

We regulate the export of organic/bio-dynamic goods from Australia. This ensures that goods:

- comply with export laws
- meet importing country requirements.

You can find out more in an [overview of our regulatory system](#).

Laws and regulations

Regulation assures our trading partners that our goods are safe to import.

Our export laws define:

- the types of regulated goods
- your obligations, if you are involved in exporting regulated goods.

We can help you understand your obligations under [Australian export laws](#).

Exporters

You are responsible for declaring your organic and bio-dynamic goods are fit for export.

New exporters

Follow our [step-by-step guide to exporting organic/bio-dynamic goods](#).

Regular exporters

Make sure you meet all [requirements for exporters of organic/bio-dynamic goods](#).

Organic certified operators

If you prepare organic and bio-dynamic goods for export, you must be certified by an approved certifying body. This includes:

- producers
- suppliers
- processors
- manufacturers
- storage facilities.

You are responsible for preparing or processing goods in line with Australian export requirements.

Read more about [being an organic/bio-dynamic-certified operator](#).

Approved certifying bodies

You are responsible for:

- assessing organic and bio-dynamic operators to determine compliance to the National Standard for Organic and Bio-Dynamic Produce and importing country requirements
- certifying organic/bio-dynamic operators/exporters as compliant with Australia's export requirements
- issuing organic goods certificates (export documentation) for consignments of organic and bio-dynamic goods exported from Australia.

You may also provide advice on export requirements to organic/bio-dynamic operators and exporters.

Read more about [approved certifying bodies](#).

Online services and systems

Check commodity export requirements in our [Manual of Importing Country Requirements \(Micor\)](#).

Stay informed

Check our [organic export industry notices](#).

We use these to inform industry of changes to:

- laws and regulations
- market access conditions
- operational requirements.

Fees and charges

All export fees and charges are detailed in [our charging guidelines](#).
