

If you notice sick or dead birds or other animals, you should not touch them. If there are multiple sick or dead birds or other animals, take photos or a video.

Record your location and report it to the 24-hour Emergency Animal Disease Hotline on 1800 675 888.

Help protect our community, wildlife and farmers against bird flu.

What you can do

Learn more about how to protect your birds, wildlife and pets.

Keep your pets safe

H5 bird flu mainly affects birds. In rare cases, cats and dogs can get sick if they eat or interact with infected animals.

To help protect your pets from bird flu:

- prevent wild birds from accessing your pet's food and water
- don't let pets eat or touch sick or dead animals
- keep dogs on a leash, especially near wild birds
- keep cats indoors
- if you've had direct contact with sick or dead birds, shower and change clothes before touching your pets

If your pet gets sick after interacting with wild birds, keep them away from children and other animals and contact your vet.
