

Date of issue: 20 July 2026

This notice provides guidance on how to use the print indicator for generating and receiving meat certificates to avoid potentially unnecessary replacement certificate charges.

Key points

- NEXDOC offers options when an export certificate can be generated and printed.
- If 'automatic' is selected, the certificate will be generated and immediately sent to print. Any changes or amendments made after the certificate has printed may incur a replacement certificate charge.
- To control when the certificate is sent to the printer, clients can select 'hold'. This allows changes to be made prior to the certificate being printed, thus not incurring any potential replacement certificate charges. Once satisfied that no further changes are required, 'release to print' can then be selected. This will ensure that only the original certificate is charged and not a replacement certificate.

Print indicator selection

The print indicator in NEXDOC allows the client to control when a certificate can be generated and printed.

If 'automatic' is selected, the certificate will automatically generate and print once the REX reaches COMP status.

- If printing to a regional office, the certificate will automatically print at that location and the usual collection procedure applies. However, for REXs to date-sensitive markets that require a vet signature and/or cross outs, having the certificate automatically print outside of normal business hours may impact the department's ability to issue the certificate to meet importing country requirements (e.g. same day signature or signature prior to departure).
- Automatic printing may also result in certificates moving to COMP before exporters can amend fields intended for completion later in the supply chain (i.e. certificates may reach COMP and will print before fields containing 'tbc' can be amended).
- If using your own printer, the certificate will automatically generate but the print button will need to be selected on the certificate screen to direct it to the printer.

If 'hold' is selected, the certificate will remain in draft and the REX will remain at 'Certificate Ready' (CTRD) status until it is ready to be generated and printed.

To generate the certificate, select 'release to print' on the REX page. This will push the REX from CTRD status to COMP status.

The options for the print indicator and print destination are selected when lodging the REX. These options are contained within the Additional Details tab. NEXDOC will show the available options based on the incoming country requirements selected at the start of the REX application.

More information

For further information, refer to [Printing in the NEXDOC portal](#) or contact the [NEXDOC Helpdesk](#).

Date of issue: 7 July 2026

This notice reminds exporters and businesses of key NEXDOC setup requirements for meat exports, including remote print, client group tokens, and halal certifying bodies.

Enabling remote print for all client groups

Exporters and businesses finalising their NEXDOC setup for meat exports should ensure remote print has been selected for each relevant client group where certificates will be printed from business premises. Remote print permissions are managed at the client group level and must be requested for each applicable client group. This includes adding the meat commodity to your existing account.

If remote print has not been selected for all your client groups, exporters and businesses will be unable to print certificates on their own printer and they will be required to access printing through a departmental regional office, subject to importing country requirements.

To check that your client group has remote print, refer to [Manage your details user guide](#) or [How to add a new commodity to my existing profile user guide](#).

Identify your client group and member tokens

Client group tokens, client group IDs and member tokens, are generated automatically in NEXDOC. These details are required to connect third-party software to NEXDOC and to enable individual client group members to use that software. Instructions on locating these details are provided in the [Locate your client group token and ID user guide](#).

Halal certification changes

If you select your product as halal, you are required to provide an approved certifying body in NEXDOC, irrespective of whether a halal certificate is required. This is a change from EXDOC. This requirement applies to all halal product lines and should be confirmed before submitting a Request for Export. The [fact sheet for Halal Certifications](#) has been updated to clarify this change.

More information

For further information, refer to the [NEXDOC meat user guides](#) or contact the [NEXDOC Helpdesk](#).

Date of issue: 24 June 2026

Attention

- Meat exporters, meat establishments, exporter agents, and freight forwarders, approved Islamic organisations, and organic approved certifying bodies.
- Central and regional offices of the Department of Agriculture, Fisheries and Forestry (the department).

Purpose

To inform stakeholders that:

- The Next Export Documentation (NEXDOC) system will replace the Export Documentation (EXDOC) system for meat export documentation from Monday 6 July 2026; and
- There are critical EXDOC documentation cut-off dates.

Key points

- NEXDOC will become available for lodgement of meat export documentation requests and will issue meat export certification from Monday 6 July 2026.
- EXDOC Requests for Permit (RFPs) for China must be completed and certificates printed by 5.00pm AEST Friday 3 July 2026.
- RFPs for countries other than China may be lodged in EXDOC until 5.00pm AEST Sunday 5 July 2026.
- Exporter Declaration Numbers (EDNs) obtained via the EXDOC Single Electronic Window (SEW) cannot be transferred to NEXDOC.
- RFPs for countries other than China have until Friday 31 July 2026 to be completed, provided they were lodged (at initial (INIT), final (FINL), inspected (INSP), or health certificate ready (HCRD) statuses) by 5.00pm AEST Sunday 5 July 2026.
- If you are an existing EXDOC Approved Quality Assurance (AQA) holder, you MUST [register in NEXDOC](#) before applying for [Approved Export Permit Declarant \(AEPD\)](#) status.
- NEXDOC brings new functionality that will support industry, including introducing changes to certification such as printing on plain paper and the introduction of QR codes.
- Some terminology and processes will change. An EXDOC RFP is referred to as a Request for Export (REX) in NEXDOC. More information about the transition from EXDOC to NEXDOC can be found in [NEXDOC – What's changing](#).

Transition period

- From Monday 6 July 2026, meat exporters (or their agents) must lodge new export documentation requests for meat and meat products in NEXDOC.
- RFPs for destination countries other than China that were at INIT, FINL, INSP, or HCRD statuses must be completed and certificates printed by 5.00pm AEST Friday 31 July 2026.
- RFPs for China must be completed and certificates printed by 5.00pm AEST Friday 5 July 2026

- During this transition period, you must ensure that:
 - EXDOC certificates continue to be printed on security paper.
 - NEXDOC certificates are printed on plain white paper.
- Further information about NEXDOC certificate changes can be found at [NEXDOC - FAQs Certificate changes](#).

