

Approved arrangement class 19.2 allows accredited persons to assess commodity documentation and manage biosecurity risk for approved commodities.

Commodity requirements

To use approved arrangement class 19.2 an accredited person must ensure the commodity is:

- covered by an in-scope commodity group
- covered by an in-scope tariff
- supported by a valid approved arrangement class 19.2 pathway in the Biosecurity Import Conditions system (BICON).

Commodities that do not meet the above requirements are out of scope for this class.

Full import declaration requirements

To use approved arrangement class 19.2 an accredited person must ensure the full import declaration (FID) meets the following requirements:

- all lines must be of the same cargo type (e.g. a full container load line cannot be processed together with a break bulk line)
- all lines must be associated with a container (where applicable)
- all lines belonging to one commodity group must have the same class 19.2 code applied (e.g. 2 lines of unfinished timber cannot have a REL code applied to 1 line, and a FUM code applied to the other)
- the FID must be lodged in line mode.

Approved arrangement class 19.2 commodity groups and tariffs

The tables below list eligible commodity groups and tariffs. Each commodity group also lists the associated BICON case(s). Accredited persons must login to their BICON account to determine the correct biosecurity outcome and class 19.2 code.

Accredited persons must also consider all [requirements and conditions for approved arrangement class 19.2](#).

BICON case: Unretorted meat

This group includes unretorted meat that:

- is sourced, manufactured and exported from New Zealand and/or Australia;
- is of bovine (e.g. beef) animals only; and
- meets all BICON document requirements.

Class 19.2 operating conditions to consider for this group:

- Condition 19 – in relation to entering government certificate details

In-scope tariffs for unretorted meat (New Zealand only)

Tariff	Tariff reference number
0201	0201.10.00
	0201.20.00
	0201.30.00
0202	0202.10.00
	0202.20.00
	0202.30.00
1602	1602.50.00

BICON case: Imported sea-going vessels

This group includes new or used sea-going vessels, imported as cargo, that are supported by a valid Approved arrangement class 19.2 pathway in BICON..

Tariffs within this commodity group may also be subject to BMSB seasonal measures. Refer to the approved arrangement class 19.2 commodity group: ‘[Brown marmorated stink bug \(BMSB\) target high risk goods](#)’.

Class 19.2 operating conditions to consider for this group:

- Condition 18 – in relation to entering AEI numbers

In-scope tariffs for boats

Tariff	Tariff reference number
8903	8903.11.00
	8903.12.00
	8903.19.00
	8903.9
	8903.21.00
	8903.22.00
	8903.23
	8903.31
	8903.32
	8903.33
	8903.99
	8903.93.00

3.1 Starter cultures

BICON case: Starter cultures and derivatives

This subgroup includes approved starter cultures for human consumption, human therapeutic and/or human cosmetic use, that:

- do not require an import permit
- meet all BICON document requirements.

In-scope tariffs for starter cultures

Tariff	Tariff reference number
2102	2102.10.00
	2102.20.00
	2102.30.00

3.2 Hops

BICON case: Processed and dried hops for human consumption and processing

This subgroup includes:

- hops for processing
- hops that have been processed into pellets or extract.

In-scope tariffs for hops

Tariff	Tariff reference number
1210	1210.20.00.18

BICON case: Brown marmorated stink bug (BMSB) hitchhiker pests

This group includes **BMSB target high risk goods** that are:

- subject to seasonal BMSB measures
- with or without other biosecurity risks
- with a valid offshore treatment certificate, or if the container is a fully enclosed 6 hard sided FCL/X, subject to treatment onshore.

For goods under this commodity group you must:

- refer to the relevant commodity group section on this webpage and the commodity BICON case to determine import conditions (if applicable)
- refer to the BICON case Brown marmorated stink bug (BMSB) hitchhiker pests to determine if additional BMSB measures apply.

For this commodity group we recommend you enter an approved arrangement site ID in the “AQIS premises ID” field of the ICS when a release from biosecurity control is expected (BMSBREL). This will allow the system to apply an inspection direction, in the event the consignment is subject to a random BMSB inspection.

