

The Australian Chief Plant Protection Officer (ACPPO) Webinar series, hosted by Australian Chief Plant Protection Officer Dr Rosa Crnov showcase plant health research, innovation, and biosecurity initiatives; fostering collaboration between the department, plant health stakeholders and the community.

Please follow [Dr Crnov's LinkedIn channel](#) for updates on upcoming webinars, and to have your email address added to the webinar invitation distribution list, please email: planthealth@aff.gov.au.

Webinar series

Our webinar series are available to watch via the links below.

2025

- [20 November](#) - Australian auger and furniture beetles: Resolving morphological and molecular relationships of economically and environmentally important insect groups
- [21 October 2025](#) - Citrus industry surveillance and preparedness
- [18 September 2025](#) - Significant biosecurity interceptions and advances in plant pathology in DAFF's border laboratories
- [21 August](#) - Significant Plant Pest Biosecurity Interceptions in 2024 – 2025
- [24 July 2025](#) - What can we learn from the response to Varroa destructor in Australia - lessons for biosecurity agencies?
- [24 June](#) - Using evolutionary genomics to help manage the Polyphagous shot-hole borer and other pests
- [15 May](#) - Matrix-Assisted Laser Desorption/Ionization Time-of-Flight Mass Spectrometry: Its benefits and how it will make a difference
- [16 April](#) - Being responsive and agile in a changing environment – Insights into the updated National Priority Plant Pests
- [25 March](#) - Biosecurity Commons: Online, Open-Access & Sharable Risk Analytics for estimating and managing biosecurity risk

2024

- [28 November](#) - Research on the Brown Marmorated Stink Bug (BMSB) and the growing menace of other pest stink bugs
- [19 September](#) - Australian Plague Locust Commission: New and old technology, innovations and lessons learnt during the recent desert locust upsurge 2019-2022