Consignments to the People's Republic of China – hard cut-off

- Goods departing for China on or before 5 July 2026 must be at complete (COMP) status with certificates printed prior to 5.00pm AEST Friday 3 July 2026.
- EXDOC certificates printed after this time may not be accepted by China's import authorities and the department is unlikely to be able to facilitate clearance at the border.
- You will not be able to lodge a REX for goods that have already departed.
- If you require replacement of an EXDOC certificate, please email the EXDOC Helpdesk at exdoc.helpdesk@aff.gov.au

Consignments to countries other than China

- There is a transition/grace period for other importing countries.
- Other countries will not accept EXDOC certification dated after Friday 31 July 2026.
- RFPs must be set to complete (COMP) status and certificates printed in time for the goods to be cleared by the importing country.
- RFPs in EXDOC not at COMP status by 5.00pm AEST Friday 31 July 2026 will be forfeited.

SEW to the Integrated Cargo System (ICS)

NEXDOC, like EXDOC, offers an SEW service for requesting and updating export declarations in the Australian Border Force's ICS. However, the EXDOC RFP and NEXDOC REX services are separate. This means that:

- EDNs cannot be transferred from EXDOC RFPs to NEXDOC REXs.
- Meat exporters remain responsible for managing EDNs as per [ABF requirements](#).

Actions for organic exporters and halal certifiers

There is no change to the lodgement, endorsement, and signing procedures for the organic export sector as well as halal certification operations for approved Islamic organisations (AIOs).

AIOs should note the key dates detailed in this notice and work with exporters to ensure halal certificates are printed, endorsed, and signed in accordance with these dates.

Reminder to register NOW

To continue exporting without disruption, all meat exporters, establishments, EXDOC RFP Declarants (AQA users), and third-party software (EDI) users must ensure their relevant registrations and approvals are completed in NEXDOC before Monday 6 July 2026.

Failure to completely and fully register for NEXDOC before Monday 6 July 2026 means users will not be able to access the system and exporters will NOT be able to export.

Businesses need to register now to allow sufficient time for account setup, validation, and approval processes. Further information on how to register may be found at [Registrations open for NEXDOC meat](#).

Late registrations will be available, however processing times will impact the ability to export.

Approved Export Permit Declarant (AEPD)

Request for Permit (RFP) Declarants, known as AQA users in EXDOC, will become AEPDs in NEXDOC. AQA IDs used in EXDOC will not be transferred. Each declarant must apply for [AEPD for Meat](#) and for each establishment where declarations will be made.

Once approved, the AEPD permission will be added to the individual's user account for each approved establishment. ID's will not be issued as they are no longer necessary.

Anyone who intends to lodge export declarations for meat in NEXDOC must apply for an AEPD. To do this, an applicant must create a NEXDOC account before applying for an AEPD. Further information can be found at [NEXDOC Approved Export Permit Declarant \(AEPD\)](#).

Working with third-party software providers

Exporters and agents who lodge export documentation using third-party software must engage with their software provider as early as possible to confirm readiness for NEXDOC. While the department is working closely with all identified software vendors to support their transition, businesses remain responsible for ensuring their registrations and software connections are in place before the transition date. Delays in engaging with software providers or using incomplete third-party software prior to transition may result in the inability to lodge export documentation in NEXDOC.

Date of issue: 24 June 2026

Attention: Important Announcement – Go live Date for Meat and Meat Products into NEXDOC

We wish to advise that the go live date for Meat and Meat products transitioning to NEXDOC is scheduled for Monday 6 July 2026.

Further details on the transition, including key dates, can be found in IAN 2026-26 - NEXDOC – Meat and Meat Products into NEXDOC – EXDOC Cut Off Dates.

Ensure that your NEXDOC registration is complete. For further information on [registration requirements](#) and the [NEXDOC benefits and changes](#), please visit our [fact sheets](#). There you'll find guidance on how to register, what's changing, and resources to support the transition.

Support is available throughout this process. If you have questions or require assistance, please reach out to the [NEXDOC Helpdesk](#) or participate in our scheduled [drop-in sessions](#).

Date of issue: 10 June 2026

Important Announcement – Change to the NEXDOC Go Live Date for Meat

We wish to advise that the go live date for Meat and Meat products transitioning to NEXDOC, scheduled for Monday 15 June 2026, has been delayed for a short period.

A new date will be communicated shortly. Please continue to raise your export documentation in EXDOC until further notice.

Ensuring your registration is up to date is still important. For further information on [registration requirements](#) and the [NEXDOC benefits and changes](#), please visit our [fact sheets](#). There you'll find guidance on how to register, what's changing, and resources to support the transition.

Support is available throughout this process. If you have questions or require assistance, please reach out to the [NEXDOC Helpdesk](#) or participate in our scheduled [drop-in sessions](#).

The information provided in this advice is current at the time of writing and is intended for use as guidance only and should not be taken as definitive or exhaustive. The Commonwealth endeavours to keep information current and accurate, however, it may be subject to change without notice. Exporters are encouraged to verify these details with their importers prior to undertaking production/exports. The Commonwealth will not accept liability for any loss resulting from reliance on information contained in this notice.

Delays in engaging with software providers or using incomplete third-party software prior to transition may result in the inability to lodge export documentation in NEXDOC.

Date of issue: 8 April 2026

Important Announcement – Change to the NEXDOC Go Live Date

We wish to advise that the go live date for Meat and Meat products transitioning to NEXDOC, originally scheduled for Monday 20 April 2026, has been moved to Monday 15 June 2026.

This adjustment follows consultation with industry partners and careful consideration of feedback received. The revised date will allow additional preparation time.

