

Improving access to imported food safety requirements

Imported food safety requirements are now included in the [Biosecurity Import Conditions system \(BICON\)](#).

See more about the [Inclusion of food safety requirements in BICON](#).

All biosecurity requirements must be met before [Imported Food Inspection Scheme](#) requirements apply.

Check our [Biosecurity Import Conditions system \(BICON\)](#) for biosecurity import conditions.

Food type

Raw meat and edible offal that is fresh, chilled or frozen:

- beef
- pork
- sheep
- goat

Find out about requirements for [poultry meat and offal products](#).

Exclusions

Food from [New Zealand](#).

Inspection and testing

This food is classified as a [surveillance food](#).

We refer consignments of raw meat and edible offal this is fresh, chilled or frozen for residue testing at the rate of 5%. During inspection, we will also conduct a visual and label assessment.

Additional requirements apply to [fresh beef and beef products](#).

Table 1 shows the residue test that will be applied and permitted result.

Table 1, Test applied and permitted result

Test applied	Permitted result
Meat antimicrobial screen	No detectable amount permitted.

[Schedule 20](#) of the Food Standards Code lists permitted maximum residue limits.

Version history

Date	Amendment details
23/01/2025	Removed poultry from food type referred for residue testing. Added link to new poultry meat and poultry meat products webpage.
28/01/2022	First version of the webpage published on website.
