

Hardwood and softwood plantation estates both remained stable in 2024–25

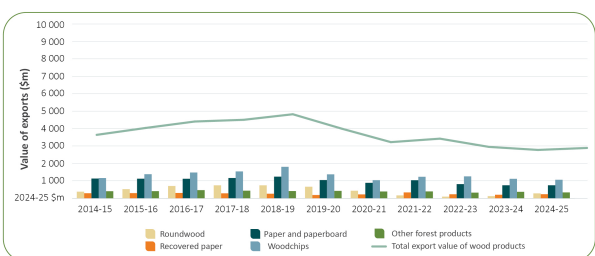

There were 7600 hectares of new plantations established in 2024–25

Imports of forest and wood products continue to be dominated by paper related products

Value of wood product exports picks up in 2024–25

A high resolution version of the [Australian Forest and Wood Products Statistics: Production and trade to 2024–25](#) is available in the download section below.

2024–25 volume and value of logs harvested

	Unit	2024–25 % change from 2023–24a	
Volume of logs harvested			
Commercial plantation log harvest	million cubic metres	20.4	-2.7
Hardwood log harvest	million cubic metres	6.0	-15.5
Softwood log harvest	million cubic metres	14.4	3.9
Native forest log harvest b c	million cubic metres	2.4	0.8
Total volume of logs harvested	million cubic metres	22.9	-2.4
Value of logs harvested			
Commercial plantation logs harvest	\$ million	1,966	-4.5 (-6.8)
Hardwood log harvest	\$ million	575	-16.9 (-18.8)
Softwood log harvest	\$ million	1,391	1.7 (-0.7)
Native forest logs harvest b c	\$ million	277	3.2 (0.8)
Total value of logs harvested	\$ billion	2.24	-3.6 (5.9)

2024–25 plantation area

	Unit	2024–25 % change from 2023–24	
Plantation area			
Hardwood plantations	'000 hectares	670.9	-0.4
Softwood plantations	'000 hectares	1,015.5	0.6
Total plantation area d	'000 hectares	1,709.8	0.2

^a Values in brackets are in real terms (2024–25 dollars) to account for inflation.

^b Includes native cypress logs.

^c Previously published native forest log volume and value data for 2023–24 have been revised using an

updated methodology to reflect substantial structural changes in the sector and availability of new data.
d Total includes plantations where type is unknown.

2024-25

	Unit	2024– 25 % change from 2023–24 a
Trade		
Total value of exported wood products	\$ billion 2.89	6.6 (4.1)
Total value of imported wood products	\$ billion 6.83	4.9 (2.4)
Total merchandise trade	\$ billion 9.72	5.4 (2.9)

a Values in brackets are in real terms (2024–25 dollars) to account for inflation.

2024-25 dwelling commencements

	Unit	2024– 25 % change from 2023–24
Dwelling commencements		
House commencements	'000 110	9.9
Other residential commencements	'000 69	15.6
Total dwelling commencements	'000 179	11.9

Data visualisation

Note: The reported trade data can be subject to ABS confidentiality restrictions, such as hardwood woodchips since October 2020. The confidentiality restrictions can have implications for country and national level reporting. For additional details see International Trade in Goods and Services, Australia.

For historic and archived versions of the Australian Forest and Wood Product Statistics report, please use the [ABARES Publications Library](#).

In March 2022 ABARES updated the classifications used to report Agriculture, Fisheries and Forestry export statistics. These changes will improve the quality of information available to users of trade statistics. These changes may result in changes to historical time series for trade statistics due to the movement of trade items between categories, or the addition of new items. [A detailed explanation of](#)

[ABARES classification of Agriculture, Fisheries and Forestry statistics](#) is available, along with a concordance to the previous definition. This classification is based on the Australian Harmonised Export Commodity Classification.
