

Australia is committed to driving climate action in the agriculture, fisheries and forestry sectors. At the United Nations Climate Change Conference, COP30 in Belem, we showcased Australian agriculture, fisheries and forestry across two weeks.

COP30 was a valuable opportunity to share our experiences internationally, demonstrate our commitment to climate action, and develop partnerships to support Australian farmers. Sustainable, climate-smart practices are central to Australian agriculture and key to the sector's future success.

As there is no one-size-fits-all approach to sustainable agriculture, COP30 was an opportunity to encourage practices that are tailored to the ecological, cultural and economic conditions of each country.

At COP30, Australia welcomed Brazil's flagship agriculture initiative Resilient Agriculture Investment for net Zero land degradation, which aims to accelerate investments for agricultural land restoration. It will map out degraded landscapes, identify investable restoration projects, highlight the best means to invest and foster collaboration and knowledge sharing within the financial ecosystem.

We showcased Australian examples of climate-smart innovation in the agriculture, fisheries and forestry sectors widely at COP30 – in Brazil's Agrizone, the Australia pavilion, the Pacific's Moana Pavilion and beyond.

DAFF events

Sustainable Food Systems in a Changing Climate

International technical experts and policy makers discussed the impact of climate change on food security and sustainable food systems from a regional perspective.

Speakers

Nick Blong, First Assistant Secretary, Department of Agriculture, Fisheries and Forestry

Dr Michael Robertson, Director-Agriculture and Food Research Unit, CSIRO

Sophie Beecher, Director General of the Sustainable Development Policy Directorate, Agriculture and Agri-Food Canada

Dr Aggrey Agumya, Executive Director and Head of Mission, Forum of Agricultural Research in Africa

Rodrigo Lopes de Almeida, Secretariat of Trade and International Affairs, at the Ministry of Agriculture, Livestock and Food Supply

Managing and preserving soil health: key to a climate smart agriculture industry

This event brought together diverse global perspectives to discuss action and investment to support soil health in the context of national priority actions and emerging global threats such as climate change and food security.

Speakers

Nick Blong, First Assistant Secretary, Department of Agriculture, Fisheries and Forestry

Dr Michael Robertson, Director-Agriculture and Food Research Unit, CSIRO

Sophie Beecher, Director General of the Sustainable Development Policy Directorate, Agriculture and Agri-Food Canada

Dr Paula Packer, Chief-General of Embrapa Environment, Brazilian Agricultural Research Corporation (Embrapa)

You're Barking Up the Right Tree - Sustainable Construction and Forest Policy in Action

Panellists explored the pivotal role of timber in transforming the construction sector to meet climate goals, and the policy levers that can support. [Watch it here.](#)

Speakers

Nick Blong, FAS Sustainability, Climate and Strategy, Department of Agriculture, Fisheries and Forestry

Amy Duchelle, Senior Forestry Officer, FAO

Rachel Millar, Environmental Manager, Forest Owners Association of New Zealand.

Harry Mills, Campaign Manager, Built by Nature

Michael Taylor, Farmer, Taylors Run

Francisco Ruiz-Tagle, Chief Executive Officer, CMPC

Coordinated Action for a Sustainable Future: Exploring Rio Convention Synergies

This panel explored the synergies and linkages between the three Rio conventions as they relate to issues such as sustainable agriculture, food systems and integrated land use planning, identifying ways to leverage coordinated policies, and on-the-ground interventions for holistic sustainable development outcomes. [Watch it here.](#)

Speakers

Christina Munzer, Director, Department of Agriculture, Fisheries and Forestry

Jorge Caetano Junior, Coordinator-General for Climate Change and Sustainable Development, Ministry of Agriculture and Livestock of Brazil

Maya Rajasekharan, Managing Director, Alliance of Biodiversity International and CIAT

Cristian Barraqueta, Climate and Biodiversity Officer, World Rural Forum

Michael Taylor, Farmer, Taylors Run

Fish and Sips 2.0

Oceans play a vital role in culture and way of life in the Pacific region, supporting valuable marine industries including commercial and recreational fishing, aquaculture, renewable energy, shipping and more. Technical experts from around the world shared work underway on sustainable and climate smart fisheries.

Speakers

Nick Blong, First Assistant Secretary, Australian Department of Agriculture, Fisheries and Forestry

Dr Pio Manoa, Deputy Director General, Forum Fisheries Agency

Dr Michelle Tigchelaar, Senior Scientist, WorldFish

Pearl Mitchell, Deakin University PhD candidate, 2025 ATSE Scholar, Global Voices Fellow

Harnessing Advanced Weather Modelling for Climate-Resilient Agriculture

Opening with a presentation on My Climate View, panellists discussed weather and climate modelling as a tool to support agriculture's ability to adapt to climate change. [Watch it here.](#)

Speakers

Nick Blong, FAS, Department of Agriculture, Fisheries and Forestry

Dr Michael Robertson, Director-Agriculture and Food Research Unit, CSIRO

Alan Petersen, Chairman, Teitei Taveuni

Maggie Jarret, Sustainability Manager, See Saw Wines

Videos

These videos produced for COP30 detail how different sectors are responding to a changing climate. Each video highlights the diversity of Australia's agricultural landscape and the wide range of innovative research and development activities undertaken across the agriculture sector.