For further information on [registration requirements](#) and the [NEXDOC benefits and changes](#), please visit our [fact sheets](#). There you'll find guidance on how to register, what's changing, and resources to support the transition.

We strongly encourage all users to contact their software providers and take this opportunity to thoroughly test their software ahead of the new go live date. Early engagement and proactive testing will help ensure a smooth transition.

Support is available throughout this process. If you have questions or require assistance, please reach out to the [NEXDOC Helpdesk](#) or participate in our scheduled [drop-in sessions](#).

Date of issue: 3 April 2026

Attention

- All EXDOC registered users and EDI users
- Department of Agriculture, Fisheries and Forestry (the department) – all users of EXDOC

Purpose

This notice advises the unplanned system outage impacting the Export Documentation System (EXDOC) has been resolved.

Key points

- The previous outage impacting the progression of Requests for Permit (RFPs) from HCRD to COMP status, affecting certificates being printed remotely and in regional offices has been resolved as around 10.30pm AEDT, Thursday 2 April 2026.
- RFPs that were unable to progress during the outage have now been pushed to COMP status and certificates have printed.
- Exporters and EDI users are now able to progress their own RFPs to COMP, where appropriate.
- Where certificates are set to print in a regional office, consignments to markets requiring certificates to be issued prior to departure will be prioritised.
- Remote users can expect certificates to have printed.
- For those needing to collect certificates at a regional office, please follow the below steps:

After-hours collection at regional offices

Clients requiring urgent, prior-to-departure certificate collection must submit an overtime request to foodexports@aff.gov.au using the following subject line:

Client Query – Overtime Request – Collection – RFP number – Exporter name – Day/Date – Regional office

To ensure efficient collection:

- All RFP applications must be complete (status COMP).
- A completed collection list must be emailed to Food Exports using the subject line above.
- Clients must wait for written confirmation from Food Exports that certificates are ready before attending the regional office.
 - Please take note of any pickup instructions as processes/building access arrangements can change outside of business hours.

Please note overtime charges will NOT apply for out of hours collections.

Date of issue: 24 February 2026

Purpose

To advise that NEXDOC Meat is replacing EXDOC Meat from 20 April 2026 and that NEXDOC meat registrations are now open.

This notice explains the registration steps required in NEXDOC for meat exports. It outlines what exporters, third-party software users, and AQA (RFP Validator) users must do before the transition from EXDOC.

What's changing

- Registrations are now open for NEXDOC for meat export documentation. Information can be found on [NEXDOC benefits and changes](#)
- Please be advised that the department will soon transition from [Online Services](#) to the [Export Service](#). We strongly recommend verifying your identity with [myID](#) when registering for Online Services. This will assist in a smoother transition when the time comes to register on the Export Service to connect to NEXDOC.

Registration requirements and process

To continue exporting meat or playing your role in meat export documentation after the transition, businesses must complete the relevant registrations in NEXDOC.

Online Services Account

Before registering, all users must first create an [Online Services account](#) and use it to access the NEXDOC portal. Once a user has an account, they can register an Exporter, a Client Group, be added to a Client Group or request to become an Approved Export Permit Declarant.

Exporter registration

- Identifies a business as the legal owner of goods and ensures exporter details appear correctly on export documentation.
- The person who registers an exporter in NEXDOC must first create an [Online Services account](#), after which they can access the NEXDOC portal to create an exporter account. See user guide NEXDOC – Create a NEXDOC Exporter account on the [NEXDOC help page](#).

Note: NEXDOC exporters can lodge export requests directly via the NEXDOC portal, without using third-party software. However, NEXDOC portal users must complete the entire request for export themselves and may only print certificates on their own printer or at a regional office.

Client Group registration (equivalent to EDI users in EXDOC)

- Required for businesses submitting through third-party software, whether to submit/lodge/amend/authorise/print meat export documentation in NEXDOC.

- Client Group registration links an organisation to NEXDOC for submissions, enables set up of third-party software, and management of users and permissions.
- To register as a Client Group in NEXDOC, a company representative must first create an [online services](#) account, after which they can register the client group. See user guide [How to register as a Client Group on the NEXDOC help page](#).

Client Group Members (individuals who use third-party software)

- Any individual who will use a company's third-party software must have an [Online Services account](#) and be a Client Group member before they can use third-party software.
- Once an individual has their online services account, the Client Group administrator can add them to the Client Group.

Client Group registration

Required for businesses lodging through third-party software.

Approved Export Permit Declarant (AEPD, formerly AQA in EXDOC)

- EXDOC AQA IDs used will not be carried over into NEXDOC.
- If you are an active EXDOC AQA User and you will continue to authorise meat exports in NEXDOC, you must register as an Approved Export Permit Declarant (AEPD):
 - First, create an [Online Services account](#).
 - If you are acting for a company that uses third-party software, have the NEXDOC Client Group Administrator add you to the Client Group.
 - If you are acting for an exporter establishment that is using the NEXDOC Portal only, have the NEXDOC Exporter administrator add you as a user to the exporter registration.
 - Submit an [Approved Export Permit Declarant \(AEPD\) application form](#) for each establishment for which you will be authorising REXs.

Note: The department will only approve an application if you are listed in that establishment's Management and Control.
- First, create an

Note: You must be listed in Management or Control and possess an active AQA ID that is linked to the establishment(s) you submit AEPD applications for. If you are not listed, your establishment must amend their registration to have you listed in Management or Control and have it approved before your AEPD status can be activated.

More information can be found here:

- [Change people in management or control | Export Service](#)
- [Fact sheet - Approved Export Permit Declarant \(AEPD\) on the Meat and Meat Products Transition to NEXDOC page](#).

