

Announcements

- Addition of following 3 new commodities onto CBIS under inspection intervention:
 - Fresh whole garlic (offshore treated), from all countries
 - Bulgur wheat products (parboiled, retail ready, bagged), from all countries
 - Fresh/chilled ready-to-eat pomegranate arils, from India
- Continue to review existing pathways and reward good compliance with reduced intervention rates

We manage the Compliance-Based Intervention Scheme (CBIS). The CBIS applies to selected plant and animal products imported into Australia.

About the CBIS

The CBIS uses a risk-based intervention approach to manage imports.

Importers can qualify for reduced intervention at the Australian border. To do this you must consistently meet our biosecurity requirements.

The CBIS enables smoother clearance of goods and reduces regulatory cost. This allows us to focus our efforts and finite resources on areas of higher biosecurity risk.

We continue to enhance and expand CBIS to include more imported products.

Eligibility

Importers and brokers must:

- import eligible products under an eligible tariff code
- lodge the entry in line mode
- lodge the entry using the correct AQIS Commodity Code (ACC), if required
- answer any biosecurity profile questions accurately
- continue to meet the biosecurity import requirements for the products
- demonstrate repeated compliance.

Note: Some products may not be eligible if they have qualified for other programs.

How it works

The Agriculture Import Management System (AIMS) governs how the CBIS operates.

AIMS can:

- recognise the eligibility criteria (tariff code, profile question response)

- target the appropriate intervention measure (such as inspection, treatment, testing or document assessment)
- automatically generate the CBIS direction
- recognise direction results entered by biosecurity officers
- switch entities into and out of different CBIS modes ([see system rules](#))
- randomly select lines for intervention that qualify for the reduced risk-based intervention rate
- automatically increase or decrease intervention levels.

What triggers a rule change?

We manage risk-based intervention rates for importers who show compliance. You must pass a specified number of consecutive interventions. Only then will you be eligible for reduced intervention rates.

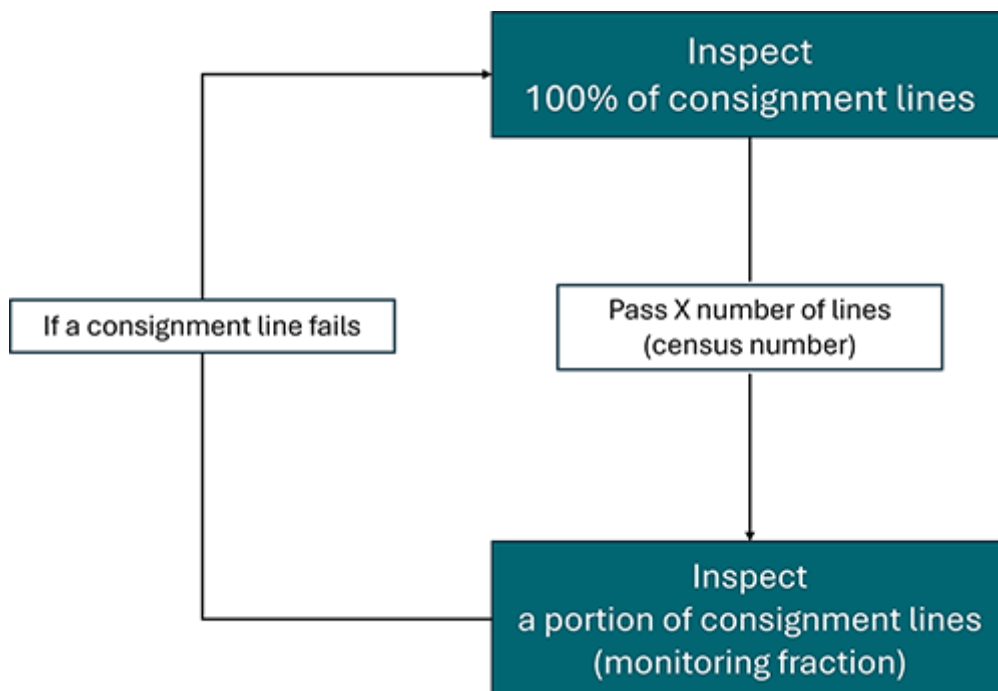

Increased intervention levels will occur when both:

- non-compliance is detected during inspection, treatment, testing or documentation assessment
- a failure result is recorded against the CBIS automated direction line.

Reduced risk-based intervention rates will return when:

- your compliance has improved
- you have re-qualified for the risk-based intervention rates with continuous compliance results.

How CBIS operates on inspections

‘Census number’ refers to the number of intervention passes required to move to the reduced rate. ‘Monitoring fraction’ is the term that describes the reduced risk-based intervention rate. The monitoring fraction applies when an importer passes the census number.

Each line in a consignment may need intervention. The chance of a line requiring intervention is equal to the monitoring fraction. Monitoring fractions apply a ‘probability of intervention’. If the fraction is 20%, then every CBIS line in a consignment has a 20% chance of requiring intervention.

When there is non-compliance, an importer will return to an intervention rate of 100%. The importer will need to re-establish their compliance to regain the reduced intervention rate.

