

Export registered egg establishments

To ensure compliance with export eligibility requirements, exporters are able to identify registered establishments approved by the department to prepare and store eggs and egg products for export.

The list of export registered establishment is available for download below. The lists are separated into processing establishments and storage establishments.

For any queries, please contact the [Dairy, eggs and fish export program](#).

The department ensures the privacy of individuals and their personal information. The department's privacy policy adheres to the Privacy Act 1988, please visit our [privacy](#) webpage for further information and a copy of the department's privacy policy.

Disclaimer: As a condition for using the establishment list, you agree that the department makes no representations or warranties regarding the establishments listed and does not accept any liability in connection with reliance on the information contained. The establishment details are provided for general information only and you should as the exporter independently verify the information in the list before relying on it. While the department has processes in place for updating the list and correcting errors found, the list is accurate of publishing and may be subject to change at any time without notice.
