

The information on these pages will assist visiting foreign military forces and the Australian Defence Force when entering or returning to Australia.

We recommend you read the [frequently asked questions](#) and [cleaning requirements](#) for equipment and vehicles. It should be particularly noted that there are biosecurity risks associated with foods. [Ration packs/meals ready to eat \(MREs\)](#) require an Import Permit prior to import.

The Department of Agriculture, Fisheries and Forestry may be able to assist military forces that have a large amount of equipment coming into Australia by inspecting equipment offshore. See [Australian Defence Force](#) or [Offshore Inspections](#) or [Visiting Military](#).
