

National action plans improve the way we prepare for, detect and respond to the [National Priority Plant Pests](#) (NPPP).

National action plans

See our current action plans for National Priority Plant Pests:

We continue to develop and publish action plans for all NPPPs.

Pests covered under national action plans

This table shows the NPPP included in each current action plan.

National action plan	National Priority Plant Pest
Xylella	Xylella and exotic vectors
Khapra beetle	Khapra beetle
	Bees (Apis spp.) (exotic species)
	Invasive snails (exotic species)
	Mites of bees (Apis spp.)
Hitchhiker pests	Spongy moth
	Spotted lanternfly
	Stink bugs
	Bursaphelenchus spp. and exotic sawyer beetle vectors
Trees and timber	Dutch elm disease
	Longhorn beetles (Anoplophora spp.) (exotic species)
	Myrtle (eucalyptus) rust (exotic strains)
	Pine pitch canker
	Sudden oak death (airborne Phytophthora spp.)
Exotic fruit flies	Fruit flies (exotic)
	Barley stripe rust (exotic strains)
Pests of broadacre crops	Karnal bunt
	Southern armyworm

	Stem borers of sugarcane and cereals (<i>Chilo</i> spp.) (exotic species)
	Texas root rot
	Ug99 wheat stem rust
	Banana phytoplasma diseases (exotic)
	Begomovirus and vectors (exotic strains and species)
	Blood disease and Moko disease of bananas
	'Candidatus <i>Liberibacter solanacearum</i> ' complex
	Citrus canker
	Fire blight
	Grapevine leaf rust
Pests of horticultural crops	Grape phylloxera
	Huanglongbing and vectors
	Panama disease
	Phytoplasma 16SrI group
	Plum pox virus (Sharka)
	Potato cyst nematode (exotic strains)
	Potato late blight (exotic strains)
	Tobamovirus (exotic strains)
Spotted wing drosophila	Spotted wing drosophila

How the plans work

Each plan:

- outlines the shared responsibility and cooperation between government, industry and research bodies
- establishes how we coordinate business-as-usual and research and development activities.

National action plans contain an implementation schedule. The schedule outlines the actions and project areas. It is also used to record the progress of the actions.

The Plant Health Committee (PHC) oversee the implementation of each plan.

How we develop and manage plans

We work with our stakeholders to develop and manage national action plans. They include the Plant Health Committee and the Environment and Invasives Committee.

Endorsement and reviews

Plant Health Committee endorse each plan.

Each national action plan has a 10-year lifespan. They are reviewed annually and at each 5-year mark.

National action plans under development

We are working on these plans:

- [National Action Plan for Exotic Fruit Flies](#)
- [National Action Plan for Pests of Broadacre Crops](#)
- [National Action Plan for Pests of Horticultural Crops](#)
- [National Action Plan for Spotted Wing Drosophila](#)