We customise the census number and monitoring fraction. This is based on the biosecurity risks associated with each import pathway. We review these rates regularly. This ensures we identify changes in risk, facilitate safe trade and meet Australia’s appropriate level of protection (ALOP).

Exclusions

Mandatory intervention may still be required for all consignments that are:

- lodged in container mode and are not recognised by the CBIS - AIMS rules
- lodged without an ACC ([where required](#))
- processed via the Automatic Entry Processing (AEP) scheme
- restricted due to other system rules or biosecurity concerns
- out of scope for this arrangement
- do not meet the import conditions on entry
- have imported food impediments

Clearance status

Brokers and importers must lodge a cargo report with details about the consignment through the Integrated Cargo System, (ICS).

Some products may display a CONDCLEAR status and are still subject to biosecurity control.

You must wait for AIMS directions to be issued before moving, unpacking or releasing goods. A consignment with an ICS CONDCLEAR status will remain subject to biosecurity control until managed. When the status changes to CLEAR the consignment can be released.

AQIS commodity codes

Some products need a 4-digit AQIS Commodity Code (ACC) to qualify for the CBIS.

Brokers and Importers must enter this code in the ICS. Consignments without this code may not be eligible for the CBIS.

You can find the ACCs in our [Biosecurity Import Conditions database \(BICON\)](#). They are also in this table.

Product	ACC
Returning Australian prawns, processed in a specific department approved facility in Thailand, for human consumption (specific permit-based import pathway)	AUST

Eligible plant products

These plant products have been added to CBIS.

Products not listed in the tables below are not eligible for CBIS.

Import Pathway	Eligible tariff codes	Intervention measure
Allspice of the genus Pimenta (dried, neither crushed nor ground)	0904.21.00.03	Inspection
Apples (dried)	0813.30.00.31	Inspection
Apricots (dried)	0813.10.00.29	Inspection
Capsicum and chilli of the genus Capsicum (dried, neither crushed nor ground)	0904.21.00.03	Inspection
Capsicum and chilli of the genus Capsicum, allspice and paprika (dried, crushed or ground, not in retail ready packaging up to 500g per package or >500g)	0904.22.00.05 0904.22.00.04	Inspection
Citrus peel (dried, excluding fresh, frozen and preserved)	0814.00.00	Inspection
Coconut (desiccated)	0801.11.00.34 0801.12.00.40	Inspection
Coconut products (dried, excluding desiccated) **	0801.19.00.42	Inspection
Dates (dried), including permitted Ziziphus species	0804.10.00.10	Inspection
Garlic (dried, crushed or ground, not in retail ready packaging up to 500g per package or >500g)	0712.90.90.78	Inspection
Ginger (dried, crushed or ground, not in retail ready packaging up to 500g per package or >500g)	0910.12.00.12 0806.20.00.29	Inspection
Grapes (dried), includes sultanas and currants	0806.20.00.30 0806.20.00.31	Inspection
Tea bags and capsules	0902 0712.20.00.68	Documentation Inspection

Onions (dried, dehydrated, freeze dried, including granules, crushed or ground, not in retail ready packaging >500g)

*excludes cooked, fried, roasted.

Pepper of the genus Piper (dried, neither crushed or ground)	0904.11.00.34 0712.31.00.70 0712.32.00.71	Inspection
Permitted species of mushrooms and truffles (dried)	0712.33.00.72 0712.34.00.73 0712.39.00.90 0904.22.00.05 0904.22.00.04	Inspection
Powdered plant products (<=500 grams in retail ready packaging)	0910.12.00.12 0910.30.00.03	Documentation
Prunes (dried)	0813.20.00.30	Inspection
Saffron	0910.20.00.02	Inspection
Turmeric (dried, crushed or ground, not in retail ready packaging up to 500g per package or >500g)	0910.30.00.03	Inspection
Vanilla (dried, crushed or ground, not in retail ready packaging up to 500g per package or >500g)	0905.20.00	Inspection
Vanilla beans (dried, boiled or cured)	0905.10.00	Inspection
Import Pathway	Eligible tariff codes	Intervention measure
Agaricus mushrooms (fresh/ chilled, from New Zealand only)	0709.51.00.60	Inspection
Asparagus (fresh, from Mexico)	0709.20.00	Inspection
Avocado (fresh, from New Zealand only) **see supplier code Table**	0804.40.00.21	Inspection
Capsicum and peppers of the genus Capsicum annum (fresh, from New Zealand)	0709.60.00.27	Inspection
Cherries of the species Prunus avium (fresh, from New Zealand)	0809.29.00.22	Inspection
Cherries of the species Prunus avium (fresh, from the USA)	0809.29.00.22	Inspection
Dates (fresh, from the USA)	0804.10.00.10	Inspection

