

Overview

Phase 1 of this project described how VR could be used to create cost-effective and expandable training applications for animal handling and biosecurity. Based on the results of phase 1, and improvements in technology, a second phase was commissioned.

Phase 2 involved trialing an updated VR experience that operates on the Meta Quest 2 headset (formerly known as the Oculus Quest 2).

This project is complete and the reports are available on the department's website.

Project Lead: Department of Agriculture, Fisheries and Forestry

Project Contact: animalplan@aff.gov.au

Project Status: Complete

Project date: From 2021 to 2023

Objective alignment:

- 1 – Improve Australia's preparedness and ability to respond to emergency animal diseases.

Activity alignment:

- 1.5 – Implement innovative technologies and training to meet national emergency animal disease education and training needs.
