

Certain food, plant material and animal products from overseas could introduce serious pests and diseases into Australia, devastating our valuable agriculture and tourism industries, unique environment and our way of life.

Before you bring or mail goods to Australia, check that it's allowed into Australia. For detailed import conditions for all goods visit the department's [Biosecurity Import Conditions system \(BICON\)](#).

If you wish to bring or mail commercial goods to Australia, please refer to the [import section](#).

Declare it

When travelling to Australia you will be required to complete a declaration. By law, you must declare if you are carrying certain food, plant material or animal products. All footwear, clothing and equipment used in rural areas or near animals must be thoroughly cleaned and declared on arrival. You can take these declared goods with you to the clearance point where they will be assessed by a biosecurity officer and may be inspected. Alternatively, you can voluntarily dispose of food, plant material or animal products in bins located in the terminal.

For goods that are sent to Australia via mail, these must be accurately described on the postal declaration label. Read our advice on [mailing goods to Australia](#). Goods that do not meet import conditions will be directed for treatment or exported at the importer's expense. Alternatively, travellers may voluntarily dispose of the goods.

Check what you can bring or mail to Australia

Click on the item below that you would like to bring or mail to Australia. Please note that the products listed is not exhaustive. If the product you wish to bring isn't listed below, refer to [BICON](#).

Food and drink

These products are allowed into Australia if:

- they are for personal consumption
- they are fully cooked, shelf stable (do not require refrigeration) and contain no meat
- any fillings or toppings are cooked with the cake.

For all other cakes and cheesecakes refer to [BICON](#).

Cheese, butter, and other dairy products are permitted into Australia for personal use if the product is:

- commercially prepared and packaged
- produced in a country approved as being free from foot-and-mouth disease (the product label must list the country of origin)
- imported in an amount up to 10 kilograms or 10 litres

- for human consumption only.

Cheese and other dairy products must be declared and inspected on arrival. Products that do not meet import conditions will be exported or destroyed at the importer's expense.

You may bring commercially prepared and packaged chocolate into Australia as a personal import.

Other confectionery products often have a range of ingredients and the import conditions for each ingredient must be met. The import conditions can be found by searching BICON for each ingredient and selecting the appropriate [BICON](#) case.

Chocolate and confectionary must not contain meat (e.g. bacon).

Roasted coffee (excluding Kopi Luwak/Civet coffee)

Roasted coffee is permitted into Australia for personal use if it is roasted, ground or processed into instant coffee (up to 10 kilograms).

Kopi Luwak/Civet coffee

Kopi Luwak/Civet coffee, including whole beans, ground or for instant use, is allowed into Australia if all of the following conditions are met. This includes:

- the beans, or the beans from which the product is made, have been roasted
- the product is commercially prepared and packaged
- the product is imported in an amount up to 1 kilogram
- the product is for the personal consumption of the person wishing to import it.

Kopi Luwak/Civet coffee must be declared and inspected on arrival. Products that do not meet import conditions will be exported or destroyed at the importer's expense.

Green coffee

Green coffee is allowed into Australia, however the goods must be accompanied by a phytosanitary certificate. Refer to [BICON](#) for more information.

Green coffee must be declared and inspected on arrival. Products that do not meet import conditions will be exported or destroyed at the importer's expense.

Canned bony fish and fish products can be imported for personal use (10 kilograms or less per traveller) if it is able to meet the personal use conditions in the [BICON](#) case: Retorted goods.

The goods must:

- be commercially manufactured and packaged
- be retorted and the container in which the goods were retorted has not been opened since the goods were retorted

- not require refrigeration or freezing before the package is opened.

Retorting refers to the process of cooking food in an unopened, hermetically sealed container for a duration, and to a temperature, sufficient to make the contents commercially sterile. Vacuum-packed products are NOT retorted.

Uncanned bony fish and fish products are permitted to be imported for personal use.

To be classified as finfish for personal use, the goods must be either:

- eviscerated (gutted), or further processed, and in an amount of up to 5 kilograms per passenger, or
- able to be stored at room (or ambient) temperature, not requiring refrigeration or freezing before the package is opened and in an amount of up to 10 kilograms per traveller.

