

A list of horticulture export registered establishments approved to undertake treatments for protocol markets is provided below. Not all treatment facilities are listed, only those that have given permission to be published.

The registered establishments are grouped by the types of approved treatments. The list does not include approved commodities and countries. This information must be obtained from the establishment.

The available treatment functions are listed in the Reference: [Registered operation and function codes for plant export registered establishments](#), which can found under the Establishment heading on the Plant Export Operations Manual.

If you would like your registered establishment to be added or removed from the below list please contact the [Horticulture Exports Program](#).

The register was last updated 22 May 2024. Updates (if required) will occur each month.
