

We regulate aircraft movements between parts of Australian territory. We do this to manage the risk of pests and diseases entering Australian territory.

Under s618(2) of the Biosecurity Act 2015, the [Biosecurity \(Movements between Parts of Australian Territory\) Declaration 2016](#) provides the biosecurity framework.

External territories

We regulate the movement of aircraft and goods between the Australian mainland and external territories.

Our external territories are:

- Norfolk Island
- Christmas Island
- Coco (Keeling) Islands

These territories have unique animal and plant health biosecurity status. Biosecurity arrangements on the territories are designed to maintain this status.

Biosecurity control measures for these flights may include:

- pre-arrival reporting
- disinsection requirements
- pratique or assessment and inspection at a [first point of entry](#) (see Table 1.)

Aircraft operator obligations

You should contact the [aircraft biosecurity contact](#) at the intended first point of entry to clarify your biosecurity obligations before arrival.

Table 1 only applies to actual or intended movements between external territories and the Australian mainland.

Table 1 Biosecurity obligations for regulated movements between external territories and the Australian mainland.

Origin / destination	Submit a general pre-arrival report	Disinsection measures	Pratique	Biosecurity control
Norfolk Island	Yes	No (s7 Biosecurity (Human Health) Regulation 2016)	No (s6 Biosecurity (Human Health) Regulation 2016)	Yes
Christmas Island	Yes	Yes	Yes	Yes

Coco's (Keeling) Island	Yes	Yes	Yes	Yes
----------------------------	-----	-----	-----	-----

Australian external territories not considered Australian territory (AETNCAT)

AETNCAT territories are:

- Ashmore Reef and Cartier Island
- Coral Sea Islands (Willis Island)
- Macdonald and Heard Island
- the Australian Antarctic territory.

Movement to AETNCAT

There are no regulations or restrictions under the Act relating to the movement of goods and conveyances or for the regulation of human health from Australian Territory or any other countries to AETNCAT territories.

Movement from AETNCAT

The Biosecurity Act 2015 applies to the arrival of international people, goods and aircraft travelling from AETNCAT territories to Australian territory.

Aircraft operator obligations

You should contact the [aircraft biosecurity contact](#) at the intended first point of entry to clarify your biosecurity obligations before arrival.

Table 2 Biosecurity obligations for movements between AETNCAT territories and the Australian mainland

These measures apply to actual or intended aircraft movements.

Australian territory not considered Australian territory	Submit a pre-arrival report	Disinsection measures	Pratique	Biosecurity control
Territory of Ashmore Reef and Cartier Island	Yes	Yes	Yes	Yes
Coral Sea Islands (Willis Island)	Yes	Yes	Yes	Yes
MacDonald and Heard Island	Yes	Yes	Yes	Yes
The Australian Antarctic Territory	Yes	Yes	Yes	Yes

Commonwealth Government legal provisions

Here are the relevant provisions for external Australian territories

Location	Provisions of an Act for government of a territory
Australian Antarctic Territory	s8 of the Australian Antarctic Territory Act 1954
Territory of Heard Island and McDonald Islands	s7 of the Heard Island and McDonald Islands Act 1953
Coral Sea Islands Territory (including Willis Island)	s6(1) of the Coral Sea Islands Act 1969
Ashmore Reef and Cartier Island Territory	s8 of the Ashmore and Cartier Island Acceptance Act 1933