Import conditions for shark and other cartilaginous fish can be found by searching for cartilaginous fish in [BICON](#). You may require a wildlife trade permit and/or other approvals from the Department of Climate Change, Energy, the Environment and Water (DCCEEW). More information is available on DCCEEW's [International wildlife trade webpage](#).

Canned salmon can be imported for personal use (10 kilograms or less per passenger) if it is able to meet the personal use conditions in the [BICON](#) case: Retorted goods.

The goods must:

- be commercially manufactured and packaged
- be retorted and the container in which the goods were retorted has not been opened since the goods were retorted
- not require refrigeration or freezing before the package is opened.

'Retorting' refers to the process of cooking food in an unopened, hermetically sealed container for a duration, and to a temperature, sufficient to make the contents commercially sterile. Vacuum-packed products are NOT retorted.

Uncanned salmon is permitted to be imported for personal use if it is able to meet the personal use conditions in the [BICON](#) case: Salmonid fish for human consumption. The salmon must be in a consumer ready form, commercially prepared and packaged and must weigh either:

- 5 kilograms or less and accompanied into Australian territory by the person importing it, or
- 450 grams or less if unaccompanied into Australian territory by the person importing it (e.g. via post or courier).

Consumer ready forms for salmon include the following:

- cutlets, including the central bone and external skin but excluding fins, each cutlet weighing no more than 450 grams
- skin-on or skinless fillets, excluding the belly flap and all bone except the pin bones, of any weight
- eviscerated, headless fish, each fish weighing no more than 450 grams

- product that is processed further than described above.

Honey products are permitted into most Australian states and territories. Honey products must be inspected by a biosecurity officer on arrival to confirm the honey items are free from contamination.

Items that do not meet these conditions will be exported or destroyed at the importer's expense.

Western Australia currently has a higher quarantine status for bees and bee products. Honey or bee products imported into Western Australia must meet Western Australian state quarantine entry requirements. For more information contact the [Department of Primary Industries and Regional Development, Western Australia](#). Passengers arriving at ports outside of Western Australia should be aware that Western Australia has state quarantine entry requirements which will also apply should they travel domestically to Western Australia.

For information on beeswax products, refer to [beeswax](#).

Breast milk is permitted if it is for the personal use of infants under the care of the person wishing to import the breast milk and in quantities no greater than 10 litres or 10 kilograms.

If the breast milk product is not accompanied by the infant it is intended for, an [importer declaration](#) is required, stating that the milk:

- has not been sourced from donors and/or a commercial enterprise, and
- is in a quantity of no greater than 10 litres or 10 kilograms.

Dairy-based beverages with coffee, tea or flavouring are permitted into Australia for personal use if all the following conditions are met. The:

- product is commercially manufactured and packaged
- commercial package has not been opened or broken
- product is shelf stable (does not require refrigeration)
- product is for instant use
- product is imported in an amount up to 10 kilograms.

Multiple individual sachets are permitted within a larger package, if each sachet in the larger package is an individual serving.

Infant formula is allowed into Australia for personal use. It must be commercially prepared and packaged and list the country of manufacture on the packaging. The quantity allowed into Australia will depend on the country of manufacture.

If the infant formula is manufactured in a country approved as being free from foot-and-mouth disease, you may bring up to 10 kilograms or 10 litres for personal use, either in passenger luggage or as unaccompanied baggage or by international mail.

For infant formula manufactured in a country that is not on the list of countries approved as being free from foot-and-mouth disease, you may bring up to:

- 10 kilograms or 10 litres if accompanied by an infant
- 5 kilograms or 5 litres if not accompanied by an infant
- 1 kilogram or 1 litre for unaccompanied goods (e.g. goods sent by international mail).

Fruit and vegetable juices and soft drinks are allowed into Australia if they are commercially prepared and packaged.

Frozen juices must meet the import conditions in the [BICON](#) case: frozen fruit, vegetables and herbs for human consumption.

