

Importers will be required to supply the following forms with their import permit application.

Check our advice on [importing bulk grain for stockfeed and milling](#).

Importing bulk grain guideline

Department of Agriculture and Water Resources, February 2019

This guideline includes outline of the processes involved in importing bulk whole grain and the requirements for the management of risks associated with grain following entry into Australia. The following templates and additional guidelines referred to in the guideline are also available for download on this page:

- Imported bulk grain pre-arrival information
- Conveyance standards for imported bulk grain
- Bulk grain weight reconciliation spreadsheet
- Imported bulk grain delivery records (road vehicles, rail wagons, container)
- Guide to developing a Process Management System
- Guide to developing a site operations manual

Guide to developing a Process Management System

Department of Agriculture and Water Resources, January 2019

This document specifies the requirements for a Process Management System (PMS) to support an application for the importation and processing of bulk grain into Australia.

Compliance with the requirements of the PMS will be assessed at audit. A desk audit of documentation and other details will take place as part of the process of issuing an import permit.

Guide to developing a site operations manual

Department of Agriculture and Water Resources, January 2019

This document specifies the requirements of a site operations manual for Class 2.7 (bulk grain storage) and Class 3.1 (bulk grain processors) Approved Arrangement (AA) sites.

A site operations manual approved by the department's Plant Import Operations forms part of the Class 2.7 and 3.1 AA requirements. Compliance with the requirements of the site operations manual will be assessed at audit.
