

Some horticulture export registered establishment occupiers may be eligible for a reduced annual registered establishment charge for the financial year. The ‘small horticultural products registered establishment’ (SHPRE) charging rate is applied based on specific eligibility criteria.

Eligibility criteria

To be eligible as a SHPRE you must meet all 4 of the criteria set out below

- The establishment must only be used for export operations in relation to one or more of the horticultural products outlined in Table 1 during the financial year.
- The occupier of the establishment must not occupy any other registered establishment in the financial year.
- Not exceed the maximum tonnage allowance outlined in Table 1.
- The occupier must be the grower of the relevant horticultural products.

Table 1: Total amount of eligible horticultural products that can be produced, prepared and exported per financial year as a Small Horticultural Products Registered Establishment

Product	Maximum tonnage per year
Apples or pears (either or both)	400
Avocados	5
Cherries	30
Citrus	400
Cut flowers	5
Kiwi fruit	5
Leafy vegetable	10
Mangoes	100
Melons	10
Stone fruit (except cherries)	400
Strawberries or berries (either or both)	5
Table grapes	400
Vegetables other than leafy vegetables	100
All other kinds of horticultural products	5

How does the department determine my eligibility?

The department will use export activity data to determine SHPRE eligibility. Occupiers of establishments that meet the first 3 criteria will be contacted prior to the commencement of billing and will be required to confirm that they are the occupier and grower of the goods prepared for export at the establishment.

Charges

Annual establishment charges for horticulture export registered establishments are charged retrospectively at the end of the financial year. If the establishment does not meet the SHPRE eligibility criteria at any point within the financial year, the occupier will be charged the full rate for the annual registration charge, as outlined in the [charging guidelines](#) (section 6.3.2).
