

This page contains important information for developers of 3rd party software who wish to utilise NEXDOC digital services within their own software offerings.

Software Development Packages

This table provides details of the software development packages for the NEXDOC system. The referenced packages contain the NEXDOC software development guide and all associated material needed to integrate 3rd party software with the NEXDOC system. Developers of 3rd party software should download and unzip the version which is appropriate for their scenario. Superseded versions are for historical reference only and should not be used for integrating with NEXDOC.

If you are a newcomer to NEXDOC and your software is not yet integrated, we highly recommend that you contact us so that we can assist you. See the [Getting Assistance](#) section for information on how to contact us.

Version	Publication Date	Vendor Date	Live Date	Version Type	Status	Comments	Package
4.0	01/05/2024	03/05/2024	TBA	Major	Proposed	Updates for Fish Commodity	{{NEXDOC 3rd Party Software Information Pack v4.0.zip 3.5 MB}}
