

When entering an Australian port, international vessels must comply with the:

Vessels must arrive at a first point of entry (FPOE) unless we grant prior approval to arrive at a non-first point of entry. Find out about:

- Vessels arriving at [FPOE or non-first points of entry](#)
- Biosecurity requirements for [importing goods](#).
- Biosecurity requirements for [FPOE port operators](#)
- [Ship sanitation and certification regime](#).

FPOE Determinations

Each FPOE has its own determination. This sets out what classes of vessels and goods are permitted to arrive there. Determinations also list the biosecurity entry points within the port that certain classes of vessels and goods must arrive at.

If you are a vessel's master, owner or agent, you must ensure your vessel complies with FPOE determinations.

If a port does not have a FPOE determination it is a non-first point of entry and you will need to [apply for permission to moor your vessel or unload goods](#) at that port.

To find out more about specific commodities import conditions, visit [BICON](#).

Changes to FPOE

FPOE determinations are subject to change. It is the obligation of a vessel's master, owner or agent, to ensure that the vessel complies with the current permissions and biosecurity entry points in FPOE determinations.

Please follow the links to the FPOE determinations listed below for current vessel and goods permissions, biosecurity entry points for certain classes of vessels and goods, definitions, and other important information.

You can subscribe to our [Import Industry Advice Notices](#) to stay informed of changes at FPOE.

First Points of Entry

In the headings below are tables that list the permitted first points of entry for certain classes of international vessels, e.g. commercial or non-commercial vessels and goods permissions.
