

Overview

This project aims to develop a suite of tests on a portable, battery-operated multiplexing qPCR platform for the detection of major emergency diseases of cattle and pigs. It also serves as a proof-of-concept for the use of this multiplexing, point-of-care qPCR platform for other emergency animal pathogens.

Project Lead: Elizabeth Macarthur Agricultural Institute; Department of Agriculture, Fisheries and Forestry

Project Contact: Animalhealthlaboratories@aff.gov.au

Project Status: Complete

Project date: February 2022 - March 2025

Objective alignment:

- 2 – Improve Australia’s surveillance and diagnostic capacity for animal pests and diseases.

Activity alignment:

- 2.1 – Implement actions under National Animal Health Surveillance Business Plan and National Animal Health Diagnostic Business Plan.
- 2.2 – Develop and implement novel technologies, such as point-of-care animal testing and genomics, to address gaps in diagnostic capacity.
