

The National Agricultural Innovation Agenda was released in 2020 and was intended to strengthen Australia's agricultural innovation system.

It was informed by the 2019 [Agricultural Innovation – A National Approach to Grow Australia's Future](#) and consultation on how to improve the RDC system.

The National Agricultural Innovation Agenda was structured on 5 pillars:

- strengthening ecosystem leadership
- improving the balance of funding and investment
- embedding world-class innovation practices
- strengthening our regions
- creating the next generation innovation platform

Activities under the Agenda

- The [2021 Policy Statement](#) established priorities to focus efforts and investments in Australian agricultural innovation
- The [2022 Digital Foundations for Agriculture Strategy](#) set out actions for development and uptake of digital technologies
 - It included \$400,000 in funding to the National Farmers Federation to expand the [Australian Farm Data Code](#)
- It included \$400,000 in funding to the National Farmers Federation to expand the
- \$2.8 million in Australian Government funding to [Agriculture Innovation Australia](#) to address big, national challenges facing the sector
- \$2 million in Australian Government funding toward development of [growAG](#)
- A package of documents to support the RDCs was developed in 2021
 - Guidelines for Statutory Funding Agreements
 - Best Practice Guide to Stakeholder Consultation
 - RDC Knowledge Transfer and Commercialisation Guide