Maple syrup is allowed into Australia.

There are strict import conditions for personal imports of meat products, which can change quickly based on disease outbreaks. It is highly recommended you search and find the latest information and import conditions for meat products in [BICON](#). For:

- canned meat, search for "retorted goods"
- pig meat-based products that are not canned (i.e. unretorted), search for "pig meat"
- meat floss, please search for "animal based flavours or floss"
- all other meat products, search for "unretorted meat".

Canned (i.e. retorted) meat products

Personal imports of commercially manufactured and retorted meat products are permitted if the all the following import conditions are met. The products must be:

- manufactured in a country approved as being free from foot-and-mouth disease and the country of manufacture must be listed on the product label (note this requirement does not apply to canned poultry meat)
- in cans, jars or retort pouches and must be shelf stable (not require refrigeration or freezing to maintain quality).

Further information about import conditions for personal consignments of canned meat products is available by searching for "retorted goods" in [BICON](#).

These products will be subject to inspection to ensure that they are commercially manufactured and retorted. Canned meat products that do not comply with the above requirements will be destroyed.

Uncanned meat from New Zealand

Uncanned New Zealand meat is allowed into Australia if it is:

- sourced from sheep, cattle, goat, antelope, deer (including deer velvet), elk, moose, horse, donkey, mule, camel, alpaca, reptile, possum, rabbit, hare and llama

- clearly labelled as a product of New Zealand
- not of pork or avian origin
- for the personal consumption of the importer
- imported directly from New Zealand to Australia.

The product must be declared on arrival and may be inspected to ensure it complies with the above conditions.

Items that do not meet these conditions will be exported or destroyed at the importer's expense.

Uncanned meat (including ham, bacon, salami and sausages) from all other countries

Uncanned meats (includes vacuum sealed items) are not allowed into Australia unless accompanied by an [import permit](#).

Jerky/Biltong

Jerky and biltong derived from pig meat brought in for personal use is not permitted and is considered to pose a high biosecurity risk.

Meat jerky/biltong is allowed into Australia if it meets all the following import conditions. The product must be:

- NOT made from pork (pig meat)
- manufactured in a country approved as being free from foot-and-mouth disease and the country of manufacture is listed on the product label (note this requirement does not apply to jerky made from poultry meat)
- shelf stable (does not require refrigeration)
- commercially prepared and packaged and arrive in Australia in sealed (unopened) packaging
- imported in an amount up to 1 kilogram
- for the personal consumption of the importer.

The product must be declared on arrival and may be inspected to ensure compliance with the above conditions.

If the jerky does not comply with the conditions above, it will be destroyed.

Meat floss

Meat floss is allowed into Australia for personal use only if it is:

- manufactured in a country approved as being free from foot-and-mouth disease and the country of manufacture is listed on the product label (note this requirement does not apply to floss made from poultry meat), and
- commercially manufactured and very finely shredded (with no identifiable meat pieces).

The product must be declared on arrival and may be inspected to ensure compliance with the above conditions.

Noodles or pasta made from plant material only

Noodles or pasta that are commercially manufactured and packaged and contain only ingredients of plant origin are permitted.

Noodles/pasta that are not commercially prepared and packaged will be inspected. If biosecurity risk material is found, it will be exported or destroyed at the importer's expense.

Instant noodles/pasta

Commercially prepared and packaged noodles are permitted if they are:

- for instant use, and
- shelf stable (do not require refrigeration).

Note: Noodles that contain ingredients derived from cattle, goats, sheep or pigs must have a manufacturer's label stating that the product was manufactured in a country approved as being free from foot-and-mouth disease.

Only approved species of nuts are allowed into Australia.

Raw peanuts are not permitted and will be destroyed, unless they meet the exclusions listed on the [urgent actions to protect against khapra beetle webpage](#). Commercially prepared and packaged processed peanuts are permitted, but must meet the relevant import conditions in [BICON](#).

Commercially prepared and packaged approved species of nuts are allowed into Australia if they are one of the following:

- blanched/roasted/fried/boiled
- shelled and tightly vacuum sealed
- packaged in small confectionery tins sealed under vacuum.

