

Open competitive grant opportunities

WA Roadmap Implementation Fund - Farm System Productivity Program

- Grants enabling projects aligned with the [WA Roadmap](#) to 2028, are now open on [GrantConnect](#) until 3 September 2026.

The Australian Parliament has passed laws to end live sheep exports by sea from 1 May 2028. The department will continue to regulate the export of live sheep by sea during the transition to ensure compliance with all requirements, including animal welfare.

[The assistance package](#) of almost \$140 million is designed to help sheep producers, supply chain businesses and communities to make decisions on when and how they will transition away from the live sheep export by sea trade, based on their own individual circumstances.

A range of programs co-designed with industry are now underway, providing assistance to those affected now and enhancing producer and supply chain confidence and profitability into the future.

Prepare for the transition
