

Aquaculture is growing in volume and value across the globe. It's an increasingly important contributor to economic and food security.

[ABARES Australian fisheries and aquaculture outlook report](#) found the real value of Australia's aquaculture sector is projected to grow to \$2.21 billion by 2028–29.

This potential growth could see aquaculture represent 64% of Australia's total seafood sector production value.

The Australian Government Aquaculture Statement outlines the Australian Government's support and initiatives for a sustainable aquaculture industry.

It also provides a platform for ongoing discussion on how to support a growing aquaculture industry.