Permitted raw nuts must arrive with a phytosanitary certificate. Raw nuts must also meet weight and packaging requirements or undergo mandatory treatment offshore or on arrival. Nuts must be declared and may be inspected on arrival. Products that do not meet import conditions will be exported or destroyed at the importer's expense.

Find out more about which [types of nuts](#) you can bring with you or refer to [BICON](#).

Vegetable and seed oils (includes peanut, safflower, linseed, olive and cotton seed oils) are allowed into Australia. The goods must be clean and free of contaminant seed, soil, and animal or plant debris prior to arrival in Australian territory.

Whole or ground pepper is allowed into Australia if it is:

- commercially prepared and packaged
- labelled with the full botanical name of a permitted species.

Pepper must be declared and may be inspected on arrival. Products that do not meet import conditions will be treated (if an appropriate treatment is available), exported or destroyed at the importer's expense.

Refer to [BICON](#) for specific conditions.

All pet food, treats and chews made from, or containing, animal or plant derived material, require an import permit, and/or an official government veterinary certificate or manufacturer's declaration. There are no small quantity or personal pet exemptions. Examples of products that require an import permit include rawhide chews, pigs' ears, biscuits, kibble, canned pet food, jerky strips and 'chocolate' drops for pets. Products that are not accompanied by a valid import permit or do not meet import conditions, including presentation of required documentation, will be exported or destroyed.

Note: Pet toys made from nylon, rubber or plastic, that do not contain any ingredients of animal, plant or microbial origin, are permitted into Australia without an import permit.

For information on pet supplements, see [Veterinary therapeutic goods](#).

For more information, refer to [BICON](#).

Uncooked prawns and prawn products

The importation of uncooked prawns is not permitted unless strict import conditions are met. All uncooked prawns and prawn products require an import permit. This includes prawn meat, breaded/battered/crumbed prawn products and highly processed prawn products such as dumplings or spring rolls. The conditions on the import permit provide further information as to the requirements to import uncooked prawns and prawn products. These conditions include certification from approved overseas government bodies (competent authorities) and declarations from the manufacturer of the prawns.

For more information, please see the other conditions in the [BICON](#) case: Prawns.

Cooked prawns

Cooked prawns must be accompanied by a specific health certificate issued by the competent authority of the country of origin stating:

- The prawns have been cooked in premises in the exporting country that are approved by and under the control of the competent authority of the exporting country
- As a result of the cooking process all the protein in the prawn meat has coagulated and no raw prawn meat remains.

For details regarding the format of the health certificate accompanying the imported cooked prawns and lists of competent authorities of exporting countries refer to the Cooked prawns from approved countries conditions in the [BICON](#) case: Prawns.

These conditions must be met for both commercial and personal imports. If you do not have the correct documents the prawns will be exported or destroyed at the importer's expense.

Dried prawns/shrimp and shelf stable prawn-based food products

Personal imports of dried prawns, and products containing dried prawns for human consumption are allowed into Australia if all import conditions are met. The dried prawns must be inspected by a biosecurity officer on arrival to ensure they are dried and free from live insects, soil and other contamination. If the items are not dried or are contaminated, they will be exported or destroyed at the importer's expense.

Shelf stable prawn-based food products are allowed into Australia. Products may be inspected upon arrival to ensure they are shelf stable (do not require refrigeration). To meet the shelf stable conditions, the goods must:

- have been commercially manufactured,
- have been packaged by the manufacturer
- be in that package
- be in a package which has not been opened or broken,
- be able to be stored in the package at room or ambient temperature, and
- not require refrigeration or freezing before the package is opened.

For items that do not meet the above requirements an [import permit](#) must be obtained prior to importation.

For more information refer to the [BICON](#) case for prawns.

Jam, chutney, pickles and canned, bottled or preserved fruit and vegetables (with or without seeds) are allowed into Australia if they are:

- preserved or pickled by an acceptable method; and/or
- canned or aseptically packaged*.

