

Publication details

Department of Agriculture and Water Resources, 2014

This disease strategy manual is an integral part of the Australian Aquatic Veterinary Emergency Plan (AQUAVETPLAN).

The manual sets out the disease control principles for use in response to a suspected or confirmed outbreak of abalone viral ganglioneuritis (AVG) in Australia.

AVG is a serious disease of abalone. It has had major impacts on wild abalone, farmed abalone and abalone held in processing plants, causing high mortalities and substantial economic loss.