Approved arrangement class 19.2 operating conditions to consider for this group:

Condition 18 – in relation to entering AEI numbers

In-scope tariffs for commodities listed as target high risk goods for BMSB

* Goods classified under this chapter may also be in-scope across other class 19.2 commodity groups. Verification and compliance activities for these goods will be monitored under their respective commodity group.

5.1 Cane and rattan articles; and Bamboo products

BICON cases: Cane and rattan articles & Bamboo products

This subgroup includes cane and rattan articles either

- with a valid offshore treatment certificate
- to be treated with Methyl Bromide onshore at the rate of 48g/24hrs/21C.

This subgroup also includes bamboo products either:

- listed on the BICON table of bamboo products
- ‘Bamboo stem products NOT listed in the table of bamboo products’ as defined by BICON

Tariffs within this commodity group may also be subject to BMSB seasonal measures. Refer to the approved arrangement class 19.2 commodity group: ‘[Brown marmorated stink bug \(BMSB\) target high risk goods](#)’.

Class 19.2 operating conditions to consider for this group:

- Condition 18 – in relation to entering AEI numbers

In-scope tariffs cane and rattan articles; and bamboo products

5.2: Dried willow articles

BICON case: Dried willow articles

This subgroup includes dried willow articles:

- with no bark
- with a valid offshore treatment certificate.

Class 19.2 operating conditions to consider for this group:

- Condition 17 – in relation to entering ACC (DWWA)
- Condition 18 – in relation to entering AEI numbers

In-scope tariffs for dried willow articles

Tariff	Tariff reference number
4601	4601.29.00.90
	4601.94.00.91
	4601.99.00.03
4602	4602.19.00.92
	4602.90.00.12

5.3: Permitted plant fibres

BICON case: Permitted plant fibres

This subgroup includes products that:

- contain permitted plant fibres that are highly processed/treated (as defined by BICON) and incapable of propagation
- will not be used for animal feed, landscaping or growing purposes, or fertiliser
- meet all BICON document requirements.

Class 19.2 operating conditions to consider for group:

- Condition 17 – in relation to entering ACC (PMTD)
- Condition 19 – in relation to entering eCertificate details
- Condition 20 – in relation to entering government certificate details

In-scope tariffs for permitted plant fibres

Tariff	Tariff reference number

0402	-
0403	-

0404	-
0405	-
0406	-
1901	1901.10.00

BICON case: Fertilisers

This group includes:

- solid fertilisers containing mined and chemical (natural or synthetic) ingredients only
- fertilisers classed as risk level 1, 2 or 3
- fertilisers that are bagged or loose in an FCL/X container
- fertilisers that are shipped as bulk loose in ships hold.

Bulk inorganic fertiliser: If Approved arrangement class 19.2 is being used for the clearance of a consignment, evidence of the risk level rating for the consignment will be required. This evidence must be in the form of written confirmation received from the department's Bulk Commodity National Co-ordination Centre.

Containerised inorganic fertiliser: If Approved arrangement class 19.2 is being used for the clearance of a consignment, evidence of the risk level rating for the consignment may be required. Refer to BICON for import conditions.

Class 19.2 operating conditions to consider for this group:

- Condition 17 – in relation to entering ACC (FTR1; FTR2)

In-scope tariffs for fertiliser

BICON case: Fresh allium spp for human consumption

This group includes fresh onions and shallots that are:

- grown in New Zealand, the United States or the Netherlands
- from a permitted district/county indicated in BICON.

- for human consumption
- of the scientific name *Allium cepa* or *Allium cepa* var. *aggregatum* or var. *ascalonicum*

Class 19.2 operating conditions to consider for this group:

- Condition 17 – in relation to entering ACC (FRPR)
- Condition 19 – in relation to entering eCertificate details
- Condition 20 – in relation to entering government certificate details

In-scope tariffs for fresh onions and shallots from New Zealand, United States, Netherlands.

Tariff	Tariff reference number
0703	0703.10.0033

9.1 Gas cylinders

[BICON case](#): Gas cylinders

This subgroup includes used gas cylinders that are supported by a valid approved arrangement class 19.2 pathway in BICON.

