

Publication details

The field guide aims to help people recognise diseases of significance to aquaculture and fisheries in Australia. This edition incorporates new and updated information gathered from an extensive review of the fourth edition. It now covers 53 aquatic animal diseases of significance to Australia that affect species of finfish, crustaceans, molluscs and amphibians.

Aquatic Disease Field Guide app

The field guide is also available as a mobile app. Search and learn about aquatic animal diseases that affect finfish, molluscs, crustaceans and amphibians. The app can be freely downloaded through the [Google Play store](#) (Android devices).

Sections in the guide

Sections of the guide are available to download separately.

User guide

The user guide provides information about the production of this field guide, how to use this field guide and offers principles applicable to the investigation of a suspected disease. Local advice may be obtained by contacting the listed state and territory authorities and using the references and weblinks provided. If you see any unusual signs in aquatic animals play it safe and report it immediately. Don't worry about how insignificant it may be—small signs may be an early indication of a serious disease problem. The Emergency Animal Disease Hotline number is [1800 675 888](#).
