

Overview

The project created a roadmap to guide the setup of a proficiency testing (PT) program for diagnostic high throughput sequencing (HTS) and bioinformatics in the Laboratories for Emergency Animal Disease Diagnosis and Response (LEADDR) network. The roadmap came from a planning workshop with LEADDR members. The workshop informed a 5-year business plan.

Project Lead: Australian Centre for Disease Preparedness; Department of Agriculture, Fisheries and Forestry; Laboratories for Emergency Animal Disease Diagnosis and Response network

Project Contact: animalhealthlaboratories@aff.gov.au

Project Status: Complete

Objective alignment:

- 2 - Improve Australia's preparedness and ability to respond to emergency animal diseases

Activity alignment:

- 2.1 – Implement actions under National Animal Health Surveillance Business Plan and National Animal Health Diagnostic Business Plan.
