

The National Management Group (NMG) for the National Red Witchweed Eradication Program met on 06 June 2025 and approved a revised Response Plan for 2025-26. The revised Response Plan will build upon the substantial advances made through this response to date and will deliver final eradication activities as well as Proof of Freedom surveillance.

The National Red Witchweed Eradication Program, led by the Queensland Department of Primary Industries, has made significant achievements in the eradication of the weed from Australia, with 98% of impacted land being returned to production to date.

The NMG, comprised of the Queensland, New South Wales, Northern Territory and Commonwealth governments, Australian Cane Growers Council, Cattle Australia Limited, and Grain Producers Australia, expressed their thanks to Queensland for their efforts. Eradication efforts have been cost-shared by members of the NMG since 2015.

If you think you have seen red witchweed in Queensland, contact Biosecurity Queensland on 13 25 23. For elsewhere in Australia contact the Exotic Plant Pest Hotline on 1800 084 881. You can find out more about how we respond to pest and disease incidents at outbreak.gov.au.
