

Improving access to imported food safety requirements

Imported food safety requirements are now included in the [Biosecurity Import Conditions system \(BICON\)](#).

See more about the [Inclusion of food safety requirements in BICON](#).

All biosecurity requirements must be met before [Imported Food Inspection Scheme](#) requirements apply.

Check our [Biosecurity Import Conditions system \(BICON\)](#) for biosecurity import conditions.

We classify imported food that presents a potential medium or high risk to public health as [risk food](#). All risk food is listed in the [Imported Food Control Order 2019](#).

Pure and highly concentrated caffeine products are classified as risk food

This includes food that is ready for retail sale where caffeine is present at a concentration of:

- 1% (1 g/100 mL) or greater, if the food is a liquid food, or
- 5% (5 g/100 g) or greater, if the food is a solid or semi-solid food (non-liquid).

Exclusions

- Pure caffeine that is not for retail sale, i.e. for further processing or manufacturing purposes.

Community Protection (CP) questions

You will need to answer these CP questions when lodging your [full import declaration](#):

IFIS: Do the goods contain caffeine in a concentration equal to, or greater than 1% (1 g/100 mL) for liquid form,
or 5% (5 g/100 g) for powder or other non-liquid form?

IFIS: Are the goods ready for retail sale?

Inspection and testing

We refer consignments of pure and highly concentrated caffeine products for inspection. During inspection, we will conduct a visual and label assessment and assess this food against the caffeine limits in the [Food Standards Code](#).

Food safety risks

Food Standards Australia New Zealand (FSANZ) has given us [advice about the risk of pure and highly concentrated caffeine products](#). These products present a potential medium or high risk to public health.

Version history

Date	Amendment details
17/06/2025	Deleted exclusion for New Zealand as this product is also prohibited for sale in New Zealand
16/12/2019	Original version of webpage published on website