In-scope tariffs for gas cylinders

Tariff	Tariff reference number
7311	-

9.2 Metal waste and scrap

[BICON case](#): Metal waste and scrap

This subgroup includes metal waste and scrap that is supported by a valid approved arrangement class 19.2 pathway in BICON. Class 19.2 operating conditions to consider for this group:

- Condition 18 – in relation to entering AEI numbers
- Condition 19 – in relation to entering eCertificates details
- Condition 20 – in relation to entering government certificate details
- Condition 17 – in relation to entering ACC (METT)

In-scope tariffs for metal waste and scrap

BICON case: Coffee for processing or human consumption

This group includes green and decaffeinated coffee beans that:

- have not been digested through an animal
- are not vacuum sealed trade samples
- meet all BICON document requirements.

Class 19.2 operating conditions to consider for this group:

- Condition 19 – in relation to entering eCertificate details
- Condition 20 – in relation to entering government certificate details

In-scope tariffs for green coffee beans

Tariff	Tariff reference number
0901	0901.1

BICON case: Highly refined organic chemicals and substances

This group includes highly refined organic chemicals and substances that:

- are not to be used for animal consumption, environmental purposes (including use as bioremediation product or fertiliser) or veterinary therapeutics.
- meet all BICON document requirements.

In-scope tariffs for highly refined organic chemicals and substances

Tariff	Tariff reference number

~ Monitoring activities for this tariff will occur under the commodity group ‘cane and rattan articles; dried wickerwork, permitted plant fibres and bamboo products’.

BICON cases: Processed grain and seed products for human consumption & Processed tuber and corm products for human consumption

This group includes goods that:

- are for human consumption only
- are processed grain and seed products defined as ‘other’ in BICON
- are processed potato products
- are processed tuber and corm products other than processed potato products
- meet all BICON document requirements.

Tariffs within this commodity group may also be subject to khapra beetle conditions specified in the **BICON case:** Non-Commodity Cargo Clearance.

Class 19.2 operating conditions to consider for this group:

- Condition 19 – in relation to entering eCertificate details
- Condition 20 – in relation to entering government certificate details

In-scope tariffs for milling products for human consumption

Tariff	Tariff reference number
1101	1101.00.00
1102	-
1105	-

	9406.90.00

19.1 Prepared cereals and muesli bars

BICON case: Retail ready products containing a mix of grains, seeds, dried fruits and nuts for human consumption

This subgroup includes:

- consignments of commercially prepared and retail packaged food products, as defined in BICON
- consignments containing plant material only.

Class 19.2 operating conditions to consider for this group:

- Condition 17– in relation to entering ACC (PREP)

In-scope tariffs for prepared cereals and muesli bars

Tariff	Tariff reference number
1904	-

19.2 Pasta

BICON case: Noodles for human consumption.

This subgroup includes commercially prepared and retailed packaged noodles that either:

- contain plant based ingredients only
- contain less than 10% egg and 10% dairy
and:
- meet all BICON document requirements.

Class 19.2 operating conditions to consider for this group:

- Condition 17 – in relation to entering ACC (PREP)

In-scope tariffs for pasta

Tariff	Tariff reference number
1902	1902.11.00.06

20.1 Milled rice for human consumption

BICON case: Rice for human consumption or processing

This group includes milled rice for human consumption:

- where the outer hull has been completely removed
- that is packed in bags less than or equal to 25 kilograms
- that is imported as FCL/X cargo only

Tariffs within this commodity group may also be subject to khapra beetle conditions specified in the **BICON case:** Non-Commodity Cargo Clearance.

Approved arrangement class 19.2 operating conditions to consider for this group:

- Condition 19– in relation to entering eCertificate details
- Condition 20– in relation to entering government certificate details

In-scope tariffs for milled rice for human consumption

Tariff	Tariff reference number
1006	1006.30
	1006.40

20.2 Parboiled rice for human consumption

BICON case: Rice for human consumption or processing

This group includes parboiled rice for human consumption that is:

- packed in bags less than or equal to 25 kilograms
- imported as FCL/X cargo only
- meet all BICON document requirements.

Class 19.2 operating conditions to consider for this group:

- Condition 17 – in relation to entering ACC (PARB)

In-scope tariffs for parboiled rice for human consumption

Tariff	Tariff reference number
1006	1006.20
	1006.30