Important notes

- A date for transition as well as transition advice will be announced soon; please ensure you subscribe to any departmental notices to keep across the transition.
- Use Chrome or Edge to access the NEXDOC portal. Internet Explorer is not supported.
- Exporters who use third-party software must register both an exporter account and a client group account.
- You must print NEXDOC certificates on plain paper only. Do not reproduce multiple copies. Misuse may result in detained consignments.
- If you utilise third-party software, we recommend engaging with your third-party software transition.

Frequently Asked Questions (FAQs)

Q1. I am an exporter and I use third-party software. What do I need to do?

You must register a Client Group in NEXDOC and ensure your business is also registered as an Exporter. Client Group enables you to connect with third-party software.

Q2. I have an EXDOC AQA ID—do I still use it?

No. NEXDOC does not use AQA IDs. Each declarant must have an Online Services account, be linked to the correct organisation, and have AEPD status activated for each establishment.

Q3. I work across multiple establishments. Do I need to submit multiple AEPD forms?

Yes. You must submit a separate AEPD application for each establishment where you will make declarations.

Q4. What happens if I don't register before go-live?

You will not be able to lodge or declare in NEXDOC until all relevant registration and validation are complete. Late registrations will be supported, but delays will likely occur.

Q5. Do I need to register if I'm already in NEXDOC for another commodity?

Yes. You must add Meat to your existing Exporter and/or Client Group registrations. If you export beef, sheep, or goat meat, you must also ensure that your meat licence and shipping mark prefix are recorded in your NEXDOC exporter registrations.

Q6. What browsers can I use for the NEXDOC Portal?

Use Google Chrome or Microsoft Edge. Internet Explorer is not supported.

Q7. Will certificates look different?

Yes. Certificates will be printed on plain A4 paper and include a QR code for security. Blue security paper will no longer be used.

Q8. Can I use the NEXDOC portal instead of my software?

Yes, if you are registered as an exporter, you can lodge requests directly through the NEXDOC portal. However, please note that the portal does not include all the functionality available in third-party software. For example, features such as forwarding a Request for Export (REX) between users such as

to print your certificate in your freight forwarders office are only available through integrated software solutions.

Q9. Does the department work with third-party software providers during this transition?

Yes. The department is actively engaging with all identified software vendors to ensure their systems are ready for NEXDOC Meat. We provide technical specifications, testing environments, and ongoing support to help vendors implement the required changes. However, it is important that exporters and agents also engage directly with their software provider early to confirm requirements and avoid delays.

Q10. I am an Automated Export Permit Issuer (AEPI) for another commodity (Dairy, Eggs or Fish). Do I need to register separately for AEPD for meat?

Yes. Even if you already hold AEPI status for another commodity in NEXDOC, you must submit a separate AEPD application for meat. This is because AEPD permissions are linked to specific establishments and those listed must be in Management and Control.

Support and resources

Fact sheet and further information: are available on our [Meat and Meat Products Transition to NEXDOC](#) page.

Dedicated webinar sessions that provide structured information and guidance on specific topics relating to NEXDOC: details will be published shortly.

Help guides: are available on our [NEXDOC help](#) page.

Email: NEXDOC@aff.gov.au

Date of issue: 16 July 2025

Attention

- EXDOC registered exporters, manufacturers, agents, freight forwarders
- NEXDOC registered exporters, manufacturers, agents, freight forwarders
- Department of Agriculture, Fisheries and Forestry (the department) - Central and Regional offices

Purpose

This Industry Advice Notice (IAN) advises Export Documentation System (EXDOC) and Next Export Documentation (NEXDOC) users of a planned system outage and what they can do to minimise disruption to their exports.

Key points

- The department has planned system maintenance that may result in an outage to EXDOC and NEXDOC certificates printing in departmental regional offices.

- This system maintenance will occur between Thursday 17 July 2025 8pm and Friday 18 July 2025 5am (AEST).
- Certificates sent for printing in regional offices during this time may not be printed.

What you can do

Please allow extra time to manage your export documentation ahead of the outage or schedule it to be printed in regional offices after the outage window.

Further information

If you have any questions regarding this IAN, please contact the NEXDOC or EXDOC Helpdesk:

- Email: EXDOC.Helpdesk@aff.gov.au
- Email: NEXDOC@aff.gov.au
- Phone: 02 6272 4800.

Date of issue: 12 June 2025

Attention

- NEXDOC registered exporters, manufacturers, agents, freight forwarders
- Department of Agriculture, Fisheries and Forestry (the department) - Central and Regional offices

Purpose

This Industry Advice Notice (IAN) advises Next Export Documentation (NEXDOC) users of a planned system outage and what they can do to minimise disruption to their exports.

Key points

- The department has planned NEXDOC system maintenance that will require an outage to complete.
- NEXDOC will be unavailable between Sunday 15 June 11.00pm – Monday 16 June 1.00am (AEST).
- While unlikely, if there are issues, the outage may extend up to 3:00am Monday 16 June 2025 (AEST).

What you can do

If you require export documents from NEXDOC dated Sunday 15 June, please ensure you obtain them before the outage.

Further information

If you have any questions regarding this IAN, please contact the NEXDOC Helpdesk:

- Email: NEXDOC@aff.gov.au
- Phone: 02 6272 4800.

Date of issue: 9 May 2025

Attention

- Export Documentation System (EXDOC) EDI users
- Exporters who use EXDOC to obtain export permits or government certification for their agricultural products
- Department of Agriculture, Fisheries and Forestry (the department) - Central and Regional offices

Purpose

This Industry Advice Notice (IAN) advises Export Documentation (EXDOC) users of planned systems maintenance on 10-11 May 2025 that may cause intermittent EXDOC outages.

