

The Department of Agriculture, Fisheries and Forestry, together with other Australian government departments, is responsible for operations related to importing goods to Australia.

The department manages biosecurity controls to minimise the risk of exotic pests and diseases entering the country.

The department imposes fees and charges on import and shipping industries to cover the costs of maintaining national biosecurity operations.

The department provides updates, notices and forms that are useful to industry. For the import of horses, please see relevant links below.

## **Notices to Industry**

### **Forms for importing horses**

Download
