

Overview

This project aims to evaluate the suitability of 3 antibody detection enzyme-linked immunosorbent assays (ELISAs) for lumpy skin disease (LSD) surveillance and proof-of-freedom testing, in cattle and buffalo in Australia.

The ELISAs will be made available for use by Australian laboratories through the Laboratories for Emergency Animal Disease Diagnosis and Response (LEADDR) network.

Project Lead: Australian Centre for Disease Preparedness; Department of Agriculture, Fisheries and Forestry

Project Contact: animalhealthlaboratories@aff.gov.au

Project Status: Complete

Project date: November 2021 – May 2025

Objective alignment:

- 2 – Improve Australia's surveillance and diagnostic capacity for animal pests and diseases.

Activity alignment:

- 2.1 – Implement actions under National Animal Health Surveillance Business Plan and National Animal Health Diagnostic Business Plan.
- 2.2 – Develop and implement novel technologies, such as point-of-care animal testing and genomics, to address gaps in diagnostic capacity.
