

Organic fertiliser is derived from biological materials from aquatic animal, terrestrial animal, avian, or microbial origin.

It includes (but is not limited to):

- soil conditioners
- potting mixes
- blood and bone meal
- fish, prawn, crustacean, shrimp and squid meals
- seaweed and kelp
- non-mineralised humic-based fertiliser
- guano-based fertiliser
- neem cake
- compost
- worm castings.

Application to import organic fertiliser

An import permit must be obtained before organic fertiliser is imported.

The importing conditions and application forms are available on the [Biosecurity Import Conditions system \(BICON\)](#).

Contact the [Import Services Team](#) for assistance.
