

The People's Republic of China is introducing new regulations under Decree 280 that come into effect from 1 June 2026. The information on this webpage is under review. Please contact the Department at exportlisting@aff.gov.au if you have any queries. All market access advice in relation to these changes will be published on [Market Access Advice | Micor | Department of Agriculture, Fisheries and Forestry](#) and [Market access advice notices](#).

If you manufacture, process or store food products other than those specified as an 'Article 7' product, you will need to self-register your business with China through the [China Import Food Enterprise Registration \(CIFER\) system](#). These products are described under Article 9 of Decree 248.

Chinese requirements

The department has no role in CIFER registration and its management for Article 9 products.

The CIFER system is administered by the General Administration of Customs of the People's Republic of China (GACC) and the department has no oversight of the system nor the information submitted. Any applications submitted through the CIFER system may be accepted by GACC at their discretion.

Manufacturers, processors and cold storage establishments have found the following steps useful when accessing the CIFER system for the first time:

- Access the CIFER system
- Create a CIFER account
- Log in and review the operation manual
- Review FAQ
- Submit an 'application for registration'
- Contact GACC for technical support or work with their peak industry body and importer to troubleshoot.

See also: [Using the CIFER system](#)

Manufacturers, processors and cold storage establishments are responsible for ensuring their own details are correct and that approved products on CIFER are up-to-date and accurate through 'application for modification'. They are encouraged to work with their importer to navigate any challenges with registration or to [contact GACC](#) directly.

List of Article 9 products

This list is not exhaustive and in general if the product to be exported is not an Article 7 product, then it is most likely an Article 9 type product.
