

Improving access to imported food safety requirements

Imported food safety requirements are now included in the [Biosecurity Import Conditions system \(BICON\)](#).

See more about the [Inclusion of food safety requirements in BICON](#).

All biosecurity requirements must be met before [Imported Food Inspection Scheme](#) requirements apply.

Check our [Biosecurity Import Conditions system \(BICON\)](#) for import conditions.

Food type

Mini jelly cups containing konjac that are 45mm or less in width or length.

Konjac is a binding food additive that comes from the root of the konnyaku plant (*Amorphophallus* spp.).

Konjac is also known as:

- konjac flour
- konjaku
- konnyaku
- conjac
- konjonac
- glucomannan
- yam flour
- yam powder
- taro flour
- taro powder.

Inspection

Mini jelly cups containing konjac that are 45mm or less in width or length are:

- banned for sale under the Australian Consumer Law within the [Competition and Consumer Act 2010](#)
- prohibited for import under the [Customs \(Prohibited Imports\) Regulations 1956](#).

A ban is in place because there is a risk these products may cause serious injury or death from choking.

If we find any of these products during an inspection, we will refer them to:

- Australian Border Force
- [Australian Competition and Consumer Commission](#).