Outage details

- The department has planned systems maintenance from 00:00 Saturday 10 May to 23:59 Sunday 11 May 2025 (AEST).
- EXDOC may be unavailable intermittently during the following periods:
 - 00:00 to 08:00 (AEST) on Saturday 10 May 2025
 - 16:00 to 23:59 (AEST) on Sunday 11 May 2025 (AEST).
- Outages should range from 3 to 15 minutes but could extend up to an hour.

Impacts

- The maintenance work will not affect your software.
- Messaging sent to EXDOC while it is unavailable will queue. EXDOC will process all queued messaging on resumption.

What you can do

Please note the expected system outage timings.

Where possible, ensure that you have all certificates, permits, and clear export declarations for time-sensitive exports prior to the outage windows. Otherwise, please allow extra time to manage your export documentation.

Further information

If you have any questions regarding this IAN, please contact the EXDOC Helpdesk:

- Email: EXDOC.helpdesk@aff.gov.au
- Phone: 02 6272 4800

Date of issue: 2 May 2025

Attention

- NEXDOC registered exporters, manufacturers, agents, freight forwarders
- Department of Agriculture, Fisheries and Forestry (the department) - Central and Regional offices

Purpose

This Industry Advice Notice (IAN) advises Next Export Documentation (NEXDOC) users of a planned system outage and what they can do to minimise disruption to their exports.

Key points

- The department has planned NEXDOC system maintenance that will require an outage to complete.
- NEXDOC will be unavailable Sunday 4 May 8.00pm - 10.00pm (AEST).

What you can do

If you require export documents from NEXDOC dated Sunday 4 May, please ensure you obtain them before 8:00pm AEST.

Further information

If you have any questions regarding this IAN, please contact the NEXDOC Helpdesk:

- Email: NEXDOC@aff.gov.au
- Phone: 02 6272 4800

Attention

- All NEXDOC portal and NEXDOC third party software users, all EXDOC EDI users, and all exporters who obtain documentation through either EXDOC or NEXDOC.
- Department of Agriculture, Fisheries and Forestry (the department) – all users of NEXDOC.

Purpose

This notice advises of IT systems and infrastructure maintenance this weekend and the impacts on Next Export Documentation System (NEXDOC) users Export Documentation System (EXDOC) users.

Key points

- The department is doing planned infrastructure maintenance on Saturday 29 March. This WILL NOT affect either EXDOC or NEXDOC users.
- There will be a NEXDOC outage between 21:00 and 23.59pm AEDT on Sunday 30 March 2025 while the department upgrades the system.

What you can do

If you require export documents from NEXDOC dated Sunday 30 March, please ensure you obtain them before 21:00 AEDT.

Further information

The department apologises for any inconvenience caused by the Sunday upgrade.

If you have any queries regarding urgent cargo, please call 02 6272 4800 and leave a call back number on the after-hours voicemail.

Attention

Exporters and freight forwarders with Request for Permit (RFP) certificates, Request for Export (REX) certificates, or manual certificates set to print in, obtain signature, or collect from the Brisbane office.

Purpose

This industry advice notice (IAN) is to advise exporters and freight forwarders that the Brisbane office will return to normal services from 9am AEST Tuesday 11 March 2025 and that certification services will resume printing and can be collected in the Brisbane office.

Key points

- From 9am AEST on Tuesday 11 March 2025, the Brisbane office will reopen for business as usual.
- EXDOC and NEXDOC certificates will resume printing in the Brisbane office as at 9am AEST Tuesday 11 March 2025.
- Certificate collection and manual certification arrangements will return to normal at this time.

What you should do

- If you had a EXDOC or NEXDOC certificate print from Thursday 6 March to 9am AEST Tuesday 11 March 2025 with Brisbane office as its print location, your certificate has printed at another office location.
Please refer to [IAN-25-11](#) for details on where your certificate has printed and what to do to obtain your certificate if you have not done so already.
- For all other certificates, please return to normal practice.

Further information

If you have any queries, please email the Export Systems Helpdesk at EXDOC.helpdesk@aff.gov.au or NEXDOC@aff.gov.au

Who does this notice affect?

Exporters who use the Export Documentation System (EXDOC) or the Next Export Documentation System (NEXDOC) to obtain export declarations (EDNs) from the Australian Border Force's (ABF) Integrated Cargo System (ICS) are affected.

Outage details

The outage affecting the ICS from approximately 11.30 AEDT has resolved.

Residual impacts

- The ICS is working through a backlog of response messaging to EXDOC and NEXDOC.
- New messaging is being processed without delay.

What you should do

- After allowing some time for the backlog to process, please check that you have your EDN and that any amendments are confirmed. For example, if you have changed the date of departure, please check that you have received a successful ICS response in your messaging.

Further information

If you have not received your EDN or if your updates have not gone through, please contact the Export Systems Helpdesk on exdoc.helpdesk@aff.gov.au or nexdoc@aff.gov.au.

Who does this notice affect?

Exporters who use the Export Documentation System (EXDOC) or the Next Export Documentation System (NEXDOC) to obtain export declarations (EDNs) from the Australian Border Force's (ABF) Integrated Cargo System (ICS) are affected.

Outage details

The ICS has been unavailable to external users since approximately 11.30 AEDT.

- The ICS is not receiving messaging from external clients, including from the department's EXDOC and NEXDOC systems.
- External users cannot access the ICS user interface.

Impacts

- Exporters are unable to obtain or update EDNs in the ICS, whether direct or via EXDOC or NEXDOC.
- The Export Systems Helpdesk is unable to assist with EDNs while the outage is current.

What you can do

You can check for ICS updates on the ABF website: [ICS Performance - ICS Notification Service \(abf.gov.au\)](#).

Resolution and updates We will update when the outage resolves or if more information becomes available.

For advice regarding your RFP or REX, you can contact the Export Systems Helpdesk on exdoc.helpdesk@aff.gov.au or nexdoc@aff.gov.au.

