

Overview

This project aims to build on previous phases of the Australian Biosecurity Genomic Database (ABGD) development project. Phase 3 aims to:

- add additional viral subtypes
- expand the database to include state based notifiable diseases
- trial the inclusion of bacterial pathogens
- determine a long-term solution for database maintenance.

Project Lead: AgriBio (Victoria); Department of Agriculture, Fisheries and Forestry

Project Contact: Animalhealthlaboratories@aff.gov.au

Project Status: Complete

Project Date: May 2024 to June 2025

Objective alignment:

- 2 – Improve Australia’s surveillance and diagnostic capacity for animal pests and diseases.

Activity alignment:

- 2.1 – Implement actions under National Animal Health Surveillance Business Plan and National Animal Health Diagnostic Business Plan.
