

Import conditions for fresh solanaceous fruit and vegetables purchased in Western Australia and imported into the Indian Ocean Territories (IOT) of Christmas Island and Cocos (Keeling) Islands have been updated. These conditions are in place to reduce the likelihood of the spread of tomato-potato psyllid (TPP). More information about the conditions is available on [our webpage](#).

The [Biosecurity Act 2015](#) is the primary legislation for the management of the risk of diseases and pests that may cause harm to human, animal or plant health, the environment and the economy. Its jurisdiction includes the management of the risk of diseases and pests to Australian territory including the external territories of Norfolk Island, Christmas Island and the Cocos (Keeling) Islands.

Norfolk Island, Christmas Island and Cocos (Keeling) Islands each have unique animal and plant health biosecurity statuses. Biosecurity arrangements on the territories are designed to maintain the unique biosecurity statuses of these territories. Biosecurity arrangements and responsibilities are set out in the Biosecurity Act 2015 and subordinate legislation.

Under the Biosecurity Act 2015, the movements of vessels, goods and people into and between these external territories, including from the Australian mainland are managed like international movements, rather than interstate movements. Therefore, all vessels and aircrafts that arrive at the territories and all goods that are brought or imported into these external territories must comply with the Biosecurity Act 2015.

Bringing or importing goods to the external territories

Due to the unique pest and disease status of the external territories, each territory has its own goods determination which prescribes goods that are prohibited from being brought or imported into the external territories, and goods that may be brought or imported into the external territories subject to biosecurity conditions, including the requirement for an import permit. Import requirements are based on scientific evidence and government policy, ensuring the distinct biosecurity differences of each place are managed accordingly. All goods brought or imported into these territories are subject to biosecurity control.

Prior to bringing or importing goods into the external territories, refer to the relevant determination that provides the conditions for import, which are unique to each territory:

- [Biosecurity \(Conditionally Non-prohibited Goods – Christmas Island\) Determination 2016](#)
- [Biosecurity \(Conditionally Non-prohibited Goods – Cocos \(Keeling\) Islands\) Determination 2016](#).
- [Biosecurity \(Conditionally Non-prohibited Goods – Norfolk Island\) Determination 2016](#)

If you would like to import goods not covered in the Goods Determination, you must apply for an import permit. The permit must be granted before your goods leave the Australian mainland.

To apply for an import permit, you can access the department's Biosecurity Import Conditions system ([BICON](#)) and use the advanced search.

Note: Your search must be broad, therefore insert words like, for example, 'fruit', 'vegetable', 'fertiliser', 'nursery stock' in the Quick search field and check Norfolk Island from the Import into: list provided, then click on Search.

The Importing goods into the Australian External Territories search result will be displayed. Click on the link and continue stepping through the import scenario questions in BICON.

If you are not already registered in BICON you will need to register.

If you are experiencing difficulty with registration and application, please refer to the [BICON help page](#) and the [BICON help card - External territories](#).

Aircraft and vessels arriving at the external territories

Under the Act, aircraft and vessels (including those from Australia) become subject to biosecurity control upon entering 12 nautical miles of the external territories. Likewise, all goods and conveyances from these external territories become subject to biosecurity control upon entering 12 nautical miles of Australia.

For more information, visit the [Vessels, aircraft and military webpage](#).

External territories covered by the Biosecurity Act

Biosecurity office contacts for external territories

If you would like to contact a biosecurity officer on Norfolk Island or the Indian Ocean Territories (Christmas Island or Cocos (Keeling) Islands), visit the [department's contacts webpage](#).

Further information

For more information on the territories, visit the [Department of Infrastructure, Transport Regional Development, Communications, Sport and the Arts](#).