Acceptable methods of preserving/pickling fruits and vegetables are:

- pickled in salt brine, vinegar, alcohol or sugar syrup
- cured in salt or sugar
- glacé, crystallised or infused with/in sugar syrup (including but not limited to mixed peel, cranberries, tropical fruits)
- canned or bottled in salt, sugar, vinegar, salt brine, alcohol or oil
- boiled with sugar until gelled (jam or jelly).

*Canned/aseptically packaged includes any item that has been commercially heat treated to make the contents sterile.

The product must be shelf stable (not requiring refrigeration) for a minimum of six months.

Acceptable container types include:

- metal cans
- glass jars or bottles with 'twist off' lids or caps
- plastic containers that have heat sealed lids or lids closed by a double seam (excludes those with snap or plastic lids)
- retort pouches
- thermoform-fill-seal containers, plastic cans, pouches or bags.

Each item will be inspected to check that it meets these conditions.

If the product does not comply with the conditions above it will be exported or destroyed at the importer's expense.

Red dates are permitted into Australia, if they meet the following conditions:

- if the dates contain seed, they must be an approved species of red date. Refer to [BICON](#) for specific conditions.
- the full botanical name must be provided on a manufacturer's declaration label or invoice (e.g. *Ziziphus ziziphus*)
- the products must be thoroughly dried
- the products must be packed in clean and new packaging that is unopened
- each package will be inspected to ensure no biosecurity risk material is present.

If the product does not comply with the conditions above it will be exported or destroyed at the importer's expense.

Raw (uncooked) rice is not permitted and will be destroyed.

Other processed rice products (including roasted, parboiled or puffed rice, microwave ready rice pouches, rice flakes and rice flour) must meet import conditions. Refer to [BICON](#) for specific conditions.

Commercially prepared and packaged sauces (including ketchup/catsup, soy, chilli, and peanut sauce) and curry pastes are allowed into Australia for personal use.

The sauce or paste must be commercially cooked, shelf stable (able to be kept at room temperature for at least 6 months) and enclosed in hermetically sealed containers such as:

- metal cans
- glass jars or bottles with 'twist off' lids or caps
- plastic containers that have heat sealed lids or lids closed by a double seam (excludes those with snap off plastic lids)

- aseptic cartons
- retort pouches.

All plant ingredients and seasonings are permitted in these products. For products containing animal-derived ingredients, check the specific import conditions for the ingredient on [BICON](#).

There are various import conditions that must be met for seafood, including crustaceans (crabs and lobsters) and molluscs (abalone, octopus, squid). For more information, see [BICON case: Seafood](#) (excluding finfish) for human consumption.

Crustaceans (excluding prawns) and molluscs (excluding oysters and snails) for personal use must be dead and must be clean and free of other plant and animal material. All imports will be inspected upon arrival to ensure the goods are dead and clean of other risk material.

Oysters in full shell are not permitted.

Half-shell oysters from New Zealand can only be imported in volumes of up to 10 kilograms per person and will be inspected upon arrival to ensure they are in half-shell form and do not contain any other plant or animal material.

Oyster meat (no shell) must be commercially packaged and prepared and must be accompanied by a statement that the product contains no shells.

Snails that are sourced from the land (terrestrial) or freshwater systems must only be imported in retorted form. Retorting refers to the process of cooking food in an unopened, hermetically sealed container for a duration, and to a temperature, sufficient to make the contents commercially sterile. Vacuum-packed products are NOT retorted. When imported for personal use, the goods must:

- be commercially manufactured and packaged
- be retorted and the container in which the goods were retorted has not been opened since the goods were retorted
- not require refrigeration or freezing before the package is opened.

Marine snails including conch, that are sourced from the ocean or other marine ecosystems, must be accompanied by a declaration from the manufacturer of the product stating that the goods are:

- approved species of marine snails
- clean and free of other plant and animal material
- non-viable.

The approved list of marine snail species can be found in the [BICON case: Snails for human consumption](#).

