

CMR for exports was implemented by the Australian Customs Service on 6 October 2004. Customs electronic documentation system ICS replaces customs EXIT system.

CMR and SEW

- EXDOC continues to provide the SEW service for obtaining a Customs EDN through EXDOC at the same time as obtaining an RFP.
- EXDOC clients ABNs need to also be registered with ICS to use SEW.
- To check if you are registered for ICS at Customs follow the links on the [Customs website](#) Cargo Management Reengineering – ABNs – View ABNs – Search for a Specific ABN.
- To register for ICS go to the [customs website](#) - Cargo Management Reengineering - and follow the links to ICS registration.
- To use SEW contact the [EXDOC helpdesk](#) to confirm that the ABN on your Exporter Registration is the same as what is registered with ICS.

Do I need a digital certificate?

- EXDOC has a digital certificate to communicate with ICS so clients wishing to use SEW do not need to obtain their own digital certificate.
- However in the event that SEW is unavailable the department strongly advise clients to obtain a digital certificate to communicate directly with Customs.

What should I do during an outage?

- If EXDOC is unable to communicate with the ICS clients should consider having one of the following arrangements:
 - A digital certificate to communicate directly with the ICS via EDI or the Customs Interactive website
 - Nominating an agent who has a digital certificate to communicate directly with the ICS.
- If the ICS is unavailable clients will need to lodge entries manually with Customs.
 - This will need to be done in person at a Customs counter.
 - If you are a remote client who does not have direct access to a Customs counter, the department strongly advises that you nominate an agent who is able to personally lodge documentation at a Customs counter or lodge documentation via fax and email as a registered communicator with the ICS on your behalf.

If clients require further information on SEW and CMR for exports please contact the [EXDOC helpdesk](#).

If clients would like more information on ICS and CMR for exports implementation please contact the Australian Customs Service.

Phone: 1800 022 267 or [Email customs](#) or visit the [customs website](#) (and follow links to Cargo Management Reengineering).
