

The Australian Government's \$3.5 million farm forestry, private native forestry and Indigenous forestry projects were developed in partnership with state and territory governments during 2020 21 and 2021 22. The aim of the projects was to support the states to offer advice on the establishment of new farm forestry assets, private native forestry and Indigenous forestry areas suitability for sustainable harvesting of forest products.

The projects developed materials, evidence or helpful information for land managers who wish to establish new farm forestry assets and/or private native forestry or assess the suitability of Indigenous forestry areas for the sustainable harvest of forest products.

For detail information on the work undertaken on implementing the projects and key finding from each project, please refer to the relevant state and territory websites:

State	Department	Projects
New South Wales	Department of Primary Industries	Carbon in Forests, Wood Products and Bioenergy
New South Wales	Local Land Services	Private Native Forestry at Warrazambil
Victoria	Department of Jobs, Precincts and Regions	Farm forestry research trial
Queensland	Department of Agriculture and Fisheries	Private native forestry and management of private native forests
South Australia	Department of Primary Industries and Regions	Trees on Farms initiative and Farm-based forestry resources
Western Australia	Forest Products Commission	Opportunities to increase farm forestry in Western Australia
Tasmania	Private Forests Tasmania	Farm Forestry Carbon Tool
Northern Territory	Department of Industry, Tourism and Trade	Farm forestry development in the Northern Territory
Australian Capital Territory	Environment, Planning and Sustainable Development Directorate	Unlocking opportunities for farm forestry in the ACT
