

The full Exotic Environmental Pest List contains 168 exotic species, categorised into 8 biological groups. The 5-6 entries in each group with the highest biosecurity risk are included in a list of 42 species called the 'higher-risk EEPL'. Explore these high-risk species on this page.

Aquatic animal diseases

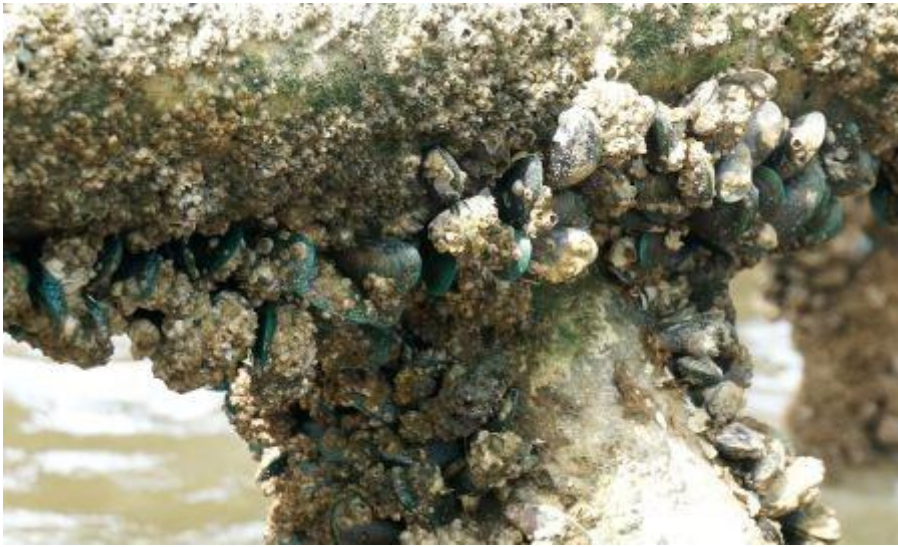

Freshwater invertebrates

Marine pests

Native animal diseases

Plant diseases

Terrestrial Invertebrates

Vertebrates

Weeds and Freshwater Algae

Report an exotic environmental pest

You can report an exotic environmental pest at [Outbreak.gov.au](https://outbreak.gov.au).

This site also contains up-to-date information on [current biosecurity outbreaks](#).

For more information

- Read the technical information about the development of [the EEPL including criteria](#)
- [See the full list of 168 pests](#).
- Contact the Environmental Biosecurity office on acebo@aff.gov.au.
