

Overview

This project aims to investigate pre-barcoded sample tubes to reduce the delays due to bottlenecks in sample processing during disease outbreaks. It includes researching technologies and suppliers of pre-barcoded sample collection tubes.

AgriBio will conduct several pilot trials of selected sample tubes from the field to the laboratory. A trial will then be conducted with the South Australian Animal Health Laboratory Service and the Australian Centre for Disease Preparedness to test its potential for use as a national sample identification system.

Project Leads:

- AgriBio (Victoria)
- Gribbles Veterinary Laboratory – Department of Primary Industries and Regions, South Australia
- Australian Centre for Disease Preparedness
- Department of Agriculture, Fisheries and Forestry

Project Contact: Animalhealthlaboratories@aff.gov.au

Project Status: Complete

Project Date: May 2024 to May 2025

Objective alignment:

- 2 – Improve Australia's surveillance and diagnostic capacity for animal pests and diseases.

Activity alignment:

- 2.1 – Implement actions under National Animal Health Surveillance Business Plan and National Animal Health Diagnostic Business Plan.