Attention

- Exporters and freight forwarders with Requests for Permit (RFP), Request for Export (REX) certificates or manual certificates set to print in, obtain signature, or collect from the Brisbane regional office on Thursday 6, Friday 7, and Monday 10 March 2025.

Purpose

This industry advice notice (IAN) is to advise exporters and freight forwarders of contingency arrangements for certification services usually provided by the Brisbane office on Thursday 6, Friday 7, and Monday 10 March 2025.

Summary

Tropical Cyclone Alfred is expected to cross the coast early Saturday morning, with landfall between Noosa and Coolangatta.

At this stage, the Brisbane office is closed. The department is redirecting all EXDOC and NEXDOC certificates with a Brisbane office print location to other offices. Manual certificates will also print in another regional office.

Key points

- Tropical Cyclone Alfred is expected to cross the coast early Saturday morning, between Noosa and Coolangatta.
- The Brisbane office is currently closed until further notice.
- Please defer certificate printing for the Brisbane office that is not time critical.
- All EXDOC and NEXDOC certificates that have the Brisbane office as the print location have been directed to print in other offices until further notice.
 - EXDOC horticulture and grain certificates are printing in the Perth office.
 - All other EXDOC certificates and all NEXDOC certificates are printing in the Sydney office.
- The Melbourne office is managing all requests for manual certificates that would otherwise be collected from the Brisbane office. Please note that Monday 10 March is a public holiday in Melbourne so if you require urgent manual certification for Monday 10 March, please contact foodexports@aff.gov.au to discuss your individual requirements.
- While these temporary measures are in place, to receive export documents please follow the below processes when your requests have been authorised –
 - To collect documents from the relevant regional office, please email foodexports@aff.gov.au with subject title 'Collection, Location of regional office, Date of Departure, RFP/Manual certificate type, Commodity, Destination country, Exporter' as the subject of the email. A collection list must be attached.
 - Alternatively, call 1800 090 900 for further options.
- To collect documents from the relevant regional office, please email
- These arrangements will be in place until at least close of business Monday 10 March 2025 and until further notice.

Further information

The department will publish updates on contingency arrangements as information becomes available.

If you have any queries, please email the Export Systems Helpdesk at EXDOC.helpdesk@aff.gov.au or NEXDOC@aff.gov.au

Attention

- Exporters and freight forwarders with Requests for Permit (RFP), Request for Export (REX) certificates or manual certificates set to print in, obtain signature, or collect from the Brisbane regional office on Thursday 6 and Friday 7 March 2025

Purpose

This industry advice notice (IAN) advises exporters and freight forwarders that due Tropical Cyclone Alfred, the Brisbane office will be impacted on Thursday 6 and Friday 7 March. This affects printing, signing, and collection of certificates.

Summary

Tropical Cyclone Alfred is expected to cross the coast early Friday morning, with landfall between Maroochydore and Coolangatta.

EXDOC and NEXDOC certificates will not print in the Brisbane office on either Thursday 6 or Friday 7 March. Any certificates that have the Brisbane office as the print location will be redirected to print in another office.

For urgent certificate collections from Brisbane office on Thursday 6 March, please call 1800 900 090 as soon as possible.

Key points

- Tropical Cyclone Alfred is expected to cross the coast early Friday morning, most likely between Maroochydore and Coolangatta.
- The Brisbane office will have limited operations on Thursday 6 March and be closed on Friday 7 March.
- If you urgently require a NEXDOC or EXDOC certificate from the Brisbane office this week, please print by close of business today, Wednesday 5 March. For urgent Thursday 6 March collections please call 1800 900 090 as soon as possible to discuss options.
- Any EXDOC or NEXDOC certificate sent to print on Thursday 6 or Friday 7 March with Brisbane office as the print location will be directed to print in another regional office.

Further information

The department will publish updates on certification contingency arrangements as information becomes available.

If you have any queries, please email the Export Systems Helpdesk at EXDOC.helpdesk@aff.gov.au or NEXDOC@aff.gov.au

Attention

- All exporters, EXDOC EDI users, NEXDOC portal and NEXDOC third party software users
- Department of Agriculture, Fisheries and Forestry (the department) – all users of EXDOC or NEXDOC

Purpose

This notice advises Export Documentation System (EXDOC) and Next Export Documentation (NEXDOC) users of a planned system outage on Sunday 16 February 12am-5am AEDT.

Summary

There will be an EXDOC and NEXDOC outage on Sunday 16 February 12am-5am (AEDT).

The outage is due to a major upgrade to part of the department's infrastructure. Due to the scale of the work, there may be residual impacts which the department will work through as a matter of priority on the day.

We recommend exporters have their export documentation complete by Saturday 15 February 2025.

Key points

- EXDOC and NEXDOC will be unavailable Sunday 16 February 12am-5am AEDT.
- There may be residual impacts to be resolved through the day.
- If you require export documents for 16 February 2025, please obtain them in advance.

Further information

The department apologises for any inconvenience caused by this upgrade.

If you have any queries, please email the export systems help desk at EXDOC.helpdesk@aff.gov.au or NEXDOC@aff.gov.au

Date of issue: 6 February 2025

Attention

- Exporters and freight forwarders with Requests for Permit (RFP), Request for Export (REX) certificates or manual certificates set to print in the Brisbane regional office
- Department of Agriculture, Fisheries and Forestry (the department) - Central and Regional offices

Purpose

This industry advice notice (IAN) advises exporters and freight forwarders of a network outage affecting the Brisbane regional office, affecting email, phones, and printing of certificates.

Key points

- The Brisbane regional office has limited services due to a network outage affecting phones, emails, and printing of certificates.
- Certificates have not printed since approximately 8.50 AEST.
- Emailed collection requests are being received, but slowly.