Cnidarians (sea anemones, sea corals and jellyfish), echinoderms (sea cucumbers, sea stars, sea urchins and New Zealand Kina), tunicates (sea squirts) and poriferans (sea sponges) must be dead and must be clean and free of other plant and animal material. All imports will be inspected upon arrival to ensure the goods are dead and clean of other risk material.

Palolo worms for personal use (2 kilograms per passenger including any sea water the goods are imported within) are permitted if they meet the following conditions. They must:

- be palolo worms only, which may be imported in water (the water is included in the 2 kilogram weight limit)
- be for human consumption only
- be dead
- not contain biosecurity risk material
- be accompanied into Australian territory.

For more information, refer to the [BICON](#) case: Cnidarians, echinoderms, tunicates, poriferans, sipuncula and palolo worms.

Cumin, coriander and fennel seeds are not permitted and will be destroyed, unless they meet the exclusions listed on the [urgent actions to protect against khapra beetle webpage](#).

Dried chillies/capsicum are not permitted and will be destroyed, unless they meet the exclusions listed on the [urgent actions to protect against khapra beetle webpage](#).

Some herbs and dried, ground spices and spice mixes may be allowed into Australia if they meet specific import requirements.

A phytosanitary certificate may be required. Refer to [BICON](#) to get the most up to date conditions. Multiple BICON cases may apply, including but not limited to:

- dried herbs for human consumption
- powdered plant products for human consumption
- raw seed for human consumption.

Products that do not comply with the BICON conditions will be treated (if an appropriate treatment is available), exported or destroyed at the importer's expense.

For information on pepper visit [pepper \(ground or whole\)](#).

Plain black or green teas and plain black or green teas with flavouring

These teas are allowed into Australia from any country if the tea is in clean and new packaging (unopened) and free of live insects and other contamination.

Herbal tea bags and loose leaf tea

Herbal tea bags and loose leaf teas are allowed into Australia if:

- they are commercially prepared, packaged and labelled (if tea bags) or in clean and new packaging (if loose leaf tea)
- the tea contains ingredients of plant origin only
- all material in the tea is thoroughly dried

- the weight of each product (blend) within the consignment is no greater than 1 kilogram per blend
- the tea contains no seeds, or permitted seeds only (if loose leaf).

For consignments containing fungi (dried mushrooms) including Ganoderma, Poria cocos and Cordyceps, refer to the [BICON](#) case: Mushrooms for human consumption.

If you are importing tea with animal, other fungal or microbial products, refer to [BICON](#) for each individual ingredient to determine the conditions that apply.

Veterinary therapeutic goods are used to prevent, diagnose, cure or alleviate a disease or condition in animals, or prevent, diagnose, cure or alleviate an infestation of animals by a pest, or cure or alleviate an injury suffered by animals, or influence, inhibit or modify a physiological process associated with a disease or condition in animals.

Examples of veterinary therapeutic goods include vaccines, antibiotics, flea, tick and worm control, herbal remedies, and dietary supplements for animals. These goods may come in forms such as tablets, pills, capsules, powders or liquids.

Strict import conditions apply to these goods, even for small quantities imported for personal use.

For full import conditions for these products refer to the [BICON](#) case: Veterinary therapeutics and veterinary therapeutic ingredients.

Vitamins, supplements and therapeutics for human use are allowed into Australia if the product is:

- for human use—this may be supported by item labelling, an accompanying brochure, internet printout or a letter from a doctor
- brought to Australia by the person who intends to use it
- commercially prepared and packaged in the form of capsules, tablets, vials for injection, liquid, powder, ointment, this includes commercially packaged probiotics, e.g. Lactobacillus, Bacillus subtilis and Bifidobacterium spp.
- brought in a quantity of no more than three months' supply*.

*Three months' supply can be determined by:

- label dosage advice
- a letter in English from a medical practitioner, naturopath or alternative health provider
- a statutory declaration by the importer stating that the item is for personal use only and is no more than three months' supply.

If an item does not meet all the above conditions it will be exported or destroyed at the importer's expense.

