

Overview

myFeedback is an industry-first single-source data program. It combines the benefits of carcase and eating quality data with animal disease and defect insights in one place. This enables more accurate benchmarking of carcase performance for all users.

The program is designed to help beef and sheepmeat producers make data-driven on-farm decisions to improve the quality and health of their livestock, in line with market requirements.

myFeedback combines analytical reports, using data derived from:

- National Livestock Identification System
- Meat Standards Australia
- Animal Health Australia
- National Livestock Reporting Service
- Direct Animal Disease and Defect Uploads

Project Lead: Meat & Livestock Australia; Meat Standards Australia

Project Contact: msaenquiries@mla.com.au

Project Status: Active

Objective alignment:

- 7 – Improve the integrity of animal health systems.

Activity alignment:

- 7.3 – Use traceability systems to provide feedback to supply chain participants on animal health outcomes.

Project updates

Future Actions

Further development of the myFeedback platform and onboarding of users.
