

Department of Agriculture, Fisheries and Forestry, 2025

The Emergency Marine Pest Plan is Australia's framework for managing marine pest outbreaks and guides our emergency response activities.

- [Marine pest response manuals](#) provide guidance on how to respond to a suspected or confirmed marine pest, and technical guidance on control, eradication and management.
- [Biosecurity incident management system: marine pest version](#) guides emergency response operations including advice on setting up control centres, organising response teams, and information on specific marine pests.

See [MarinePests.gov.au](https://www.marinepests.gov.au) for more information on emergency planning and response.