Supplements and natural medicines of plant origin

For dietary supplements and natural medicines containing ingredients of plant origin, refer to [BICON](#).

Fungi (dried mushrooms)

For consignments containing fungi (dried mushrooms) including Ganoderma, Poria cocos and Cordyceps, refer to [BICON](#).

Protein powders and sports supplements

For protein powders and supplements (e.g. performance enhancement supplements), refer to [BICON](#).

Prescription and over-the-counter medicines

For pharmaceutical products, including prescription medicines (e.g. blood pressure medication and contraceptive pill), please contact the [Therapeutic Goods Administration](#) or [Australian Border Force](#).

Wheat is not permitted and will be destroyed, unless it meets the exclusions listed on the [urgent actions to protect against khapra beetle webpage](#), for example wheat that is commercially ground or milled is allowed.

Refer to [BICON](#) to get the most up to date conditions.

Whole eggs are not allowed into Australia unless accompanied by an import permit.

For more information on importing chicken (*Gallus gallus domesticus*) egg products for human consumption refer to the [BICON](#) case: Egg and egg products for human consumption.

For import of whole eggs that are not chicken eggs for human consumption see [Eggs for hatching](#).

Souvenirs, household items and collectables

Animal horns, teeth or bones are allowed into Australia if they are clean and free from contamination with seed, soil and animal or plant debris.

If contamination is found on the items they will be treated, exported or destroyed at the importer's expense.

Animal horns or bones may be subject to control under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). Items known to be or considered to be covered by CITES will be referred to the Department of Home Affairs on arrival in Australia.

If you are unsure whether the item you wish to bring into Australia is of CITES concern please check with the Department of Climate Change, Energy, the Environment and Water (DCCEEW). More information is available on DCCEEW's [International wildlife trade webpage](#).

Cosmetic products are allowed into Australia if they are commercially manufactured and packaged and for the personal use of the person wishing to import the item. You may bring up to 10 kilograms or 10 litres for personal use.

Cosmetics other than those listed above may require an import permit. Tax free limits do apply to the import of goods into Australia. Please contact the [Australian Border Force](#).

Feathers and items containing feathers are allowed into Australia from any country if they are manufactured feather items for personal use. You may bring up to 10 feather articles as a personal import. Feather articles that do not meet these requirements will be treated, exported or destroyed at the importer's expense.

Beeswax products (including beeswax wraps, candles and furniture polish) are allowed into Australia for personal use. Beeswax products must be inspected to verify they are clean and free from insects, seeds or other contamination. The products must be clearly identifiable.

Beeswax products that do not meet these requirements will be exported or destroyed at the importer's expense.

Fishing gear (excluding bait), camping and water sport/sporting equipment

Recreational and sporting equipment that has been used outside Australia can contain harmful diseases (e.g. [African swine fever](#) and [foot-and-mouth](#)) or invasive freshwater pests (e.g. [Didymosphenia geminata](#) also known as Didymo or rock snot).

Fishing gear (including rods, reels and tackle), camping and sporting equipment is allowed into Australia. All equipment must be clean and dry when it arrives in Australia. Before travelling to Australia be sure to clean your equipment thoroughly to remove any:

- soil, mud or clay
- animal or faecal matter
- plant matter such as straw, twigs, leaves, roots, bark or unidentified seeds.

Specific conditions for equipment used in freshwater

Equipment that has been used in freshwater lakes or rivers overseas must be:

- clean and free from visible clumps of algae
- completely dry.

If the equipment doesn't meet these requirements, or if it cannot be inspected to verify that is clean and completely dry, it must be treated, exported or destroyed at the importer's expense.

For the full list of import requirements refer to [BICON](#).

Leather goods, hides, furs and skins that have been effectively and fully tanned are allowed into Australia. This includes items such as animal skin (leather) purses, shoes, wallets and belts.

Animal skin floor mats must be inspected to confirm that the item is fully tanned and to ensure they are free from contamination (e.g. animal tissue, soil, feathers, insects, seeds, bark).

