

The North East Regional Forest Agreement (RFA) is one of three RFAs in New South Wales, and comprises two sub regions: Upper North East and Lower North East. The Australian and New South Wales governments signed the North East RFA on 31 March 2000.

The North East RFA was varied on 28 November 2018 with an extension until 26 August 2039, as it has proven to be a strong and effective framework for the sustainable management of North East RFA region's forests. The extension was formalised following assessment, public consultation and independent review.

The North East RFA now has a 20-year rolling life, so at any point in time the North East RFA will be between 15 and 20 years from expiring, depending on the satisfactory completion of the five-yearly reviews.

Extending the North East RFA gives long-term surety of resource access for industry, ecologically sustainable management and use of forested areas and an extensive system of conservation reserves.

The North East RFA variation includes two Annexures: Annexure 1 is the RFA marked up; Annexure 2 is a 'clean' version of the RFA as varied without the mark up.

New South Wales RFAs five-yearly reviews

It is a requirement of the North East RFA that its performance is reviewed every five years. The details of the North East RFA review process is outlined in the agreement.

The Australian and New South Wales governments have reported on the three NSW RFAs collectively:

Historical Publications

Many historical publications informed the development of the North East RFA and continue to underpin the management of forests covered by the agreement.

There are also [historical statewide publications](#) that informed the development of the three RFAs in New South Wales.