What you can do

- If you have sent a certificate to print at the Brisbane office before 8.50 AEST, you can submit collection requests using the normal method. Please note, however, that emails are running slowly.

- If you have sent a certificate to print after 8.50 AEST and require it today, the department is working through alternative options and will provide further advice shortly.
- If you do not require a certificate from the Brisbane office today, please do not send your certificate to print. That is, do not COMP your RFP or REX.
- You may also consider sending your RFP or REX to print at a different regional office and arranging collection from there.

The process for collection of certificates can be found under Receive export documents section at [Request export documents](#).

Further information

The department apologises for any inconvenience caused by this outage. This issue is being addressed as a critical priority.

We will issue a further notice when we have an update on the outage or alternative arrangements.

If you have any queries, please email EXDOC.helpesk@aff.gov.au.

Date of issue: 3 February 2025

Attention

- Exporters and freight forwarders with Request for Permit (RFP) certificates, Request for Export (REX) certificates, or manual certificates set to print in the Adelaide regional office
- Department of Agriculture, Fisheries and Forestry (the department) - Central and Regional office

Purpose

This industry advice notice (IAN) advises exporters and freight forwarders that infrastructure issues at the Adelaide regional office have resolved, and the office will reopen on Tuesday 4 February 2025. Printing and collection of certificates will resume when the office reopens.

Key points

- As advised in IAN 2025-6, the Adelaide office has had limited services on Monday 3 February 2025 due to challenges with infrastructure.
- The infrastructure issues have been resolved and the Adelaide office will return to business-as-usual on Tuesday 4 February.
- From Tuesday 4 February, exporters and freight forwarders can resume sending certificates to print at the Adelaide office and arranging for collection as per usual practice.

Further information

The department apologises again for any inconvenience caused by this closure.

If you have any queries, please email EXDOC.helpesk@aff.gov.au.

Date of issue: 3 February 2025

Attention

- Exporters and freight forwarders with Requests for Permit (RFP), Request for Export (REX) certificates or manual certificates set to print in the Adelaide regional office
- Department of Agriculture, Fisheries and Forestry (the department) - Central and Regional office Purpose

This industry advice notice (IAN) advises exporters and freight forwarders of challenges with infrastructure in the Adelaide regional office which has led to limited services. This affects printing and collection of certificates.

Key points

- The Adelaide regional office has limited services due to challenges with infrastructure.
- There will be limited capacity from 3pm ACDT today, 3 February 2025, for collection of certificates from the Adelaide regional office. Please ensure you provide collection lists in sufficient time to allow certificates to be processed.
- The department will enact alternative arrangements should the situation continue beyond today.

What you can do

- If you require a certificate today from the Adelaide office, please submit collection requests using the normal method for urgent or time sensitive export certificates.
- If you do not require a certificate today, please do not authorise your RFP/REX or send through a manual certificate for printing at the Adelaide office until further notice.
- Alternatively, you can direct your certificates to print at another regional office and arrange collection from there.

The process for collection of certificates can be found under Receive export documents section at [Request export documents](#).

Further information

The department apologises for any inconvenience caused by this closure.

We will issue a further notice when we have an alternative arrangement for in-Adelaide certificate collection, or the Adelaide office reopens.

If you have any queries, please email EXDOC.helpesk@aff.gov.au.

Date of issue: 24 January 2025

Dates of effect: 10 February 2025

Attention

- Registered exporters, manufacturers, agents, freight forwarders
- Department of Agriculture, Fisheries and Forestry (the department) - Central and Regional offices.

Purpose

This industry advice notice (IAN) provides an update to IAN [2025-03](#) regarding the transition of Other Goods to [NEXDOC](#).

Key points

- The department previously issued industry advice notice [2025-03](#) which advised that Other Goods certificates for the Republic of Korea (South Korea) would move to the Next Export Documentation System (NEXDOC) on 10 February 2025.
- This IAN advises that Other Goods to South Korea will not transition to NEXDOC on 10 February 2025. The transition has been moved to a later release date. Please continue with your manual export application process until further notice.

Summary of changes

As per previous advice, if you are an exporter of Other Goods to the Cambodia, Canada, Philippines, Taiwan, Thailand, United States of America and Vietnam, please be advised that products requiring NX188B, NX188M, and NX418 (previously EX188B, EX188M, and M418) certificates for these markets will transition to the NEXDOC System on Monday 10 February 2025. These products include the following non-prescribed goods:

- Processed foods, ingredients, and beverages
- Edible vitamins and supplements
- Animal feed and feed additives (non-meat derived)
- Fertilisers
- Shells.

To prepare for the transition to the NEXDOC System, registration is now open to exporters.

Please note that external software providers are not building capability to support the certification of Other Goods at this stage. All certification for these commodities will need to be lodged via the NEXDOC portal.

We will be implementing the Other Goods transition to NEXDOC in phases, with more countries to follow.

If you export other goods to countries other than the ones listed below, you will need to continue your current manual process until the importing country is transitioned to NEXDOC.

- Cambodia
- Canada
- Philippines
- Taiwan
- Thailand
- United States of America
- Vietnam.

The first market included NX188B and NX188M (formerly EX188B and EX188M) to Singapore.

Register on NEXDOC

If you are an Other Goods exporter, you will need to register via the department's online service portal. If you are already a registered NEXDOC user, you will need to add the Other Goods commodity to your existing account.

NEXDOC Virtual drop-in sessions

Online information sessions are available weekly. These sessions will demonstrate how to register as a NEXDOC user and lodge a request for export, as well as providing the opportunity to ask questions about the NEXDOC System.

More information about the NEXDOC System and the online sessions, can be found on the [NEXDOC Transition webpage](#).

Background

The Australian Government is focused on growing Australian agriculture by reforming its export functions. The Department of Agriculture, Fisheries and Forestry is moving products categorised as 'Other goods' products to the NEXDOC System, the Government's web-based export management system.

