

Overview

With assistance from Animal Health Australia, the Australian Alpaca Association has launched an NLIS for alpacas in a voluntary capacity.

The NLIS is designed to track devices and corresponding livestock movements for disease control, biosecurity, food safety, market access and other industry-related purposes. NLIS for alpacas uses a visually readable electronic tag that stays with each animal for life.

Project Lead: Australian Alpaca Association (AAA); Animal Health Australia

Project Contact: aha@animalhealthaustralia.com.au

Project Status: Active

Objective alignment:

- 7 – Improve the integrity of animal health systems.

Activity alignment:

- 7.1 – Develop cost-effective national traceability registers or systems for agreed animal industries that do not have one.
- 7.3 – Use traceability systems to provide feedback to supply chain participants on animal health outcomes.

Project updates

November 2025

The AAA released a suite of educational material for alpaca owners about how to use the NLIS. For further information please see the [AAA NLIS website](#).
