

Biosecurity cost recovery implementation statement 2026–2027

In 2026, the department will apply indexation to most biosecurity and imported food regulatory charges. All legislated regulatory charges that are subject to an indexation provision will increase by 3.8% on 1 July 2026. The exception to this is three charge points related to companion animals which will increase above the indexation rate.

New rates for 2026-27 are the calculated replacement amounts described in the 2026-27 Biosecurity Cost Recovery Implementation statement (CRIS) and pricing tables.

In 2026 we have made changes to biosecurity charging legislation to improve cost recovery. These changes introduce new charges for live garden snails, remove provisions no longer applied for import permit assessment and horse husbandry, revise cost recovery provisions for avian imports.

These changes will commence 1 July 2026. Further information on these changes is provided in the 2025-26 Biosecurity CRIS.

2026-27 fees and charges

Changes to cost recovery for our regulatory diagnostic activity

Improvements to cost recovery for our regulatory diagnostic services are proposed to be introduced through a phased approach across 2026-27:

- Phase 1 (1 July 2026): Introduction of new charges for diagnostic activities associated with international vessels.
- Phase 2 (expected 1 November 2026): Revised fee structure and fixed fees for most diagnostic activities undertaken for imported cargo.

Further information on the phased approach is available in Improving Cost Recovery for Diagnostic Activities - 1 July 2026.

Biosecurity cost recovery implementation statements 2025-26

In 2025, the department will applied indexation to biosecurity and imported food regulatory charges. All legislated regulatory charges that are subject to an indexation provision increased by 2.4% on 1 July 2025.

Indexation does not require changes to legislation, new rates for 2025-26 are the calculated replacement amounts described in the 2025-26 Biosecurity Cost Recovery Implementation statement (CRIS) and pricing tables.

On 1 July 2025 a new one off charge that applies to approved arrangement and food import compliance agreement holders commenced. Further information on the new charge is provided in the 2025-26 Biosecurity CRIS.

Previous CRIS

In 2023, in conjunction with the implementation of new charges, the department committed to an annual review of regulatory charges and made changes to legislation to include indexation.

In 2024, the department will embed the annual review and apply indexation to regulatory fees and charges. All legislated regulatory charges that are subject to an indexation provision will increase by 4.1% on 1 July 2024.

Indexation of legislated rates does not require changes to legislation, new rates for 2024-25 are the calculated replacement amounts described in the 2024-25 Biosecurity CRIS and pricing tables.

Cost recovery implementation statement 2024-25: low-value goods imported under a Self-Assessed Clearance declaration

This cost recovery implementation statement (CRIS) provides information about how the Self-Assessed Clearance (SAC) cost recovery charge is implemented by the Department of Agriculture, Fisheries and Forestry.

See [further information about the SAC charge](#).

This CRIS should be read in conjunction with the Biosecurity CRIS 2024–2025. This CRIS will be incorporated into the Biosecurity CRIS from 2025-26 onwards.

The 2023-24 Biosecurity Cost Recovery Implementation Statement sets out the changes to existing regulatory charging, and the fees and charges that applied in 2023-24. This was the first comprehensive review since 2015, the outcome resulted in changes to the structure of some charges, all regulatory charges, needed to align the cost to deliver our regulatory activities to prices.