Durian (chilled and segmented, from Malaysia and Thailand only)	0810.60.00.52	Inspection
Garlic (fresh, whole, offshore treated)	0703.20.00.42	Inspection
	0801.12.00.40	
Immature coconuts (fresh)	0801.19.00.42	Inspection
Immature corn (fresh)	0709.99.00.39	Inspection
Lemons and limes (fresh, from the USA only)	0805.50.00.50	Inspection
Mandarins (fresh, from Israel only)	0805.21.00.27	Inspection
Mandarins (fresh, from USA only)	0805.21.00.27	Inspection
	0801.12.00.40	
Mature coconuts – husk removed and prayer nuts (fresh)	0801.19.00.42	Inspection
	0709.59.00.90	
	0709.52.00.20	
Mushrooms and truffles (fresh/chilled) - permitted species only	0709.53.00.30	Inspection
	0709.54.00.40	
	0709.55.00.50	
	0709.56.00.60	
Oranges (fresh, from the USA only)	0805.10.00.23	Inspection
Permitted stone fruits (fresh, from New Zealand) - apricots	0809.10.00.05	Inspection
Permitted stone fruits (fresh, from New Zealand) - peaches including nectarines	0809.30.00.07	Inspection
Permitted stone fruits (fresh, from New Zealand) - plums or prunes, pluots or plumcots	0809.40.00.08	Inspection
Permitted stone fruits (fresh, from the USA) - apricots	0809.10.00.05	Inspection
Permitted stone fruits (fresh, from the USA) - peaches including nectarines	0809.30.00.07	Inspection
Permitted stone fruits (fresh, from the USA) - plums or approved interspecific stone fruit hybrids	0809.40.00.08	Inspection
Peas of the species Pisum sativum (fresh, from China only)	0708.10.00.18	Inspection
Persimmons (fresh, from New Zealand only)	0810.70.00.57	Inspection
Pomegranates (fresh, from the USA)	0810.90.00.59	Inspection
Pomegranate arils (fresh, ready to eat, from India only)	0810.90.00.59	Inspection
	0703.20.00.42	Inspection

Semi-processed garlic (fresh, from China and the Republic of Korea)		
Semi-processed pineapples (fresh, from Thailand)	0804.30.00	Inspection
Table grapes (fresh, from the USA)	0806.10.00.28	Inspection
Loose tomatoes grown under the NZ Code of Practice (fresh, from New Zealand only)	0702.00.00.03	Inspection

Peat or sphagnum peat with or without approved additives (from countries free from foot and mouth disease (FMD), excluding Hungary and Slovakia).

[Defined as the material that accumulates in the lower levels of a peat bog].

Eligible animal products

These animal-based products have been added to CBIS.

Products not listed in the tables below are not eligible for CBIS.

Import Pathway	Eligible tariff codes	Intervention measure
Bagged aquatic feed that requires testing for animal (other than aquatic) derived material (specific permit-based import pathway)	2309.9000.27	Testing
Cnidarians, echinoderms, tunicates and poriferans that are fresh or have undergone minimal processing	0307.9, 0308, 1604.19, 1604.20, 1605.54, 1605.6	Inspection
Dried prawns for human consumption	1605.21, 1605.29, and 0306.95	Inspection
Par-cooked breaded, battered or crumbed (BBC) prawn products for human consumption	0306.16, 0306.17, 0306.35, 0306.36, 0306.95, 1604.2000.70, 1605.21, 1605.29, 1902.20	Inspection
Returning Australian prawns, processed in a specific department approved facility, for human consumption (specific permit-based import pathway)	0306.167.00.34 ACC:AUST	Inspection and testing
Trawl or purse seine caught cephalopods for animal consumption	0307.43, 0511.91	Inspection
Uncooked highly processed (HP) prawn products for human consumption	0306.16, 0306.17, 0306.35, 0306.36, 0306.95, 1604.2000.70, 1605.21, 1605.29, 1902.20	Inspection
Import Pathway	Eligible tariff codes	Intervention measure
Retail-ready cosmetics that contain animal-derived ingredients, where the animal-derived content is less than 20% by mass	3303, 3304, 3306.10, 3307.10, 3307.20, 3307.30	Documentation
Soaps	3401, 3402	Documentation
Import Pathway		

	Eligible tariff codes	Intervention measure
Feathers (loose feathers or manufactured articles made with feathers) that have been treated prior to export by one of the departments approved treatments	6701, 0505.10	Inspection

Import Pathway	Eligible tariff codes	Intervention measure
Tanned hides and skins, restricted to uses other than animal consumption, environmental purposes, growing purposes or veterinary therapeutic use	4104, 4105, 4106, 4302	Inspection
Untanned hides and skins from New Zealand, restricted to uses other than animal consumption, environmental purposes, growing purposes or veterinary therapeutic use	4101, 4102, 4103, and 4301	Inspection

Import Pathway	Eligible tariff codes	Intervention measure
Australian registered (AUST R) human therapeutics and medicines	3002.12, 3002.15, 3002.41.00.01	Documentation
Human derived materials (excluding antibodies, cell lines and human milk) for therapeutic use only	3002.12, 3002.15	Documentation
Human therapeutics and medicines for use in clinical trials (including accountability and disposal)	3002.12, 3002.15	Documentation
Purified antibodies raised against inorganic material or antigens from multicellular organisms	3002.12, 3002.15	Documentation
Test kits not testing for disease agents	3002.12, 3002.15, 3822.13, 3822.19	Documentation