Rawhide items are permitted if they are for personal use only and are free from adhering [animal tissue](#), other contamination or evidence of decay. You may bring up to 10 rawhide articles as a personal import. Rawhide items must be inspected on arrival to confirm they meet these requirements.

Finished game trophies and taxidermy specimens for personal use can be imported if fully tanned, free of adhering fat, muscle, blood, bone and evidence of decay. Skulls and horns, if present, must have been boiled.

If an item does not meet the above conditions, it must be treated, exported or destroyed at the importer's expense.

These goods may be subject to control under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). Items known to be or considered to be covered by CITES will be referred to the Department of Home Affairs on arrival in Australia.

If you are unsure whether the item you wish to bring into Australia is of CITES concern, please check with the Department of Climate Change, Energy, the Environment and Water (DCCEEW). More information is available on DCCEEW's [International wildlife trade webpage](#).

Seashells (excluding oyster shells), sand, rocks and fossils are allowed into Australia if they are free from insects, soil, and animal and plant material. The items must be inspected on arrival to ensure they are free from infestation and contamination.

If items do not meet these import conditions they must be treated, exported or destroyed at the importer's expense.

If the goods are identified as soil, an import permit will be required, refer to [BICON](#).

Some seashells (e.g. Queen Conch) may be subject to control under the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES). Items known to be or considered to be covered by CITES will be referred to the Department of Home Affairs on arrival in Australia.

If you are unsure whether the item you wish to bring into Australia is of CITES concern, please check with the Department of Climate Change, Energy, the Environment and Water (DCCEEW). More information is available on DCCEEW's [International wildlife trade webpage](#).

Seeds

Seeds can be sent or brought to Australia if they meet the following requirements:

- Seeds must be a permitted species. [Search for the species you wish to import in BICON](#) to confirm if it has been assessed as being permitted entry into Australia.
- Seeds must be accompanied by a phytosanitary certificate issued by the government of the exporting country to verify freedom from species of Trogoderma in [Australia's list of Trogoderma species of biosecurity concern](#). Refer to [BICON](#) for more information.
- Seeds arriving through the mail, air courier or traveller baggage will need to be commercially packaged and labelled with the full botanical name (genus and species). Certain seed species are

hosts of [khapra beetle](#) and are banned from entry into Australia. Refer to [BICON](#) for more information.

- Seeds must be free of live insects, soil, disease symptoms, non-permitted seeds, other plant material (e.g. leaf, stem material, fruit pulp, pod material), animal material and any other contamination.
- If the seeds require an import permit issued by the department, the sender must sight a copy of the import permit to ensure that they can meet the conditions for sending seeds to Australia and include a copy of the permit in the consignment.

Read more about [importing seed for sowing](#).

Seeds that do not meet import requirements will be exported or destroyed at the importer's expense.

Live plants

Most live plants must not be imported to Australia unless the importer has a valid import permit issued by the department.

Read more about import permits and view import conditions including documentation requirements and post entry quarantine periods for [live plants](#).

Wooden items are allowed into Australia if they are free from bark, insects and signs of insect damage (such as borer holes) or any other contamination. To check for insect damage look closely at wooden items for holes and sawdust. Wooden items must be declared and inspected on arrival.

Wooden items that do not meet these import conditions will be treated, exported or destroyed at the importer's expense.

For more information visit [importing wooden and bamboo articles for non-commercial \(personal\) use](#).

Live animals

Cats and dogs may only be imported to Australia under strict conditions. For more information visit [bringing cats and dogs to Australia](#).

Birds (including chicken, turkey, duck)

Hatching eggs of birds are not permitted unless you have a valid import permit. For more information, refer to the [BICON](#) case: Hatching eggs of birds.

Reptiles

Personal imports of reptile eggs are not permitted. For more information, refer to the [BICON](#) case: Crocodilians for zoological purposes.

Amphibians

Personal imports of amphibian eggs are not permitted. For more information, refer to the [BICON](#) cases: Amphibians for zoological purposes and Amphibians for laboratory use.

Further information

Search the [Biosecurity Import Conditions system \(BICON\)](#) to find detailed import conditions.