NEXDOC includes a range of new and enhanced features which provides Australia's export industry with a modern, technical platform capable of integrating with other support systems and new technologies. The system provides Australian exporters with improved product traceability, automates many processes that are currently manual, enables better self-service.

Caroline Martin
Assistant Secretary
Digital Export Program Branch
Department of Agriculture, Fisheries and Forestry

Date of issue: 28 January 2025

Attention

All EXDOC and NEXDOC users who have sent or intend to send a certificate to print in a departmental office today.

Purpose

This notice is to advise all EXDOC and NEXDOC users that there are certificate delays with in-office certificate printing.

Key points

- There is an outage with in-office printing impacting EXDOC and NEXDOC certificate printing.
- Certificates that have been sent to DAFF offices for printing may not be printed in sufficient time for signing and stamping to be collected today.

What should I do?

We request that you do not complete any RFPs or REXs for in-office printing until 9am AEDT tomorrow, Wednesday 29 January 2025.

Updates and contact information

The department is working on this issue as a matter of urgency and will keep you updated.

If you require further information, please email NEXDOC@aff.gov.au or exdoc.helpdesk@aff.gov.au or call 02 6272 4700.

Date of issue: 14 January 2025

Dates of effect: 10 February 2025

Attention

Other Goods exporters, manufacturers, agents, freight forwarders

Department of Agriculture, Fisheries and Forestry (the department) - Central and Regional offices.

Purpose

This Industry Advice Notice (IAN) is to advise industry that export certification to Cambodia, Canada, Philippines, South Korea, Taiwan, Thailand, United States of America, and Vietnam for Other Goods will transition to the Next Export Documentation (NEXDOC) System on Monday 10 February 2025.

From this date, manual certificate applications (EX188B, EX188M and M418) for Other Goods will no longer be available for products exported to the countries listed above as well as Singapore, which transitioned on Monday 2 September 2024.

Summary of changes and key points

If you are an exporter of Other Goods to the listed countries, please be advised that products requiring NX188B, NX188M, and NX418 (previously EX188B, EX188M, and M418) certificates for these markets will transition to the NEXDOC System on Monday 10 February 2025. These products include the following non-prescribed goods:

- Processed foods, ingredients, and beverages
- Edible vitamins and supplements
- Animal feed and feed additives (non-meat derived)
- Fertilisers
- Shells.

To prepare for the transition to the NEXDOC System, registration is now open to exporters.

Please note that external software providers are not building capability to support the certification of Other Goods at this stage. All Other Goods certificate requests will need to be lodged via the NEXDOC portal.

We will be implementing the Other Goods transition to NEXDOC in phases, with more countries to follow.

If you export Other Goods to a country other than those listed below, you will need to continue your current manual process until that importing country transitions to NEXDOC:

- Cambodia
- Canada
- Philippines
- South Korea
- Taiwan
- Thailand
- United States of America
- Vietnam.

The first market included NX188B and NX188M (formerly EX188B and EX188M) to Singapore.

Register on NEXDOC

If you are an Other Goods exporter, you will need to register via the department's online service portal. If you are already a registered NEXDOC user, you will need to add the Other Goods commodity to your existing account.

NEXDOC Virtual drop-in sessions

Online information sessions are available weekly. These sessions will demonstrate how to register as a NEXDOC user and lodge a request for export, as well as providing the opportunity to ask questions about the NEXDOC System.

More information about the NEXDOC System and the online sessions, can be found on the [NEXDOC Transition webpage](#).

NEXDOC includes a range of new and enhanced features which provides Australia's export industry with a modern, technical platform capable of integrating with other support systems and new technologies. The system provides Australian exporters with improved product traceability, automates many processes that are currently manual, enables better self-service.

Ingrid Massa-Ward
a/g Assistant Secretary
Digital Export Program Branch
Department of Agriculture, Fisheries and Forestry

Date of issue: 23 December 2024

Date of effect: 23 December 2024

Attention:

Registered NEXDOC exporters, manufacturers, agents, freight forwarders and approved export permit issuers.

Department of Agriculture, Fisheries and Forestry (the department) - Central and Regional offices.

Purpose

This Industry Advice Notice is to advise users of the Next Export Documentation (NEXDOC) system that an issue has been identified when using the copy feature on Request for Export (REX) to the European Union (EU).

Summary of changes and key points:

An issue has been identified when exporters copy a REX previously sent to the EU and change the Place of Destination.

The department is working to apply a fix and asks that until notified, exporters do not copy REX to the EU and change Place of Destination.

Exporters can copy a REX at COMP to the EU if they do not change the Place of Destination.

If you have any questions regarding this IAN, please email the NEXDOC Helpdesk at NEXDOC@aff.gov.au

21 November 2024

Attention

All EXDOC registered exporters and EDI users.

Purpose

This notice is to advise all EXDOC users of message delays on Sunday 24 November 2024 expected to be of about 30 minutes duration between 2pm to 4pm (AEDT).

Key points

- EXDOC is undergoing maintenance on Sunday 24 November 2024 between 2pm to 4pm (AEDT).
- The department will block inbound messaging from reaching EXDOC during maintenance. We expect this to last for about 30 minutes but may extend for the full two hours.
- EXDOC will process queued messaging when the block is lifted.

Impacts to industry

There will be delays to the following:

- Submission, lodgment or amendment of Requests for Permit (RFPs)
- Authorisation of RFPs by AQA users
- Generation or clearance of export declarations (EDNs) via Single Electronic Window (SEW)
- Certificate generation

What should I do?

- For urgent consignments, please finalise your documentation prior to 2pm AEDT on Sunday 24 November 2024.
- For non-urgent consignments, continue business as usual but expect some delays.
