

Improving access to imported food safety requirements

Imported food safety requirements are now included in the [Biosecurity Import Conditions system \(BICON\)](#).

See more about the [Inclusion of food safety requirements in BICON](#).

All biosecurity requirements must be met before [Imported Food Inspection Scheme](#) requirements apply.

Check our [Biosecurity Import Conditions system \(BICON\)](#) for biosecurity import conditions.

## Food type

[Fish species identified](#) as those used in aquaculture production, fresh, chilled or frozen.

## Exclusions

Food from [New Zealand](#).

## Inspection and testing

We refer consignments of certain [fish species](#) for antimicrobial residue testing at the rate of 5%. During inspection, we will also conduct a visual and label assessment.

See the additional requirements that apply to [finfish that is ready-to-eat](#)

Table 1 shows the antimicrobial residue test that will be applied and permitted results for the food type.

**Table 1, Food type, test applied and permitted result**

| Food type               | Test applied                    | Permitted result                                                                                                                      |
|-------------------------|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| Identified fish species | Fish antimicrobial residue test | No detectable amount permitted.<br><br><a href="#">Schedule 20</a> of the Food Standards Code lists permitted maximum residue limits. |

## Fish species

The fish identified as species targeted for antimicrobial residue test are listed in the table.

| Family name | Common name                         | Genus (scientific) name |
|-------------|-------------------------------------|-------------------------|
| Anguillidae | Eel – European / Japanese/ American | Anguilla spp.           |

|               |                                             |                                                       |
|---------------|---------------------------------------------|-------------------------------------------------------|
| Synbranchidae | Asian swamp eel                             | Monopterus spp.                                       |
| Pangasiidae   | Basa (Catfish - giant/pangas/striped/shark) | Pangasius spp.                                        |
| Ariidae       | Catfish – numerous species                  | Arius spp.                                            |
| Clariidae     | Mudfish / catfish                           | Clarias spp.                                          |
| Ictaluridae   | Channel catfish / Black bullhead            | Ictalurus spp.                                        |
| Plotosidae    | Eel tailed catfish                          | Tandanus spp.                                         |
| Siluridae     | Amur / Japanese catfish                     | Silurus spp.                                          |
| Chanidae      | Milkfish                                    | Chanos chanos                                         |
| Channidae     | Snakehead / Mudfish                         | Channa spp.                                           |
| Cichlidae     | Tilapia                                     | Oreochromis spp.<br>Sarotherodon spp.<br>Tilapia spp. |
| Cyprinidae    | Crucian carp                                | Carassius carassius                                   |
|               | Catla / Indian carp                         | Catla spp.                                            |
|               | Carp – Mrigal / Mud                         | Cirrhinus spp.                                        |
|               | Grass carp                                  | Ctenopharyngodon idellus                              |
|               | Carp - European / Common                    | Cyprinus carpio                                       |
|               | Carp – Bighead / Silver                     | Hypophthalmichthys spp.                               |
|               | Rohu labeo / Orange fin labeo;              | Labeo spp.                                            |
|               | Dace                                        | Leuciscus spp.                                        |
| Latidae       | Black carp                                  | Mylopharyngodon piceus                                |
|               | Barramundi                                  | Lates calcarifer                                      |
|               | Nile perch                                  | Lates niloticus                                       |
|               | Salmon – Atlantic / Sea / Danube / Pacific  | Salmo salar                                           |
| Salmonidae    | Trout - various                             | Salmo trutta<br>Oncorhynchus spp.                     |
|               | Arctic char                                 | Salvelinus alpinus                                    |
